## Drug Reports.

### Canada.

Business is fairly good; orders are coming in more freely, and the prospects for a good fall trade are very promising. One feature of the month has been the advance of quinine, which, after remaining in a dormant state for months, somewhat suddenly advanced, and has steadily maintained it. Glycerine has been low for some time; has advanced from 2 to 3 cents per lb. We are informed low grade short weight are being offered. Cod liver oil has been offered very low; it seems a good time to buy. Castor oil has suddenly advanced, and is now held at 11 cents per case. Silver bar has gone down until it is being nearly offered at 50 cents on the dollar. Blood root is easier. Cascarilla bark higher. Gentian firm. Bronze and silver gelatines are 5 cents per lb. higher. Information from abroad confirms the reports that heavy chemicals all tend to higher prices. Many look on advanced prices as a bane, but remember we never have good times and low prices.

### England.

London, Eng., Aug. 27th, 1897.  
There is a decidedly improved tone in general business, and Canada is obtaining

its much-needed advertisement through the Laurier boom. Many firms are making inquiries as to the suitability of their specialties to the Canadian market. Drugs are quiet on the whole, although there is a good demand for cod liver oil, glycerin, and other "fall" lines. Quinine is firmer. Castor oil, olive, and linseed all quoted dearer, and the price for essential oils of aniseed, lemon, and bergamot are firmer. Kezanlik reports upon otto show a smaller crop than last year, but as there remains a good deal of old stock, little alteration is expected. Opium is dull. Menthol has improved, but nitrate of silver has, in consequence of the further fall in silver, reached a record price.
