BETTER THAN TONTINE.

About 12 years ago the tontine system of life insurance was introduced into Canada by four New York companies, all others refusing to resort to a system so much in the nature of gambling. One of the four has since become insolvent, and two withdrawn, leaving only one of the original four to solicit tontine life insurance, aided by an Ontario company which has recently taken it up.

Under the tontine system the full mutual rates are charged, but no profits given unless the party lives, and keeps his policy in force, during the whole tontine period—usually 10, 15 or 20 years. If the policy lapses from any cause it can neither be restored, nor any value whatever be obtained for it—all the money that unfortunate has paid in belonging to those who are there at the end of the period.

In return for agreeing to these extremely harsh conditions, (the very reverse of the beneficent Nonforfeiture System pursued by the **ÆTNA LIFE** Insurance Company in all its contracts) the assured is led to expect a perfect bonanza of results when the 10, 15 or 20 years are up. And indeed he ought to, in a game where experience shows the chances are that he will lose all the money he stakes. What game of chance would a man care to play for 10 or 15 hours even, putting up 10 or 15 fresh stakes, and running many chances of losing all he staked, if when he won, at last, he received no more than others were getting who had no risk to run?

WHAT ARE THE TONTINE RESULTS? A tontine company gives the following as a first-class sample:—

"Policy No. 53,653, for \$2,000, issued May 21st, 1870; endowment in 10 years; annual premium \$225.36. Total premiums paid, \$2,253.60. Matured and paid May 21st, 1880, the holder drawing in cash \$2,727.40, having also been insured for 10 years for \$2,000."

Observe: there was only \$2000 of insurance, even after the whole \$2,253.60 had been paid! Dying one day, or month, before May 21st, 1880, only \$2000 to come out for \$2,253.60 put in! And forgetting, or unable, to pay any one premium of the 10, all money staked would have been confiscated!

Now if Mr. Woodford had a 10-year Nonforfeitable Endowment in the **ÆTNA LIFE** for \$1500 (net premium, not \$225.36 but \$134.00 annually) he would have had to get only 6 per cent on the balance of the \$225.36 to yield a larger final result than the tontine by \$21.60! He needs only \$1500 to begin with, for the balance of the \$225.36 increases it, at 6 per cent, to nearly \$1700 at close of first year; to \$2000 at end of fourth year; and to \$2,650 at end of ninth year.

Average Insurance: \$2,175.00, against the tontine's \$2,000.00.
Final Result: \$2,748.60, against the tontine's \$2,727.40.
and more money back from the **ÆTNA LIFE** than paid in, if a business reverse had overtaken him at any step in the way, after the second payment, against an aggravating O from the tontine company in that case.
