

BLACKHEAD OF TURKEYS

Intestinal Disease Which Causes Considerable Mortality.
No Known Cure for the Trouble.
Immediate Killing Recommended.
Turkeys Affected Should Be Kept From Other Birds—Hend.
Lang. Asparagus After the Cutting Season.

THE disease of turkeys commonly known as blackhead (entero-hepatitis) is one of the most serious and deadly diseases of these birds. It is characterized by a yellowish discoloration of the head and neck, and a general debility. The disease is caused by a parasite which attacks the liver and intestines. It is most prevalent in young birds, and is especially common in those which have been kept in close quarters. The disease is fatal in many cases, and it is therefore of great importance to the turkey raiser to know how to recognize and prevent it.

CASTORIA

Children Cry for Fletcher's

What is CASTORIA?

Fletcher's Castoria is strictly a remedy for Infants and Children. It is especially prepared for babies. A baby's medicine is even more essential for babies. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that its use for over 30 years has not proven.

What is CASTORIA?

Castoria is a harmless substance for Castor Oil, Purgative, Drops and Soothing Syrup. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulence, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Comfort—The Mother's Friend.

For Frost Bites and Chilblains.—Chilblains come from undue exposure to slight and cold and frost-bite from the icy winds of winter. In the treatment of either there is no better preparation than Dr. Thomas' Electric Oil, as it counteracts the inflammation and relieves the aching and soreness. It is applied to the affected part and becomes absorbed. It is a powerful stimulant and relieves the pain. It is also a powerful antiseptic and prevents the infection of the wound. It is a powerful analgesic and relieves the pain. It is a powerful antiseptic and prevents the infection of the wound. It is a powerful analgesic and relieves the pain.

Scarcity of Rooted Cuttings

With the growing scarcity of rooted cuttings, the grape raiser is faced with a serious problem. The demand for rooted cuttings is increasing rapidly, and the supply is becoming correspondingly scarce. The grape raiser must therefore be prepared to meet this demand by growing his own cuttings. This can be done by using the following method:

Women Surgeons

For the first time in its long history the Dundee Royal Infirmary in Scotland has women on its staff. The hospital has appointed Miss Mary MacLeod as its first woman surgeon. She is a graduate of the Edinburgh University and has served her apprenticeship in the Dundee Infirmary. She is a member of the Royal Society of Medicine and the Royal Society of Surgeons. She is a woman of high ability and is expected to do much good work for the hospital.
