LURE OF THE STREET
Rev. A. B. Cohen, in an address before the Woman's Council of Halifax, last week, in his endeavor to present some solution of the problem which the lure of the street presents, said that no one doubted that the street had a lure—it was the same magnet that made the child impatient from the cradle, led him forth from the confines of his playground to the wider world without, and the same instinct that is in man himself that leads him to travel far parts of the world. The street was prepared to give a variety of sensations, and it was in a way a wholesome desire on the part of the young to explore and see. But just avoiding amusements for the sake of pleasure was ignoring the fundamental solution.

The Best Quality at a Reasonable Price
Have YOU Perfect Sight?
Perfect sight means something more than that you see clearly. It means that the eyes are of normal, perfect shape, that the vision is clear and distinct at all distances, and that there is no strain in the act of seeing.
You may see clearly, and yet your sight be imperfect. If you see clearly and have headaches, or if your eyes feel strained or tired, the probabilities are that there is some defect in your eyes that is causing the strain or the headache.
Better have an examine your eyes. If there is need of glasses we will prescribe the correct lenses. If you do not need glasses we will tell you so.

THE SUN IS shining; folks look gay now, rubber boots are thrown away; but for the spring just let me say: You'll need good boots. Try Brindley's waterproof, working boots and repairs 227 Union. Phone 161-41.
Damage to the extent of between \$7,000 and \$8,000 was done early this morning when the large wooden structure on Fort DuRoi, owned by the C. P. R. and leased to Kenneally and Wetmore, was destroyed by fire. Three thousand empty barrels and about a ton of hay were in the building at the time of the fire. The origin of the fire is a mystery. It was discovered shortly after midnight, but on account of the fact that the windows and doors were so heavily fastened and shuttered it is thought the fire was smouldering for some time. The west side department responded to an alarm from box 219 and one of the C. P. R. locomotives also assisted in preventing the flames spreading to adjacent property.

RECENT DEATHS
Mrs. Andrew W. Robb.
The death of Mrs. Andrew W. Robb, formerly of this city, occurred yesterday at the home of her parents in Halifax following an illness of more than a year and a half. She is survived by her husband who, until after her illness, was secretary of the Y. M. C. A. here, and three small children, Marion, Jean and Stuart. Before her marriage she was Miss Helen Dennis, of Halifax, and is survived by her parents, Senator and Mrs. William Dennis, four sisters, Misses Clara, Agnes and Sara, and Mrs. Frank Morton, and two brothers, Eric and William, as well as her grandmother, Mrs. Dennis, all of Halifax.
In addition to the many here who will learn of her death with sincere regret Mrs. Robb had a large number of friends in Charlottetown and Sydney where her husband was engaged in Y. M. C. A. work before coming to St. John.
While in St. John Mrs. Robb was actively engaged in the work of the Ladies' Auxiliary of the Y. M. C. A., the Presbyterian W. F. M. S., the Women's Council and the Women's Canadian Club.
The funeral will take place on Wednesday afternoon and the interment will be in Halifax.

BUILDING AN 8000 CHIMNEY IN SEVEN DAYS
(Engineering News)
This quite unusual feat was recently accomplished by a St. Louis construction firm.
The chimney was built on the company's system of reinforced steel and concrete with a re-erect-concrete foundation. The company informs us that the chimney was actually built, including its foundation, in seven days' working time and was completed and put in service just sixteen days after the receipt of the order. During its construction there occurred, moreover, the heaviest snowfall recorded in ten years in St. Louis, and the temperatures were at no time higher than 20 deg. F. when the work was

started in the morning. The sand was heated before mixing and the tile was heated before placing. Fires were kept in the chimney constantly with all openings closed. The chimney has a total height of eighty-five feet and is three feet in inside diameter.
THE COST OF SMOKE
(Power)
For the benefit of any who may not see the analogy between a robbed coal pile and a smoking chimney, it may be briefly and simply explained. The visible part in smoke is nearly all carbon, either as soot or cinder, and carbon is the principal combustible part of coal, i. e., the useful part, the part capable of yielding heat. Carbon completely burned forms an invisible gas, carbon dioxide, therefore, whenever the gases from a stack show black they contain carbon, which indicates that complete combustion has not taken place in the boiler furnace. In other words, all of the available heat in the coal has not been realized. It is the same as though the corresponding part of the coal fed into the furnace had been thrown away, for, although it has passed through the furnace, it has been thrown away up the stack beyond recovery. It is this, then, so very different from robbing the coal pile!
The owners who, through ignorance, allows conditions to exist which are not favorable to the most economical operation of his boiler furnaces, although he is unwittingly robbing himself, is nevertheless stealing from his own coal pile.
In order to baptize a class of twenty-three in a local pond in Harlow, Pa., cut through 17 inches of ice making a hole fifteen feet long by 5 feet wide in which the converts were immersed.

Thin Blood is Poison To the Nerve System
Headaches, Irritability, Sleeplessness, Discouragement Result—Dr. Chase's Nerve Food the Great Restorative
A nervous temperament may be inherited, but nervous troubles only come when the nerve centres fail to derive nourishment from the blood. Under ordinary circumstances the loss caused by wear and tear on the nervous system is restored by the nutrition contained in the blood.
When the blood gets thin and watery the nerves are starved and poisoned, and troubles of a serious nature appear. Brain fog, headaches, sleeplessness, irritability, low spirits, and discouragement are among the symptoms of a starved nervous system.
There is nothing like Dr. Chase's Nerve Food as a means of forming new, rich blood.
Through the blood stream nutrition is carried direct to the nerve centres, and is converted into nervous energy. Every beat of the heart, every breath of the lungs, and all the functions of digestive and other vital organs are dependent for life and energy on the nervous system.
Consequently the whole system is benefited when health and vigor are restored to the nerve centres.
The nerves of the stomach resume their functions and digestion is improved. The appetite sharpens, the liver, kidneys, and bowels gain strength, and the blood derives further nourishment from the food taken into the body.
Dr. Chase's Nerve Food is reconstructive and upbuilding in its influence, and therefore of lasting benefit. Fifty cents a box, 6 for \$2.50, all dealers, or Edmanston, Bates & Co., Limited, Toronto.
