### PRACTICAL HEALTH HINT.

**Bright's Disease.**  
Bright's disease is a silent, hardworking enemy, and the victim himself may not know that he has it until it has gone so far that he is incurable. It is easily detected by a test of the urine, and if it is caught in its beginning its destructive force can be held to a minimum throughout the natural life of the victim. When urinalysis shows an excess of uric acid and albumen the presence of Bright's disease is determined, but both the albumen and the uric acid may be decreased by the adoption of an intelligent diet, the selection and consumption of those foods that yield the least of these two elements. Such foods are grains, fresh and dried fruits and fresh vegetables. Meats should be let alone, because they favor the increase of uric acid, and there are some vegetables, like asparagus and mushrooms, that contain more uric acid than meat.

### SOLITARY LIFE IN JAIL.

It Has Finally Wrecked the Mind of Jesse Pomeroy.

That Jesse Pomeroy, the solitary life prisoner at Charlestown prison, has at last broken mentally under the strain of his years of confinement, became evident during the recent visit of Governor Walsh to the institution. When the governor, in his inspection, stopped before the cell in Cherry Hill and the guard drew aside the iron shutters which had cut off Pomeroy from all communication with even the rest of his prison world, a strange thing occurred.

Pomeroy for the first time that he had been brought in contact with a chief executive since his imprisonment did not ask for a pardon or protest his innocence. He instead told the governor that he had a bank book he wanted to send his mother, but could not do so because of red tape.

Officers at the prison for some time have known that Jesse has considered himself immensely wealthy. The governor asked Pomeroy where the bank book was, and Pomeroy replied that it was in the prison office. He further said that he had written to the prison authorities about the bank book several times, but had received no satisfaction. The governor promised he would look after the bank book.

For thirty-six years Pomeroy has been kept in solitary confinement, and many alienists have given opinions regarding what effect it would have upon his sanity. It is now believed that Pomeroy has weakened mentally under the strain.—Boston Post.

### WAR CORRESPONDENTS.

Tests They Must Pass Before Uncle Sam Allows Them in His Army.

Nor is it an easy matter to secure the privileges of a war correspondent with the United States army in the field. First, the applicant must present proper credentials from the publication he represents with a photograph as well as an account of his career, stating the nature of the work he is expected to do at the front and certifying to his trustworthiness as a newspaper man and his personal fitness to accompany the army.

With this must go a certified check of \$1,000, payable to the adjutant general of the army, which is to cover his expenses of equipment and maintenance. He must also give a bond of \$2,000 to guarantee his living up to all of the rules of the army. If these are violated the \$2,000 is to be payable to any charity which Secretary Garrison may name. The correspondent must also take the military oath of loyalty to the United States and agree to abide "in letter and in spirit" by all the regulations of the army.

Specific precautions are taken to keep out adventurers, and only men with bona fide credentials and actual newspaper careers are to be admitted to these privileges.—Oswald F. Schuette in Leslie's.

**Building on the Field of Waterloo.**  
When the centenary of the battle of Waterloo is celebrated next year visitors to the famous field will find that it has largely lost its rural appearance, as it has become a favorite site for building of country villas. There are no fewer than fifty now on the field where Napoleon met his doom, and many of them are built on the very spots that were occupied by the combatants. The field is an ideal situation for country retreats. The completion of good motor roads from Nivelles and Charleroi has done much to stimulate villa building.

### Milk in Greece.

The principal sources of milk supply in Greece are sheep and goats. It is reported that the sheep on the island of Scopello drop two and often four lambs. The milk yield often reaches two to five pints per day, especially the first three months after lambing. There are about 3,000,000 goats in Greece. The indigenous mountain breed gives but little milk, while Maltese goats give from three to five pints per day.

### County Names.

Thirty-one counties in the United States are named Washington, twenty-four Franklin, twenty-three Jefferson, twenty-two Lincoln, twenty-one Jackson and yet Americans are sometimes charged with originality.—New York Sun.

## TORTURED BY CONSTIPATION

"Fruit-a-tives" Cured Paralyzed Bowels and Digestion

ST. BONIFACE DE SHAWINIGAN, QUE.  
Feb. 3rd, 1914.

"It is a pleasure to me to inform you that after suffering from Chronic Constipation for 2 1/2 years, I have been cured by 'Fruit-a-tives'. While I was a student at Berthier College, I became so ill I was forced to leave the college. Severe pains across the intestines continually tortured me and it came to a point when I could not stoop down at all, and my Digestion became paralyzed. Some one advised me to take 'Fruit-a-tives' and at once I felt a great improvement. After I had taken four or five boxes, I realized that I was completely cured and what made me glad, also, was that they were acting gently, causing no pain whatever to the bowels. All those who suffer with Chronic Constipation should follow my example and take 'Fruit-a-tives' for they are the medicine that cures."

MAGLOIRE PAQUIN

"Fruit-a-tives" are sold by all dealers at 50c. a box, 6 for \$2.50, trial size, 25c. or sent postpaid on receipt of price by Fruit-a-tives Limited, Ottawa.

## PATRIOTISM and PRODUCTION

# The Empire's Call to Farmers

"Approximately twenty million men have been mobilized in Europe. A large proportion of these have been withdrawn from the farms of the countries at war. Even in neutral countries large numbers of food producers have been called from the land to be ready for emergencies. It is difficult for us to realize what will be the effect on food production through the withdrawal of several million men from all the great agricultural countries of Europe. These millions cease to be producers, they have become consumers, worse still, they have become destroyers of food."

HON. MARTIN BURRELL, Minister of Agriculture.

Britain must have food—food this year, and food next year. Britain is looking to Canada to supply most of that food. We are sending our surplus now, but we must prepare for a larger surplus this year and next year. Patriotism and Production must go hand in hand.

Because of this need of the Empire for more food, and the call to Canada in that need, the Canadian Department of Agriculture has arranged for a series of Conferences throughout the Dominion with the object of giving suggestions as to the best ways of increasing production of the particular

products needed at this time. At these conferences agricultural specialists, who have studied agricultural conditions and production throughout the world, and the best means of increasing agricultural production in Canada, will give valuable information and suggestions to the farmers, live-stock men, dairymen, poultrymen, vegetable growers, and other producers of this country. The Canadian Department of Agriculture urges you to attend as many of these Conferences as possible, also to watch for other information on the subject that will be given in other announcements in this newspaper.

### ATTEND YOUR CONFERENCE

## Put Energy into Production of Staple Foods

The Government does not ask farmers to work harder, so much as it urges them to make their work more productive, and to produce those staple foods that the Empire most needs and that can be most easily stored and transported.

Europe, and particularly Britain, will need the following staple foods from Canada more than ever before:—Wheat, oats, corn, beans, peas, Beef, mutton, bacon and ham. Cheese and butter.

Poultry and eggs.

Vegetables, such as potatoes, onions, and turnips.

The larger the yield of these staple food products, the greater the service to the Empire. Germany in the last ten years has doubled the average yield of the majority of her field crops largely through better seed, thorough cultivation and use of fertilizer. And while the Empire's armies are busy putting down German Militarism, let us at home appropriate the best of Germany's agricultural methods for the Empire's advantage.

The Government urges farmers, stockmen, dairymen and other producers to make a wider use of the Free Bulletins issued by the Canadian Department of Agriculture. Clip out, fill in and mail the coupon below and get a list of these bulletins. Then select the bulletins that will be of value to you—Mail your coupon right now. Do not put a stamp on the envelope. Your coupon will be "On His Majesty's Service."
