Macdonald College, Que.  
October 26th, 1933.

Professor T.G. Bunting,  
College.

Dear Professor Bunting:

I have had a letter from the Principal in answer to the one sent to him with copy of your letter of October 18th. He tells me that he was quite agreeable to the policy you suggested being adopted but that he expected it to be brought to his attention again. He does not remember Mr. Ward mentioning it to him and thinks you should have taken it up with me. Probably you assumed that you had done so in your letter of June 22nd but I did not think it in order for me to take any action on a matter with which I had had no contact, unless asked to do so by the Principal.

The Principal also expresses regret that you should have couched your reply to inquirers in such terms as to imply a reflection on the College administration. He says "a statement that 'no action had been taken or policy adopted' implies a reflection which, however true, loyalty to the College should have prevented him from advertising".

Yours faithfully,

Acting Dean.
