DOVE-TAILED BRICKS.

A native East Indian civil engineer has invited and put into practical use a novel form of brick for use in lining wells or in other circular construction. Two bricks laid side by side form a genuine dove-tail mortise at the point of union, and the tenon of another brick in the next course above fits into this mortise and firmly binds the wall together.

DRY ROT IN TIMBER.

No wood which is liable to damp, or has at any time absorbed moisture, and is in contact with stagnant air, so that the moisture cannot evaporate, can be considered safe from the attack of dry rot.

Any impervious substance applied to wood, which is not thoroughly dry, tends to engender decay; floors covered with kamptulican and laid over brick arching before the latter was dry; cement dado to wood partition, the water expelled from dado in setting, and absorbed by the wood, had no means of evaporation.

Woodwork coated with paint or tar before thoroughly dry and well seasoned, is liable to decay, as the moisture is imprisoned.

Skirtings and wall paneling are very subject to dry rot, and especially window backs, for the space between woodwork and the wall is occupied by stagnant air; the former absorbs moisture from the wall (especially if it has been fixed before the wall was dry after building), and the paint or varnish prevents the moisture from evaporating into the room. Skirting, etc., thus form excellent channels for the spread of the fungus.

Plaster seems to be sufficiently porous to allow the evaporation of water through it; hence, probably, the space between ceiling and floor is not so frequently attacked, if also the floor boards do not fit very accurately and no oilcloth covers the floor.

Plowed and tongue floors are disadvantageous in certain circumstances, as when placed over a space occupied by damp air, as they allow no air to pass between the boards, and so they dry.

Beams may appear sound externally and be rotten within, for the outside, being in contact with the an, becomes dryer than the interior. It is well, therefore, to saw and reverse all large scantling.

The ends of all timber, and especially of large beams, should be free (for it is through the ends that moisture chiefly evaporates). They should on no account be imbedded in mortar.

Inferior and ill-seasoned timber is evidently to be avoided.

Whatever insures dampness and lack of evaporation is conducive to dry ro; that is to say, dampness arising from the soil; dampness arising from walls, especially if the damp-proof course has been omitted; dampness arising from use of salt sand; dampness arising from drying of mortar and cement.

Stagnation of air resulting from air grids getting blocked with dirt or being purposely blocked through ignorance. Stagnation may exist under a floor although there are grids on the opposite

walls, for it is difficult to induce the air to move in a horizontal direction without some special means of suction. Corners of stagnant air are to be guarded against.

Darkness assists the development of fungus; whateven increases the temperature of the wood and stagnant air (within limits) also assists.

TO BUILDERS. ALEX. MACLEAN,

9 Victoria Street, Toronto,

Ofters to builders, on advantageous terms, lots on Elizabeth St., Westmoreland Ave., Spencer Ave., Shaw St., Wellesley St. and Spadina road.

To Builders, Investors and Speculators.

Ofters are invited to purchase that magnificent business site at the miersection of Dundas and Arthur streets and Ossington Ave. The lot has a frontage of too feet on Dundas and 120 feet on Arthur St., and is undoubtedly the best business corner west of Yonge St. Ofters to be sent to F. J. Smith & Co., Estate Agents, 90 Church St.

J. A. NESBITT, ESTATE AND FINANCIAL AGENT AND ARBITRATOR.

Office: D Adelaido St. Kast, - TORONTO.
Office Telephone 1631. House Telephone 3692.
Money advanced on mortgage. Fire insurance at lowest rates. Values carefully estimated.

W. PARSONS,

No. 4 ADELAIDE ST. EAST, TORONTO.

Estate, Loan and Builders' Exchange.

I make a specialty of builders' loans and builders' properties. Money to loan, Telephone 2636. W. PARSONS.

Prices of Building Materials.
