NATURE KNEW

how many teeth were needed when she counted out thirty-two. She didn't make any to be extracted. You need all of them—even that aching one—but you don't need the aching one, if taken early, it will prevent aches—if taken in time will stop aches—and if not taken until too late to save the tooth from extraction our modern dental methods make the operation easy and absolutely painless also.

Hamilton, June 30.—(Special.)—Officers for the ensuing year were elected at this morning's session of the Canadian Electrical Association's Convention in the new Royal Hotel.

Ottawa, June 30.—(Special.)—After the storm of last night came a calm this afternoon, and for more than two hours the House was treated to an instructive and interesting debate on tuberculosis, in both human beings and cattle, in the course of which Mr. Sifton's Doukhobors and Galicians came in for a little adverse criticism by Dr. Spruille.

At the opening of the House, Sir Wilfrid Laurier moved the resolution of which he had given notice that on Monday next, until the end of the session, Government business have precedence, opportunity being afforded for a debate on any subject.

Mr. Sifton's Doukhobors and Galicians came in for a little adverse criticism by Dr. Spruille, who declared that they were "rotten" with consumption.

The speech of Dr. Roddick, who brought up the subject, was a dignified and dispassionate utterance, and was listened to with the attention and respect which his high standing in his profession entitled him to, and although the speech of Hon. Sidney Laurier did not give much prominence to the subject, it was a dignified and dispassionate utterance, and was listened to with the attention and respect which his high standing in his profession entitled him to.
