

BALL GAME AT THE FORKS

Was Won by the Team of That Place

Although the Gandolfos Were Hard After the Fliners - Score Being 5 to 4.

The best and swiftest game of baseball of the season was played at Grand Forks Friday evening between a picked team from Dawson and the Grand Forks nine.

A large crowd from the Forks and surrounding creeks was assembled at the Gold-Hill grounds at 8 o'clock when the play started. The interest in the play never slackened and the boys were lustily cheered throughout the game.

The grounds have not been completed yet but are in very good condition. Both teams played a strong game from the start the Forks showing much greater degree of strength in team work than in the game in Dawson two weeks ago, which was the result of good hard practice since that time.

In the fifth inning the score stood 1 to 0 in favor of the Dawson team. That one score was made in the second inning by Darling who stole the run while the first baseman was holding the ball and having an argument with a man at first.

In the sixth inning the Forks scored two runs and in the seventh one. The Gandolfos in the sixth made a cipher but in the seventh scored two tying the score with three runs each. In the eighth inning the Forks scored two while the Gandolfos made one giving the Forks the advantage of one.

The ninth inning marked a cipher for both teams leaving the score at the end of the game five to four in favor of the Forks. Time of game one hour and fifteen minutes.

The game throughout was a fine exhibition with only three errors being registered for both sides and many very pretty plays were made.

Briggs, for Gandolfos, never pitched such a swift ball and for the first five innings the batters could not find it at all. Man after man picked up the bat only to drop it after making three unsuccessful attempts to hit the ball which always found a safe resting place in the hands of McPate, catcher, who also played his usual strong game.

Nelson, third baseman, made one of the prettiest runs for a foul fly ever seen. Those who saw him start said he could not get within 50 feet of the ball but when it landed way back of third base Nelson was just under it and it landed safely in his outstretched hands. Doyle, shortstop, played his usual good game, especially at the bat. Frew pitched the last two innings and proved a good successor to Briggs as three men went out on strikes. Turner, first baseman, also played a strong game, the ball always finding a safe landing in his hands. Frew showed improvement in his sprinting ability as he once got as far as third base.

For the Forks, Keating, first baseman, made the star play, making a high jump and catching a swift ball struck by Darling, putting him out at first. Bill made another star play, running from deep left field and catching a fly at center. Leigh, pitcher, showed great improvement over his former game and made the Gandolfo boys work hard to get onto his curves. Long caught a fine game and also showed improvement in throwing to bases.

The balance of the players in both teams did their full share of the good playing, making the game the best yet played. The line-up of the teams was as follows:

Gandolfos—Briggs and Frew, p.; McPate, c.; Doyle, s.; Turner, 1st b.; Frank, 2d b.; Nelson, 3d b.; Fee, c.; Stevens, l. f.; Darling, r. f.

Forkers—Keating, 1st b.; Fowles, 2d b.; Heacock, 3d b.; Hill, s.; Leigh, p.; Long, c.; Walcott, l. f.; Jennings, r. f.; Murphy, c. f.

Quitting noted as umpire. After the game the Forks boys treated their visitors to a banquet after which they were all invited to a private dance at Garvie's where music, dancing and singing and a general good time was enjoyed. The boys are loud in their praises of the good treatment they received at the hands of the citizens of the Forks and for some time to come will remember their trip with pleasure.

Flour Mill Project. George Riley a well known millwright of San Francisco is in Dawson with a proposition to establish a flour mill here. He claims that he can ship wheat to Dawson at an extremely low rate and milling it here can save 25-cent barrel lots a cost of about \$25 per day with a mill of that capacity. He will endeavor to interest local capitalists in the enterprise.

Fresh arrivals of fruits and produce every day at Barrett & Hall's Third Street. Reliable people to deal with. Best prices to the trade. Headquarters for candied eggs.

Product B. Fils Extra Sec Champagne, Regina Club hotel.

Bates and Slavin Training.

Among sporting circles the principal topic of conversation is the coming ten round go between Bates and Slavin. Slavin is now out on Hunter working his property there but is training constantly, he having a husky and skilled boxing partner on the claim who for an extra compensation stands up before the big fellow and gives and takes punishment, particularly the latter. Bates has secured Vincent White as a trainer and both men may be seen daily at the gymnasium going at it hammer and tongs. The match occurs on Saturday night the 29th of this month at the Savoy theater.

DIRT OF LOW GRADE

Being Worked Successfully on 20 Sulphur.

Mr. Hershberger, owner of creek claim No. 29 above discovery on Sulphur creek, has opened up and is now operating his claim in a very satisfactory manner. He is demonstrating that the way to make Sulphur creek yield good returns is to work a summer shift and use up to date machinery.

He has sunk an incline shaft and run a drift across his pay and rigged up an underground track, put on cars and is handling about 200 carloads of pay dirt daily. He has a very small force of men working and is said to clear \$50 per day over and above all expenses.

The pay on this claim lies chiefly in the bedrock of which he takes up about four feet together with one to two feet of gravel. The pay runs quite uniformly and is classed as low grade.

There is in this country a large number of claims with low grade pay dirt on them which are not being worked for the simple reason it is not thought they can be made to pay. If, however, one man, by employing scientific methods can work this low grade of dirt successfully it stands to reason that others can do the same and as soon as that fact is fully demonstrated it will mean the permanency of this camp for years to come.

ELDORADO AND BONANZA

Activity Still in Evidence in Flany Mines.

Mr. Alexander Dewar who is running a big plant on 66 below Bonanza was in town on business this week.

Mr. E. A. Webster has now a number of claims in successful operation on Chechako hill.

Mr. T. T. Davis of Monte Cristo gulch has been in Dawson for the past few days.

Mr. John Wick, of 19 above Bonanza, who has been rusticated on the outside during the past winter returned a few days ago and will resume active operations on his claim this summer.

Mr. Wm. Northrup the big mining magnate of Bonanza, made a quick business trip to Dawson yesterday.

Mr. J. Mallarkey, of Adams Hill is in town on business this week.

Latro Bros. have purchased Blake and Emrods' interest in Eldorado, and some heavy work will be done on the above claim this season.

The new banner claim on Adams Hill was sold a few days ago, consideration \$7500.

Messrs. Miles & McKenzie, who worked a large force of men on their claim on Magnet gulch this winter, have moved their big boiler to the top end of their claim from a shaft. A large hoisting gear is just being put in position for summer work. One of the finest shafts on Bonanza has been completed under the able supervision of Mr. Jas. Thomas. Water will be brought by flume from Adams Hill a distance of 4000 feet from Reed & Newman's 50-horse power motor. Miles & McKenzie will work about 20 men this season.

The Miles & McKenzie claim is one of the banner claims of the country, and the boys are to be congratulated on the favorable outlook for this season.

SOUTH AMERICAN REPUBLICS

Threaten to Wreck the Pan-American Exposition.

They Object to Their Country Being Made the Tail of the North American Kite.

New York, June 20.—A special to the Herald from Washington says:

Keen American observers of foreign diplomacy and commerce put an entirely new construction upon the struggle between South American republics which threatens to wreck the approaching Pan-American congress to be held in the city of Mexico. They say that beyond the dispute between Peru and Bolivia, on one hand, and Chile on the other, or the arbitration of the Tacna and Arica dispute, are the machinations of European diplomats and European business interests. Europe does not want the Pan-American congress to be a success.

While the United States is engaged in an effort to capture the markets of Europe, all Europe is busy in a race for the markets of South America. Europe is increasing its export trade with Venezuela, Brazil, Argentina and Chile. The United States export trade to South America is rapidly falling off, with the exception of that to Venezuela. It is said to be important to European trade that the Pan-American congress should not be held. Anything that brings close unification between the United States and the Central and South American countries is bound to lead to closer commercial relations.

A gentleman who is very closely in touch with the purposes and scope of the Pan-American congress says that European influences have been busy in Santiago, Chile, encouraging the Chilean government to take a stand that threatens to disrupt the congress. He also says that the same influences have been at work in Lima, urging the Peruvians to combat the position taken by Chile. Similar diplomatic effort has been in progress in Buenos Aires priming the Argentine government to refuse to enter the congress unless Chile yields.

The idea put forth by foreign agents has permeated all South America. That the United States seeks to control the politics of the various causes, and is holding the Pan-American exposition congress for the purpose of making South America appear as the tail to the North American kite.

The statement has also been made to the war and state departments that in much the same way have the difficulties of the United States been increased in Cuba. A gentleman who has spent much time in Havana says the foreign consuls there are in much closer touch with influential elements in the constitutional convention than the Americans, and have been very successful in sowing suspicion and discord.

The Pan-American exposition in Buffalo is a direct menace to the trade of European countries. It threatens foreign trade, and if it were followed by a Pan-American congress which should establish arbitration, then the United States would be in a position to restore her falling trade south of Panama.

John C. Ayres, United States consul to Rosario, Argentina, who is in Washington, said:

"American machinery leads the world in Argentina, but to increase our trade it is necessary for our merchants to give more attention to South American trade. A reciprocity treaty would give more attention to South American trade. A reciprocity treaty would give the bulk of the trade to the United States."

Oregon cheese and Canadian Full cream cheese. Selman & Myers. We fit glasses. Pioneer drug store.

A Man at the Steak.

A man went into a local restaurant this morning and asked for a steak. This restaurant makes a specialty of lunches, ham and eggs, etc., and when the man asked for a steak the waiter informed him that there wasn't a steak in the house.

"We have ham and eggs, bacon and eggs," said the waiter and enumerated other dishes which the man would eat. The man had an appetite for steak and wouldn't eat anything else. When he found that there wasn't any steak in that place he got down from the stool and went away seemingly in a rather unpleasant frame of mind.

Other customers came in and were served and the incident was forgotten for about 30 minutes when it was recalled the man coming into the restaurant with a package under his arm.

"Here is a steak and I want it fried right away," he said, and opening the package displayed a cut of steak, taken from the biggest part of the sirloin and which would weigh about five pounds.

"Have you any friends coming?" innocently asked the waiter.

"Now!" snarled the man, "I've got no friends comin'; that's all for me."

"Very well," meekly replied the waiter, and had the steak fried and at last accounts the man was "still" going at it.

From Fortymille. William Tibbs a mine owner on Walker's Forks in the Fortymille district arrived in Dawson this morning having walked from that post to this city. He reports fifteen mile creek as pouring an immense volume of water, also Twelvemile creek. He was held for 20 hours crossing the former place and would be there yet in all probability were it not that a down going stamper took him across in his boat. While he was camped at the mouth of the creek he halted several people in different boats, asking them to "take" his across but they paid no attention to him and continued down stream.

Tibbs reports that considerable work is being done in his district but says mining activity is discouraged by continual litigation all through the district.

Notice. There will be a special meeting of the executive committee of the Victoria day celebration at the Board of Trade rooms, Saturday evening at 8:30 o'clock. The presence of all members is urgently requested to consider a communication received from the Fourth of July committee.
