To Trustees, Directors of Turnpikes, and others, interested in the construction of Bridges.

WIFTY S NEW PAPENT BRIDGE Mr. Wirry offers to the public his New Patent Bridge. Its superiority over others may justily entitle it to a national consideration.—For crossing deep rivers, rapids or falls, it is unequalled; since it can be placed across any others, without Piers, and at a much less of

pense than on any other system at present used. It reaches from bank to bank in a right line, and cannot be affected in the least by fieshett or ice, or change of temperature. At the same time, there is a durability and safety which can not be war anted by any other bridge now in Several of them have been erected in the State of Missouri, one of which upwards of 100 Det in length, and others are in progress Alvantages Offered.

1. Mr. Wirry offers to build Bridges over the most difficult Falls or Rapids, deep. Rivers.

the most difficult Fails or Rapids, deep. Rivers or Rayins.

2. His Bridges cannot be swept away by fleshets or large masses of ice.

5. They are more sale, and possess a much greater durability than those in preasant use.

4. The Expense can be reduced, in many instances, to less than one half that of any othe bridge whatever.

5. A Bridge upon Mr. Wiren's plan can be put across a river, in many cases, in a few days.
