THE FIRST "TIN FISH"

"We then journeyed on for a mile or two and then went to the bottom and rested until about 8 p.m., when we came up. It was dusk, so we looked around. Nothing in sight. We broke the surface and entered the Sea of Marmara and bumped around for a few days without sighting a thing until Sunday morning, when we were diving outside of Constantinople and saw a big gunboat, and at 6.25 a.m. she was no more; but before she sank, while she was listing over, they opened fire on us. The second shot hit our periscope and 'done it in.' That gunner must have been a cool card, eh?"

"On Monday we sighted a steamer, came to the surface alongside her and told her to stop. She stopped, and the men were so anxious to get clear that one boat capsized. No lives were lost. There was a Yankee correspondent aboard who tried to bluff; no good though, 'cos an officer and two men boarded her and discovered she had a 6-inch gun, several gun countings and fifteen-inch ammunition aboard, so we blew her up. A few minutes after we sighted another steamer and told her to stop. She wouldn't. We chased her into the harbor, and when she was securing alongside a pier we torpedoes her."

A Brush With Cavalry
"Soon after we sighted another steamer and chased her till she ran ashore. We were about to board her when some cavalry came up and opened fire. We replied and dropped a few, and then dived and torpedoed the ship."

Falling Back From The Dniester River

Russian Left Wing Ends Task of Protecting Main Retreat.

London, June 28.—Berlin reports the fall of the Galician town of Halicz, and says that the Austro-Germans have crossed the Dniester River, which means that the five days' desperate rearguard action by the Russians has ended in their retirement. However, the stubborn resistance of this flank of the forces of Grand Duke Nicholas, Commander-in-Chief of the Russian armies, has undoubtedly enabled him to reform his lines along the River Bug, virtually without interference.

The River San now takes the place of the Dniester as the scene of a sanguinary battle in the Russian effort to prevent the investment of Warsaw. Petrograd admits the retirement of the Russians to the River Gnila Lipa, which is some 80 miles from the frontier, but military experts do not expect heavy fighting along that river. They express the opinion that the next serious battle probably will occur along the Zlota Lipa River, which runs parallel to the Gnila Lipa further eastward, where the Russians would benefit by the railroad with which the Tarnopol line connects. These operations and plans, according to military men, confirm the theory that the Dniester forces were merely covering for the northern army.

ONLY 6 MILES FROM RIVA

Terrific Bombardment of Malborghet Is Still In Progress.

London, June 28.—Through passes 5,000 feet in altitude the Italians have entered the Austrian territory south of Riva on the western side of Lake Garda. They are now within six miles of Riva, which is the only important town on this lake.

The following Italian official war statement was given out at Rome tonight:

"There has been no important development along the entire front. In Carnia mountain artillery was transported with difficulty to a summit and used effectively on the enemy's camp on the other side of Valle Piccolo."

"In the theatre of operations bad weather continues."

"The enemy's aeroplanes are becoming active, positions recently conquered being bombarded, but generally with slight result."

The Austrian official report says: "In the Italian war theatre the situation is unchanged. The enemy is completely inactive, and only artillery battles continue. A naval aviator on the 27th bombed near Villa Vicentina a hostile captive balloon and compelled it to descend. He also on the 27th successfully dropped bombs on a hostile park of artillery at San Casciano and badly damaged a steamer at Salsobita, so that they stern sank to the bottom."

EFFORT TO CRUSH GERMAN LINE

Great Struggle on Loreto Heights for Life Road

PARIS, June 28.—The enemy has made no further attacks during the past 24 hours on the western front, although artillery duels are in progress at many points.

The War Office announces that eight bombs were dropped successfully on the Zeppelin hangers at the German airship factory at Friedrichshafen. The raid was accomplished by a single French aeroplane, which was obliged to make a landing in Swiss territory on the return trip owing to engine trouble. The descent was made at Rheinfelden, a town on the Rhine about 10 miles from Basel.

The Germans, in fighting furiously at Bagatelle and in the trenches of Calonne, are seeking to approach the strongly fortified town of Verdun, according to Lieut.-Col. Rousset, military critic of the Petit Parisien. He believes they are seeking to gain control of the railroad from Chalons to Sainte Mennehoule. While they are aiming at Verdun from two directions the critic believes the efforts of their army will prove futile.

Considers Reply Will Be Favorable

United States Ambassador in Berlin Reports Are Improvements

WASHINGTON, June 28.—Favorable reply from Germany to the last note of the United States concerning submarine warfare and the sinking of the Lusitania was predicted in an official despatch from Ambassador Gerard received to-day at the State Department. It was transmitted to President Wilson at Cornish, N.H.

While the Ambassador did not attempt to outline the forthcoming German note, he described the atmosphere in Berlin official quarters as favorable to a satisfactory reply. He referred to the visit of Dr. Anton Meyer-Gerhard, the emissary of Count von Bernstorff, the German Ambassador, pointing out that the latter's information apparently had impressed the German Government with the idea that the United States did not want war with Germany, but desired a satisfactory reply to her original demands.

The fact that Ambassador Gerard took occasion to predict informally the nature of the reply, was regarded as significant in official quarters here, where it was pointed out that the Ambassador's forecasts in the past had been conservative and consistent. Ambassador Gerard understands the German official purpose to be to make no concessions which will affect the use of the submarine as a means of warring on the commerce of Great Britain, but to propose some way by which American lives and legitimate interests will be safeguarded. Officials here have no inkling as to the methods by which this object is to be attained, but from previous despatches from Berlin, it is assumed that an arrangement will be suggested whereby German submarines would refrain entirely from attacks on ships of any nationality, primarily used for passenger travel, while continuing to wage vigorous warfare on enemy ships devoted chiefly to the transportation of contraband.

Fred Wendling is held at Edmonton for having fire arms in his possession; he was born in Germany, lived 10 years in New York; fought for U. S. against Spain, and has lived in Canada three years.

Large Shell Order Placed By Russia

Canada Car Foundry Head Has Contract to Make 5,000,000

NEW YORK, June 27.—Wilson W. Butler, vice-president of the Canadian Steel Foundries, Ltd., and the Canadian Car and Foundry Company, who arrived from Liverpool on the steamship Philadelphia, declared in Petrograd for 5,000,000 artillery shells, which he asserted is one of the largest contracts ever granted by Russia for foreign-made ammunition. The shells will be manufactured to the order of the Russian Government at Canadian ports.

While in England Mr. Butler conferred with the Booth committee, an advisory organization to the War Department. He said that he objected to England's efforts to draw upon Canada and other British colonies for a large supply of skilled labor.

"Canada has already generously responded to the call of Great Britain with thousands of the best of her young men," said Mr. Butler. "The effort to also draw from our skilled labor I resent, for we need these men ourselves."

Mr. Butler confirmed an interview he gave before sailing, in which he complained that Canadian firms were not given an equal opportunity with firms of the United States in supplying ammunition and war supplies. He declared further that the need of the allies now was for shells of a character that would break down and destroy trenches constructed of reinforced concrete and steel, such as, he said, the Germans have built all along the western battle line.

The united farmers of Alberta favor throwing open for grazing all lands thirty miles or more from a railroad.

A. J. Pyke, of Regina Collegiate, has been appointed principal of the Saskatoon Collegiate Institute out of sixty applicants.

Detroit Man Confesses His Part in Walkerville.

Windsor, June 27.—After a severe grilling by the police without result,

Wm. Lefler, of Detroit, late Saturday night confessed to Crown Attorney Ruff, at Windsor, that he had conspired with two other Detroiters to dynamite Canadian factories and public buildings. In his confession Lefler said: "I have worked with Manager Albert Kalischmidt, of the Tate plant, in Ford, several years. When the war started the plot to blow up factories

making supplies and ammunition was first introduced to me by a man who offered me \$200 if I would handle the dynamite at the Tate plant."

"Three months ago the man commenced to smuggle dynamite over in his automobile at Walkerville. This was stored in the vault of the Tate factory. Another man was to bring over the fuses and time clocks. I bought two suitcases in Detroit and took them to Walkerville without any questions being asked by the Customs officers."

"The details of the plot were discussed in the office of this man in the Kresle Building, Detroit. The only part he took in the plot was to furnish me with \$25 on account and smuggle the explosive over from Detroit."

According to the police Lefler said he was to blow up the Tate factory, which was sold several weeks ago to a Toronto company for the manufacture of munitions for the British army. The plot, included the Tate body factory, which was dynamited a week ago, the armories, the Canadian Bridge Company plant, at Walkerville, where 500 high explosive shells are being turned out every day, and the Dominion Stamping Company's plant at Ford.

Thirty sticks of dynamite were found in the vault of the Tate factory last

Friday, and several more were uncovered by a grass cutter who was cutting weeds in the rear of the building.

Turkish Fleet Seeks Refuge From Allies

Driven from Sea of Marmara by Activity of British Submarines

LONDON, June 28.—A despatch from Athens states that British submarines have caused further damage to Turkish shipping in the Sea of Marmara. The Turkish fleet has sought refuge at the Golden Horn and in the Bosphorus.

The Chronicle publishes the following account by one of the crew of the exploit of the British submarine E-11 for which Lieut.-Commander Nasmyth received the Victoria Cross and each of his men the Distinguished Conduct Medal.

"We left Imbros one morning about 3 a.m. and steamed toward the Dardanelles and dived as day was breaking, and—well, got through the Narrows all right, arrived on the other side and saw two battleships. We were getting ready to torpedo one of them when they spotted us, opened fire on us and nipped, bunked and
