### Raising Food Standards

Advertising is playing a wonderful part in the raising of food standards because it has opened the way for distributing standard brands of assured quality.

Article for article, the advertised food products are of better character than the unknown kind. They are kept to a fixed standard all the time.

Food products advertised in this newspaper are deserving of confidence; and the stores which specialize on these brands and comperate with the manufacturers in giving them distribution are well worthy of your confidence.

In a sense the advertising columns of a reliable newspaper are a guide to good health. a guide to good health.
