A GRAPHIC PICTURE OF THE LAZY AND DESPERATE RUFFIANS.

The outlaws of Arizona, who have of our readers: we'l adapted to business such as theirs the outset. It is useless to sow the they have become habitually vicious. minute seeds of plants in heds which J. G. H. PARKER. Wherever the cowboy may be are only partially pulverized, and BARRISTER AT-LAW, CONVETANCER, put, and under whatever circumstance he may be met, he will be found to b. You cannot make the soil too mellow.

BARRISTER AT-LAW, CONVEZANCER, and REAL ESTATE AGENT. desperate, intemperate, full of swagge:
bravado, and careless as well of his own
life and proper y as of those of others.
He wears a buckskin suit, with a hat having a rim wide enough to cover hiears and neck and tuck in at the collar band. In his leather belt hang two can take a hoe and break all these fine revolvers, generally self cockers, chunks of earth apart easily. Then use and in one boot-leg, held in place by two slits in the leather, rests a knife of mirderous pattern. The cowboy. range in age from eighteen to thirty The life which they lead is not con will be spaded in before you are ready ducive to lorgevity, and it is therefore to sow your seeds. very rare that a genuine cowboy more 'If your seeds are sown in the beds than thirty years of age is found. It take care not to cover them too deeply. one succeeds in dodging the bullets of Such seeds as those of the Petunia and deputy sheriffs and the gibbet of Judge Portulaca require but scant covering. Lynch until that period is passed, he I generally take a thin board and press generally abandons that trade and it lightly over the surface of the bed takes to train and stage robbing as a where I am about to sow seed. Then I

to the cattle which they are employed covering for the seeds I sow.' station. On the great ranches they find no opportunity to indulge in their laws a start seeds in the house every spring lawless propensities. They literally to prepare soil to fill these pots and live among their cattle, faring but lit the better than the brutes which they are hired to guard. The little cooking this, you will generally find it difficult. are hired to guard. The little cooking this, you will generally find it difficult which is necessary they do themselves.

They are their own tailors and doctors the spring as you will need it.

ALSO: and once or twice a year, when near a fine stream, if the weather is not too cool, their solitary shirt is washed after a fashion. When the round ups occur a fashion. When the round ups occur a fashion. ferent aspect. The drive is often long, warm, and there is generally to and always dangerous and laborious. little air, especially fresh air to enable the boys are splendidly mounted, their the plants to grow healthily. There is sessions in which they take the most pride. They ride among the cattle at imminent risk of being tramped to death, and at night sleep on the window, as far from the stove as post HOW LOST, HOW RESTORED death, and at night sleep on the ground. When the herd has been delivered and the boys have partaken freely of frontier whiskey the trouble begins. If there is a dance-house near at hand they head for it, and signalize their presence by attempting to shoot out? the candles or lamps, as the case may be. As a rule, they are not disturbed in pastimes such as this. If they conclude before morning to take the town, then war is declared and somebody will be killed.

The Arizona rustlers are simply northern cowboys on an unending spree. They are wild men. No Apache that ever lived had less regard for life than they. They pretend to pay some attention to cattle, but as that industry in Arizona is not yet a large dual day will seldom wilt."

window, as far from the stove as possible. In this way you can raise healthy foount on our raise healthy fooust plants. If you do not exercise due care about watering and giving fresh air, you will have spindling seed lings, and when you come to set them in the ground, they will suffer so that you will not be likely to have any discussed in the ground, they will suffer so that you will not be likely to have any sould from seeds sown in open ground. Set the pots or boxes out on the ver and aduring the warm hours of every day, to accustom the plants to the change from indoor to outdoor. Select a damp, cloudy day for transplanting spree. They are wild men. No Apache that ever lived had less regard for life than they. They pretend to pay some attention to cattle, but as that industry in Arizona is not yet a large dual day will seldom wilt."

MORE THAN A MATCH FOR HIM. - John Most of the active work of the vine. Henry, stood on the corner with anard is over, still the vines will need other one of his kind, waiting for a girl some care. The laterals may still need pinching, and shoots may push where they are not wanted. Most of the publesome insects of this season are her. As she passed he said something large, and readily noticed, so that the only remedy, whether for the large grapevine catepillars, or the beetles mentioned on other pages, hand-picking can be applied. The chief troubles at him so suspiciously that he hesiof the grapegrower this month, are the tated. Leaf hopper, incorrectly called Thips, and Mildew. The little insect, which in some places rises in clouds as one passes among the vines, and appears of a dingy-white color as it flies, is, when caught and examined found to be handsomely marked with scarlet. It puppy that has had any decent train-

remains attached to the leaves, sucking the juices, in its early life, and it is only when it gets wings, that its presence is usually noticed. The only remedy that has been suggested for this Leaf-hopper in its wings details. this Leaf-hopper in its wingod state, is to carry lighted torches among the vines at night. Mildew appears in the hot dry days. Pale spots are seen on the leaves, and if the underside of these be examined, there will be found the gray patches of the minute tringus which causes the trought.

will be found the gray patches of the minute fungus, which causes the trouble. Sulphur is the remedy. This, upon the first appearance of the Mildew, should be freely and thoroughly dusted upon the folisge of the vines.
