the members of nearly all the committees were engaged for several months in making adjustments.

Investment bouses were practically prohibited from engaging in any other business during the last three months of last year. Prior to the issues, those engaged were fully occupied in organizing districts and in selecting, training and supervising the work of over ten thousand canvassers who took part. Mr. Bradshaw points out that the entire remuneration of all the who took part. Mr. Bradshaw points out that the entire remuneration of all the professional houses engaged averages less than one-fifth of one per cent. He reports that, having gone over in detail the amount of remuneration allowed to each house and firm engaged, he is of opinion, having regard to the services rendered and the result obtained, that the remuneration was on a fair and real

the remuneration was on a fair and reasonable basis. Bank Pay is Small.

As far as the remuneration paid the banks, which played a vital part in handling the loan, is concerned, the average amount paid for each of the three thousand branches was three hundred dollars. For this renuneration all applications were receive

about ninety-five dollars each.

The problem of floating a Victory loan in Canada is quite different from that of floating a Liberty loan in the United States. Here we have a sparse population States. Here we have a sparse population, spread over a territory as large as the United States. The work of organization and canvassing is, therefore, more difficult. Besides, Canada has been four years at war, and skilled help is relatively scarcer. The United States has the federal reserve banks directly under government control, which organize the Liberty learn compagn, with the individual rty loan campaign, with the individual erty loan campaign, with the individual banks, some thirty-five thousand in number, each self-contained and under the general supervision of the federal reserve banks. The engagement of security dealers and financial houses in Canada has had the effect of stabilizing our Victory loan secruities, which now stand at a premium in Canadian markets. This in the United States is looked upon as a great achievement for Canadian finance.
