THE CANADIAN THRESHERMAN AND FARMER

June, '18

It was decided to call the ward the "Country Women's" under the auspices of the H.E.S., as so many who were not members had contributed. The linen is to be stamped C.W. At this meeting twelve members pro-mised a dozen fresh eggs to fill the crate for the Secours National, Winnipeg. The eggs when sold brought \$4.20. An effort is being made to have more

will encourage us to go on with the work

of the H.E.S. By the way I think the name that we have could not be more suitable than it is at present for an organization and the societies should not think of changing it until the war is over and perhaps not then.—Yours sincerely, Mrs. J. R. Borthistle, Sec.-Treas., H.E.S.

Swat the Fly

Swat the Fly THE best means of fly 'control is through preventing them from breeding. It requires ten days adult, so if all barnyard manure and other filth in which it can develop is cleaned up every five or eight days, the flies' supply will be cut off. If it is impossible to re-move the filth far enough so that the flies which breed in it cannot reach the house with be cut on. If it is impossible to the flies which breed in it cannot reach the house or barns, it may be treated with powdered borax sprinkled over the manure pile or other filt at the rate of about an ounce for each cubic foot to be treated. After it has been sprinkled on, it should be washed through the pile with water. Half a pound of Helebore which has been allowed to stand in ten gallons of water from ten to twenty-four hours may be sprinkled at the rate of a gallon to the cubic foot on the filt to be treated. In either barns or houses fly-traps help a little and a great deal of relief may, be obtained by mixing half a pint of milk, half a pint of water, and two tablespoons-ful of formalin (40 per cent formaldehyde). Stronger mixtures have so much formalin

in them that the flies do not drink it. A slice of bread may be placed in the plate in which the mixture is exposed. Cows may be protected by means of commercial or home-made repellants. Pyrethrum powder is good and the com-mercial repellants are generally preferable if they do not cost too much. Home-made mixtures of either one part of erude carbolic acid or pine tar with nine parts of cotton seed oil give very good results if applied lightly, but if applied too heavily they will injure the skin and hair and do more damage than the flies will.

They Were Unfamiliar

"Bliggins' small boy says a great many bright things." "He uttered his masterpiece the other evening in the presence of a large com-

pany." "What was it?"

'Father, where do you get all 'He said the funny things you tell people I say

Seed Growing a Profitable Side-line How to Raise Onion Seed

How to kase Onion Seed THERE are three reasons for raising your own seed. First, you cannot always depend on the seed houses to furnish reliable seed. Second, onion seed costs from \$1.25 to \$2.50 per pound. It could be saved with a very little trouble. Third, one has a chance the cultivate a variety of his own and establish a reputation as a seed producer, which, in the years to come, may bring more cash than the onions he raises. The glower will patronize a home seed concern glower will patronize a home seed concern that he knows is reliable before he will a

Selecting the Mother Onions

At screening time in the fall, pick out the most solid, globe-shaped, deeply colored onions of whatever varieties you want for your next crop. Large, or medium-sized ones are best. Estimate the ed required to sow your crop. It takes 1 We

A COMPLETE ANSWER Fair Hostess (entertaining wounded soldier)—"And so one Jack Johnson buried you, and the next dug you up again and landed you on the top of a barn! Now, what were your feelings?" Tommy—"If you'll believe me, ma'am, I was never more surprised in all my life."

41/2 to five pounds to the acre and one bushel onions will produce three pounds of seed on an average. Always sow a few more for safety. Keep these in open crates in the cellar

Identifying Him

Ordinary concerts have grown rather stale in Middleton, where everybody sings,

state in Middleton, where everyoody suge, or thinks he can. So a novelty was arranged, in which each performer was to appear in a fancy dress and sing a suitable song. The first items went off very well, although when the astronometer in a simple gridish Items went on very weil, attaougn when Miss Antike came on in a simple, girlish gown and sang "For Ever and For Ever" the audience got nervous and thought she meant to 20 so. Then the village crier appeared in a sailor rig and declaimed "Asleep on the Deep" in a voice high-pitched and crucked

Deep" cracked.

cracked. "Who is he?" "What character does he represent?" were the questions the listeners asked each other wildly. Then came the usual voice from the rear of the hall, saying: "Why, 'e's Sing-Bad the Sailor."
