Memorandum to Mr. Warren

Re - Stone-Chilco Joint Irrigation
System, Big Creek Intake.

Under date of August 11th Mr. Engineer Archibald advises that repairs are required to one of the gates on Big Creek intake.

As this is a matter of maintenance, I am requested by W.E. Ditchburn, Commissioner of Indian Affairs, by telephone, to have this matter looked into and suggest that you consult Mr. Cosen Spencer, the other joint owner, with a view to having these repairs made immediately. The Department of Indian Affairs is prepared to pay for one-third of the cost of necessary repairs which may be carried out either by Mr. Spencer or yourself.

In connection with necessary expenses for material and labor for repairs on above system, you will kindly obtain bills in triplicate for all material required and certify same before handing to Indian Agent MacLeod for payment, as we have no funds to pay for repairs on this project.

C.E. Webb
District Chief Engineer
