

The medium brood high toe is popular with many men who want a roomy wide-fitting shoe. Blucher: black or brown leathers, \$6 to \$10.

Better Value for Your Money

THE size and the resources of the producer have a big effect upon value. A large volume of business reduces the cost per unit of product. Great buying power means the ability to secure materials well in advance, and at lowest prices.

AMES Holden McCready supply the shoe requirements of a large part of the Canadian public. More than 5,000 dealers, in all sections of the country, sell A.H.M. shoes. No other Canadian shoe house has anything like this volume of output.

And in financial resources this company occupies the same dominant position. It is able to place contracts for materials far in advance of actual requirements, and at better prices than would be possible for smaller purchases. These facts are important in normal times; they are doubly important now.

The A.H.M. trade-mark on a shoe is a warranty of value based upon the large output and greatest buying power.

A.H.M. War-Time Selections offer Special Service Value for Men, Women and Children. Ask your dealer for them.

BREEDING SHETLAND PONIES IN CANADA

Edith of Transy and her foal, and a foal she is nursing besides.

Youthful visitors—the two children on the left belong to Mr. Percy Cowans, of Montreal, who takes an active interest in the Victory Loan Campaign.

It was in 1912 that Mr. T. B. Macaulay, President of the Sun Life Assurance Company of Canada, first imported Shetland ponies to Canada, but long before this date he had made a careful and very close study of the breeding of these ponies. It was, therefore, very natural that during Mr. Macaulay's visit to the north of Scotland he looked for and secured the best possible pedigree ponies. On his beautiful estate, which is situated on the Heights at Hudson, Quebec, near Montreal, there are today some of the most famous pure bred Shetland ponies in existence. The Canadian Pacific Railway passes through part of the estate and passengers to Point Fortune and Ottawa have very often wondered to whom the little jet black ponies belong.

Mount Victoria Pony Stud Farm at Hudson Heights welcomes visitors. It is a sight well worth seeing. Ponies of all types can be seen—from the tiny twelve or sixteen inch foal to the father of the herd, Silver Star of Transy, champion of all Scotland, who stands but thirty-six inches in height. Possessed of a long mane and tall star looks the part. He is jet black and although ten years old is in prime condition. Then there is Edith of Transy, another prize winner, and a fine type of genuine Shetland pony.

Another pony that all visitors see is old Dorothea. She is just thirty years old, but you can't tell her age by just looking at her, for she looks just as well as the three year olds. She is one of the most famous Shetlands in the world, with a concentration of the best blood in Shetland.

Champion Silver Star of Transy, the head of the herd.

Prince of Thule, the strain which Dr. Douglas, author of "The Shetland Pony," says is the source of the best riding blood in the breed. Dorothea is believed to be the only Shetland pony living to-day which is practically pure bred to Prince of Thule on both sides. The ponies in the herd are black chestnut and white, and black and white. Ponies suited especially for the use of children are bred, while experiments are being conducted to produce a new breed of pony by crossing pedigree Shetland mares with a prize winning Hackney pony stallion. This is calculated to bring out a pony with all the gentle characteristics of the Shetland and all the fine action of the Hackney pony. Festive parties and all the stock that is found in a prosperous farm there is a herd of elk on the slopes of Hudson Heights. These run loose winter and summer and add to the attractions of one of the beauty spots near Montreal.

THAT BOY OF YOURS

He is not seriously wounded. No! But he never tells you of the pain he sometimes suffers because of a blistered foot after marching. He said not a word of how the ground near where he is billeted reeks with old gas which irritates cuts and sores and makes them ten-fold more painful and serious. He considers these "little things." For just such serious "little things" Zam-Buk is provided. It soothes the pain, draws the inflammation from cut or blister and heals eruptions and sores. In the homes of Canada, mothers consider it a necessity. How much more necessary is it out yonder where your boy is! See to it that he has a supply! Perhaps he gave that last box you sent to a comrade, so in your next parcel don't forget to replace it. Put Zam-Buk in every parcel you send for the boys all say "send us more."

Zam-Buk
