

FROST & WOOD CHAMPION CULTIVATOR

It Does the Work!!

EVERY farm paper tells you to "cultivate." It is good advice. The great question with you is, "What machine?" We say right here that this is one of the very best Spring Tooth Cultivators on the market.

Why? Because the "Champion" has a frame of best heavy steel, braced with strong steel braces securely riveted part to part—making a substantial, long-wearing Cultivator. A solid steel axle carries the frame and sections. And these sections on Frost & Wood "Champion" Cultivators are properly designed. Each section can work independent of the others, when uneven ground is encountered. They adapt themselves to all inequalities of the land. That means every bit of your field cultivated—nothing missed—no green spots left—all weeds cut or torn out by the roots.

Next the pressure. This is applied by that convenient lever in front and put on all teeth at once. See the heavy springs above each section—they keep the "Champion" down to its work. Teeth are made of best quality Spring Steel. Each has a Helper Spring to lend additional strength when working hard land.

The 2-inch narrow points on "Champion" Cultivators are reversible—which means double wear. For weed or thistle cutting wide points are supplied—change can be quickly made. You should get this "Champion" Cultivator. It will prove a valuable asset to any farm.
