BUCKINGHAM'S DYE. For the hair. This elegant preparation may be relied on to change the color of the beard from gray or any other undesirable shade, to brown or black, at discretion. It is easily applied, being in one preparation, and quickly and effectually produces a permanent color which will neither rub nor wash off.

HAIR VEGETABLE SICILIAN HAIR RENEWER. This standard article is compounded with the greatest care. Its effects are as wonderful and satisfactory as ever. It restores gray hair to its youthful color. It removes all eruptions, itching and dandruff; and the scalp, as its use becomes white and clean. By its tonic properties it restores the capillary glands to their normal vigor, preventing baldness, and making the hair grow thick and strong.

BUCKINGHAM'S DYE. For the hair. This elegant preparation may be relied on to change the color of the beard from gray or any other undesirable shade, to brown or black, at discretion. It is easily applied, being in one preparation, and quickly and effectually produces a permanent color which will neither rub nor wash off.

BUCKINGHAM'S DYE. For the hair. This elegant preparation may be relied on to change the color of the beard from gray or any other undesirable shade, to brown or black, at discretion. It is easily applied, being in one preparation, and quickly and effectually produces a permanent color which will neither rub nor wash off.

BALDNESS. Neither Gaioline, vasoline, Castorine, or Alect's Hair Oil, or Hall's Hair Restorer have produced permanent hair on bald heads. That great discovery is due to Mr. Wm. H. Hallett, 144 King Street West, Toronto, as certified by Analysis of the Living Institute of this city and the University. He challenged all the so-called restorers to produce a like result.

The Restorative is put up in bottles at \$1 per bottle, or six for \$5. For further information, address CHARLES MAITLAND WINTERCORBYN, 144 King Street West, Toronto.

\$66 a week. Terms and \$5 outfit free. H. Hallett & Co., Port and Maine.

In ordering anything advertised in this paper, you will please state the publisher, as well as the address, by stating that you saw the advertisement in The Canada Presbyterian.

If you suffer from any chronic disease arising from Impure Blood, Sluggish Liver, disordered Kidneys, or inactivity of the bowels; if your nervous System is debilitated from whatever cause arising, do not despair, but procure a small bottle of Burdock Blood Bitters. It will only cost 10 cents. Large Bottle, \$1.00. For sale by all medicine dealers.

## SUBSTITUTES!

The public are cautioned against a custom which is growing quite common of late among a certain class of medicine dealers, and which is this: When asked for a bottle of Pain-Killer, they suddenly discover that they are "sold out," "but have another article just as good, if not better," which they will supply at the same price. The object of this deception is transparent. These substitutes are made up to sell on the great reputation of the Pain-Killer; and being compounded of the vilest and cheapest drugs, are bought by the dealer at about half what he pays for the genuine Pain-Killer, which enables him therefore to realize a few cents more profit per bottle upon the imitation article than he can on the genuine.

45. FEVERS, MORBUS, CRAMP AND ALL SUMMER BOWEL COMPLAINTS PERRY DAVIS' PAIN-KILLER IS UNEQUALLED. IT CURES ALMOST INSTANTLY.

The PAIN KILLER is put up in 2 oz. and 5 oz. bottles, retailing at 25 and 50 cents respectively. Large bottles are therefore cheapest.

SOLD BY ALL MEDICINE DEALERS.

### THE SABBATH SCHOOL Teacher's Companion.

BY REV. JOHN McEWEN. The Teacher and School Companion to the Old Testament Series of the International Lessons, beginning with the first of Genesis, on the first Sabbath of July, is a... This book will be found to be a felt want in the International System of S. S. Lessons. It presents the entire Book of Scripture in a connected and progressive form—taking up the dropped links of connection between the lessons. It has a Normal Class Exercise on Bible Investigation, illustrated by the Book of Genesis. Price 10 cents per copy, or \$1.00 per dozen. Sent any address, post free on receipt of price. C. BLACKETT ROBINSON, Publisher, 5 JORDAN ST., TORONTO.

## Scientific and Useful.

HOW TO FASTEN UP IVIES.—I have discovered a very neat and convenient method for fastening up ivies to the wall. I use the little hooks with a screw on one end, which are kept at every hardware store. They may be screwed into window casings or even into the plastered wall, one, or one-and-a-half feet apart, and the ivy will rest in them firmly and securely, and yet may be easily removed to wash the leaves and as easily replaced again. Be careful not to get the hooks too large.—Housekeeper.

BARLEY SOUP.—Wash and steep four ounces of barley in a pint of water, in which a little soda has been dissolved, for about twelve hours. When ready to prepare the soup, pour off all the water, place in a soup-pot, add three quarts of boiling water, an ounce of grated stale bread, half ounce of salt, and two tablespoonfuls of chopped parsley. Set the pot on the fire and boil it gently for four hours, keeping it closely covered. When about to serve add a tablespoonful of good butter.

CHICKENS FIT TO EAT.—Don't imagine that it makes no difference how your chickens have been brought up. Don't suppose that they will be good anyhow. Chickens have been carefully dressed, deliciously stuffed, assiduously basted, tenderly roasted, and yet they were not fit to eat. There was a flavour about them that no soda rinsings could cleanse and no seasonings conceal. These were chickens that had picked up their living about pig sties and other unclean places. A chicken may be spoiled in dressing it to cook. If killed with a full crop and allowed to lie for hours before it is "drawn" (or relieved of its internal organs), it gets an unpleasant flavour. Fowls should be caught and shut up without food for twelve hours or more before they are bled. Then the crop and intestines will be empty, and the task of picking and dressing it will be greatly lessened. Old fowls are not necessarily tough—only cook them long enough. They are more tender twenty-four hours after they are killed than if eaten immediately.

SCIENCE FOR THE HOUSEHOLD.—All explosions of petroleum lamps are caused by the vapour or gas that collects in the space above the oil. Of course, a lamp contains no gas, but immediately after lighting the lamp consumption of oil begins, soon leaving a space for gas, which commences to form as the lamp warms up, and after burning a short time sufficient gas will accumulate to cause an explosion. The gas in a lamp will explode only when ignited. In this respect it is like gunpowder. Cheap or inferior oil is always the most dangerous. The flame is communicated to the gas in the following manner: The wick tube in the lamp-burners is made larger than the wick which is to pass through it. It would not do to have the wick work tightly in the tube; on the contrary, it is essential that it should fit down with perfect ease. In this way it is unavoidable that space in the tube is left along the sides of the wick sufficient for the flame from the burner to pass down into the lamp and explode the gas. Many things occur to cause the flame to pass down the wick and explode the lamp. 1. A lamp may be standing on the table or mantel, and a slight puff of air from the open window or door may cause an explosion. 2. A lamp may be taken up quickly from a table or mantel and instantly exploded. 3. A lamp is taken into an entry where there is a draught, or out of doors, and an explosion ensues. 4. A lighted lamp is taken up a flight of stairs, or is raised quickly to place it on the mantel, resulting in an explosion. In these instances the mischief is done by the air movement, either by suddenly checking the draught or forcing air down the chimney against the flame. 5. Blowing down the chimney to extinguish the light is a frequent cause of explosion. 6. Lamp explosions have been caused by using a chimney broken off at the top, or one that has a piece broken out, whereby the draught is variable and the flame unsteady. 7. Sometimes a thoughtless person puts a small-sized wick in a large burner, thus leaving considerable space along the edges of the wick. 8. An old burner, with its air draughts closed up, which rightfully should be thrown away, is sometimes continued in use, and the final result is an explosion.—Scientific American.

A MISTAKE.—It is a great and often fatal mistake to take repeated drastic purgatives for constipation of the bowels, they induce piles and cause debility of the bowels. Burdock Blood Bitters is a safe and perfect regulator of the bowels, opposing the torpid Liver and all the secretions to a healthy action; acting on the Kidneys and renovating and purifying the system in the most perfect manner.
