

HARRY K. THAW DECLARED SANE

Philadelphia April 23—Harry K. Thaw was declared sane tonight by the jury to determine his mental condition. The jury declared him fully capable of looking after his estate.

The jury deliberated seven hours and the verdict was reached when some of those waiting in the court room had abandoned hope that an agreement would be arrived at.

William A. Gray counsel for Evelyn Nesbit; divorced wife of Thaw said that a motion probably would be filed for a re-trial of the case. Thaw was not in court when the verdict was announced.

Thaw later was released on bond from the Pennsylvania Hospital for Mental and Nervous Diseases pending final disposition of the case. Judge John Monaghan permitted

ASTHMA NEVER CAME BACK

Since Taking The Fruit Treatment
in "Fruit-a-tives"

Read this letter from Mrs. J. M. Pennington of New Rockland, P.Q. "In 1919, I was taken with Bronchial Asthma and no one knows what I suffered during the winter. I began having choking spells and would just gasp for breath and could not speak. The doctor said he could do nothing for me."

In the spring of 1920, I started taking "Fruit-a-tives" and soon the choking spells became easier and I have not had one since May 7th, 1920. It is such a relief to be able to go to bed and have no thought of having to get up in the night for an hour or more as I did all that winter, but never have to now, all because I take a "Fruit-a-tives" tablet every night. 25c. and 50c. a box—at all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa, Ont.

Thaw to sign his own bond which gave him complete freedom for the first time in seven years.

PREVENTION WEEK WILL BE WELL OBSERVED

The observation of Fire Prevention week this year is to be made much more general than before. The Provincial Department of Lands and Mines which has had charge of the arrangements in previous years will have extensive assistance from the Federal Department of the Interior this year. This is the first occasion on which the federal authorities have granted assistance on any great scale and it is appreciated and will be of marked value.

Churches and Schools

April 27th to May 3rd is the time set for Prevention Week. The assistance of clergy and school teachers throughout the province has been enlisted and literature of various kinds has been distributed and is being distributed. Posters with striking pictures and in both English and French are to be distributed for use in hotels, railway stations and similar places.

Safety League Helping

The Safety League of Canada also in assisting in the campaign for fire prevention. That organization now has an office at Montreal and is able to render valuable assistance. Special slides for exhibition in picture theatres have been secured and will be shown. These are of the nature of cartoons and are very striking. The usual special work among the children of the schools will be done with particular stress laid upon the necessity of protecting the forests from fire.

Season Not Unfavorable

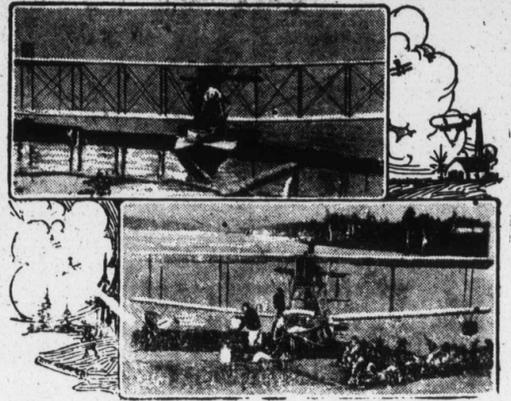

So far the spring has been not unfavorable to keeping down fires. Although there have been seasons in which forest fires occurred prior to April 15th. Before the last snowstorm the railways had made good progress in burning the grass along the rights of way. This is done as a precaution against fire spreading to the forests later when the growth will be very dry.

WRIGLEYS

Chew it after every meal
It stimulates appetite and aids digestion. It makes your food do you more good. Note how it relieves that stuffy feeling after hearty eating.

One Flies to the North

Contact. "Contact!" The first audible words between pilot and mechanic are spoken, and with a sudden roar of engine and propeller the giant human and machine glides swiftly over the surface of the Quizee, as the churning waters tugging at the bottom of the boat until momentum is increased to such extent that a touch of the "stick" causes the Vicker's Viking to slowly rise.

Two turns in a many minutes and the passenger, having adjusted his goggles and seated himself more comfortably, peers, at first cautiously, over the side of the pit, and far below him lies the little town of Angliers, the head of the Canadian Pacific steel which twists and turns in and out of the forest to the south like a living thing. The earth is as a map below, lakes and rivers shining in the distance and beneath, and ragged patches of bush and arable land smudged here and there like a child's attempt to depict relief.

Turning east the plane heads down Lake Quizee, following the water course to Lake Expance, — one sees from the air how appropriate is its name, — thence north for some fifteen miles up the Ottawa River and further north over one of its tributaries to Lake Fortune and Rouyn, upon nearing which the plane leaves the glorious rolling clouds and gradually sinks until once more the water tugs the bottom of the hull, checking it with sudden jerks which tend to slow the boat until it stops within a few feet of tie-up. One wonders how the pilot could, at such a speed, have judged his distance so well. But then he does the same thing more than once each day bringing to the new Gold Fields of Quebec, in fifty minutes, passengers and supplies which, before the air service was started took two days at the least to arrive.

Commencing May 18th the Air Service to the Gold Fields will be regular on Monday, Wednesday and Friday, large flying boats capable of carrying fifty people being scheduled to meet all Canadian Pacific trains at Angliers. This service, which will eliminate the hardships of the past and enable prospectors and tourists to travel to the Rouyn Mining District in less than an hour will include regular stops where they are required and accommodation is available.

Fletcher's CASTORIA

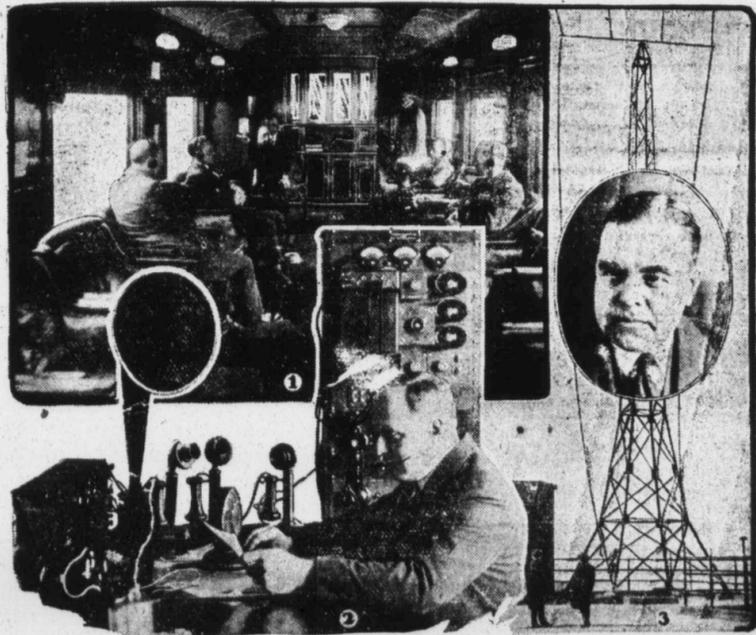

MOTHER! Fletcher's Castoria is a harmless Substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrups, prepared to relieve Infants in arms and Children all ages of

- Constipation
- Wind Colic
- Flatulency
- To Sweeten Stomach
- Diarrhea
- Regulate Bowels

Aids in the assimilation of Food, promoting Cheerfulness, Rest, and Natural Sleep without Opiates

To avoid imitations, always look for the signature of *Wm. D. Fletcher*. Proven directions on each package. Physicians everywhere recommend it.

Most Powerful Radio Broadcasting Station in Dominion

The Canadian National Railways have been writing radio history in Canada for the past year. First the System experimented with the broadcasting of news and concerts to moving trains, and when this proved a decided success radio receiving sets became a regular part of the service on transcontinental passenger trains over the System, the only railway in the world to be so equipped. For a time independent radio broadcasting stations in Eastern Canada were used entirely by the System, but the last year it was decided to build an operating station in Ottawa that would be owned and operated by the Company. This was done, and on February 27th the new station (CKCH) was opened by Sir Henry W. Thornton, K.B.E., President of the Canadian National Railways, who delivered an address of such unusual merit as to draw thousands of applaud cards from many parts of Canada and the United States.

The National Railways have now developed their programme in Western Canada and have made arrangements with five broadcasting stations between Winnipeg

and Vancouver for the broadcast of entertainment, news and speeches each afternoon and each evening in the week. These stations, combined with the Ottawa station and three that are being used in Montreal, give the Canadian National Railways the greatest chain of non-commercial radio broadcasting stations in the world.

The photographs show some of the activities of the Canadian National Railways in the realm of radio. No. 1—Passengers on board a compartment observation car listening to a radio programme. No. 2—Mr. Tom Moore, representative of the Trades and Labor Congress on the Board of Directors of the Canadian National Railways, talking into a microphone in the operating room of the Canadian National Railways radio broadcasting station in Ottawa. No. 3—One of the two great aerial towers on top of the Jackson Building in Ottawa. Inset—Mr. W. H. Swift, Jr., Radio Engineer of the Canadian National Railways, who has charge of radio operations for the entire System.

Population and Forests

Eighty per cent of the habitable area of Canada is non-agricultural. This does not mean non-profitable. Five thousand forest industries live in that great northern empire and probably three and a half millions of Canadian population are dependent for all or a substantial part of their income upon what the forest areas produce. It is equally true that the riddance of the forests would rid the country of a large part of its inhabitants. Sir Clifford Sifton writing to the Canadian Forestry Association said recently:—

"If the plague of forest fires is allowed to continue the exodus of population from our timber growing areas cannot very well be prevented and it is only a question of a relatively few years until we force from our northern areas the great body of population and all municipalities subsisting on forest manufactures."

It has been estimated that from fifty to seventy-five per cent. of the population of Quebec and New Brunswick derive their living from the forest. British Columbia shows even a higher percentage. A good many Canadians have erroneously identified population and immigration with farm lands exclusively. An examination of occupations shows the falsity of this view. The productive forest is the only lure to population that 80 per cent. of the area of Canada ever can have for no crop except forests can grow thereon. The timber stock of present-day Canada is almost wholly growing on non-arable lands so that when a careless smoker or camper wipes out a township of timber the area remains useless and tenantless for upwards of half a century.

"Tired and Worried Nervous and Despondent"

Mrs. M. Chevalier, Belle River, Ont., writes: "For eight years I suffered from despondency and nervousness. Sometimes I could not sleep at night for worrying and the next day I would be so tired that my work was a burden to me. I began using Dr. Chase's Nerve Food and can say I am now entirely relieved of the nervousness from which I used to suffer, and things do not worry me as they used to."

"Dr. Chase's Ointment also relieved me of eczema on my arms, which had bothered me for three years. My house is never without Dr. Chase's Medicines."
