Our Marine, Builders' and Contractors'

HOISTS

It hoists, lowers and holds the load entirely by steam, or either by steam or brake; is under perfect control by one single lever and movement, and the hoisted weight can be removed at any speed, or checked, as circumstances may require, by the same lever. They are so simple to handle that ordinary help can operate and do good work from the start, short practice only being necessary.

The JENCKES MACHINE CO. - Sherbrooke, Que.
