BETTER Baking Powder

There can be no better baking pow-der than Strong's. In making baking powder there are certain definite materials to be used. A cheap powder can be made by using unwholesome ingredients; a good powder by using pure and healthful materials.

The leavening properties of an alum powder may be equal to a cream tartar one, but we prefer cream tartar, so should you. Strong's Baking Powder is a cream tartar product, and it costs you less than any other pure powder you can buy.
