The Question of Absorption

is a most important one for bakers, and one which should be seriously considered by all.

A strong, rich Flour, which absorbs a great deal of water, is more satisfactory, inasmuch as, pound for pound, it will make more bread than a weaker Flour, and with less trouble. Consequently it is more economical.

All bakers who are desirous of reducing their expenses and increasing their profits proportionately, should use our "FIVE ROSES" and "HARVEST QUEEN" brands. These are strong, rich, Manitoba Flours, especially suited to fill the requirements of the bakery trade, and which will be found more economical than any ordinary brands on the market.
