About Heating

**FREE**

Let us plan the heating for your new home. Get the benefit of our expert knowledge and years of experience in building and installing

## The "Hecla" Furnace

With The Fused Joints

On receipt of a rough plan of your home, we will make you a complete heating system—give you the size of furnace and pipes required—with an estimate of the entire cost. This is absolutely free of charge.

We will also send you our latest catalogue, giving detailed descriptions of the "Hecla" Furnace—the furnace with the Fused Joints, Individual Grate Bars, Steel Ribbed Firepot and other exclusive features. Write for free copy.

Clare Bros. & Co. Limited, Preston, Ont.

## IT PAYS

to make your stock comfortable. They will thrive and make more milk on less feed if you equip your stables with U BAR STANCHIONS and ACORN COWBOWLS.

U BAR STANCHIONS are strong enough to safely hold the most restless animal. They are very easy to operate.

ACORN COWBOWLS are the only perfect watering device. They require no float tank and the piping may be either above or below the stall. Cows may drink whenever they wish, there is no need to turn them out to drink from a frozen trough. They will soon earn their cost by increasing the profits from your herd.

## THE BT STANCHION

is worth writing about for you can untie your stock QUICKER with it and WITH GREATER EASE than with any other stanchion. It is the only stanchion that can be opened no matter what pressure the animal may be putting against it.

Let us tell you more about it and what that chain is for in Fig. 91.

We also build Steel Stalls, Litter Carriers, Feed Carriers, Hay Carriers, Forks, Slings, etc.

## QUICK ACTION IN HARVESTING MAKES CORN FODDER ALMOST AS VALUABLE AS THE EARS

THERE is a right moment to begin—just as the ears begin to glaze. That's when you get the sweet, nutritious juices in stalk and blade which make the dry fodder almost as valuable a growing or fattening feed as the ears themselves.

And you must not be too long about the work. You must get it all cut and in the shock quickly or the fodder-stalks, pith and blades—will degenerate into a tasteless, woolly fiber which most farmers count nearly worthless.

## USE AN I.H.C. CORN HARVESTER

The Time and Labor You Will Save and the Extra Value You Get Out of the Fodder Will Soon Pay for the Machine.

You have the choice of four excellent machines. All you have to do is to drive straight along through the field with a Deering, McCormick, Milwaukee or Osborne binder. They will cut and bind the corn into bundles and deliver in piles ready for shocking.

At shredding time you will find it an immense advantage to use a Deering, McCormick or Plano husker and shredder. Any one of these machines will save you more than half the time and labor you now consume in husking, and will thoroughly shred the fodder and reduce it to a condition so that it will be eaten by your stock.

International local agents will supply you with catalogs of the machines they sell and explain how they will make and save money for you, or you can write direct to nearest branch house.

It is to your interest to call on them and investigate the matter.
