SAYS GERMANY HAS OIL ENOUGH FOR TWO YEARS

Reported to Have Big Stocks of Gasoline on Hand at Beginning of War—Now Has Sufficient to Last For Next Two Years—Quantities Purchased in August—Has "Iron Stock"

Two years supply of gasoline is at present on hand in Germany. Even though all future supplies were cut off, she could hold out this long, at least. This is the most interesting statement made by the Rotterdam correspondent of the National Petroleum News, of Cleveland, Ohio. Regarding Germany's present oil supplies the correspondent says, in part: "To begin with, Germany has her 'iron stock,' the meaning of which is, that over and above the average military stocks, the marketing and distributing companies must always keep a certain minimum quantity in their storage tanks under agreement with the German Government. "It so happened on the outbreak of the war that stocks in hand, besides the 'iron stocks,' were considerably above the average, and these were augmented by at least eighteen or twenty thousand tons, (close to 5,000,000 gallons), which were immediately rushed across the border from Holland during the first few days following the declaration of war. The import duty was at once removed and certain concessions granted in connection with transport rates; a good price was paid for the spirit (gasoline). At the same time Germany was equally active on her southern frontier. The average railway rate from Roumania to Germany is something between 417 and 320 a ton, and this was immediately reduced to 110, and in some cases less. In the early stages of the war large quantities of mineral products and especially spirit were rushed to Germany from the Roumanian fields, and although the Government is supposed to have stopped or at least reduced these exports to a negligible quantity, it appears that this quantity is still finding their way into Germany, particularly from the Steaua Romana and other German-controlled interests. "I understand that even if all future supplies were cut off, Germany has sufficient motor spirit to satisfy

LOWER PRICES WOULD LEAVE PROFIT ON PLANTATION RUBBER.

Boston, Mass., February 4.—C. H. Sprague & Son have just placed an order with the Crowell & Thurlow Steamship Co. for the building of a new 7,000-ton collier to be a sister ship to the collier Edward Pierce, placed in commission two months ago. The new collier is to be built at the Newport News Shipbuilding Co. plant, and will ply between Hampton Roads and the various coal wharves of C. H. Sprague & Son at Boston, Providence and Searsport, Me. It will be launched in September. The collier Edward Pierce soon after being placed in commission was chartered from the Sprague interest at attractive rates for trans-Atlantic service, and has just completed unloading a large cargo of cotton, wool, etc., at Copenhagen from which port she was due to sail yesterday for this country. In the past three years New England capital has invested in four new steamers built by, or contracted for, through the Crowell & Thurlow Steamship Co., a Boston concern.

COL. WILSON ATTENDS PARLIAMENT.

Col. E. W. Wilson, commanding officer of the Fourth Division, has left for Ottawa to attend the opening of Parliament and the state dinner this evening.

requirements of both the military authorities and private users, for not less than two years. "With refined oil her position is not nearly so good. As things have been arranged, however, it is reckoned that for government purposes there are sufficient stocks to last two years, but in figuring this out, the needs of the community at large have been considerably cut down. By government order no seller is allowed to sell more than half a litre (barely a pint) per day to each private consumer. The position is practically the same with lubricating oils, and if possible an even stricter watch is kept on its use. There is no doubt that Germany is a bit shy on lubricating oils, and the stocks she was able to confiscate in Antwerp were virtually a god-send. While a good part of the Antwerp stocks were successfully shipped—mostly to England—before the fall of the city, I understand that the quantities the Germans were able to sequester were pretty considerable."

BARGE CANAL BONDS.

Albany, N.Y., February 4.—State Controller Eugene M. Travis, will advertise to-morrow for bids for \$6,500,000 in canal bonds at four and one-quarter per cent. interest.

Bills introduced in the Legislature provide that the State may sell canal bonds at a rate of interest up to four and one-half per cent, instead of for four and one-half per cent, as the law now provides. A saving of \$50,000 a year for 50 years will be effected by the passage of this bill.

REA MINE CO. PAYS LARGE DIVIDEND.

A dividend of \$12,750, or 8 1/2 per cent. on the 200,000 issued shares is declared by the Rea Mine Company, which represents a portion of the profits for the past twelve months. The property was only provided with a 10 stamp amalgamating mill, which cost \$5,000, with no cyanide installation, and was looked upon as a very doubtful venture by mining men, who considered expensive equipped mills in Porcupine the only ones likely to pay.

BAR SILVER HAS SHOWN A REMARKABLE STEADINESS.

New York, February 4.—Bar silver, whose prices fell so sharply at the opening of the European war, has shown a remarkable steadiness since the beginning of 1915. The average for the 25 business days in January at London was 22 1/2 pence. The highest in January was 22 15-16d. and the minimum was 22 9-16d. at the opening of the month. The closing quotation of 22 1/2, ruled for the four final days of the month without change. Monthly average prices for the past five years compare as follows:—
1914. 1913. 1912. 1911. 1910.
January 22 9-16 22 15-16 22 15-16 24 1-16 24 1-16
February 22 9-16 22 15-16 22 15-16 24 1-16 24 1-16
March 22 15-16 22 11-16 22 11-16 24 1-16 24 1-16
April 22 15-16 22 7-16 22 7-16 24 1-16 24 1-16
May 22 15-16 22 7-16 22 7-16 24 1-16 24 1-16
June 22 15-16 22 7-16 22 7-16 24 1-16 24 1-16
July 22 15-16 22 7-16 22 7-16 24 1-16 24 1-16
August 22 15-16 22 7-16 22 7-16 24 1-16 24 1-16
Sept. 22 15-16 22 7-16 22 7-16 24 1-16 24 1-16
Oct. 22 15-16 22 7-16 22 7-16 24 1-16 24 1-16
Nov. 22 15-16 22 7-16 22 7-16 24 1-16 24 1-16
Dec. 22 15-16 22 7-16 22 7-16 24 1-16 24 1-16
Prices at New York were as steady as those of London, about the 49-cent line. The maximum of 49 1/2 cents was the exception; the average for the month being nearer 48 1/2, at which the month opened. London reports by mail that the high price for Mexican dollars during the month was 37 1/2, the 14th ultimo. India had taken \$252,000 of bars, compared with \$180,000 in the same period last year. No shipments to China were recorded. A rather demand from the Continent and India led to rather free disposals and firmer prices resulted. London's exports to the far East in 1914 were \$5,712,000 compared with \$10,875,000 in 1913 and \$18,872,500 in 1912.

ONTARIO POWER COMPANY.

The annual general meeting of the shareholders of the Ontario Power Company of Niagara Falls, will be held at the head office of the company in the city of Niagara Falls, Ontario, Canada, on Tuesday, the 16th of February, 1915, at the hour of eleven o'clock in the forenoon. The head office of the Swift Canadian Company, Limited, has been moved from Winnipeg to Toronto.

EDUCATIONAL FACTS WILL BE GIVEN AT ROADS CONVENTION

Representatives of Several Provincial Governments as Well as Large Attendance of Engineers and Various Societies Expected.

Arrangements are being completed for the second annual Canadian and International Good Roads Convention and Exhibition, which will be held in Toronto, at Convocation Hall (University Grounds), March 22, 23, 24, 25 and 26. Spaces are now being allotted. Apart from the stimulus given this Dominion Convention, due largely to the success which attended the first convention of this nature in Canada, and which was held in Montreal last spring, a feature of special interest is that this year's convention has been arranged under the joint auspices of the Dominion Good Roads Association and Ontario Good Roads Association. In addition the support of other leading good roads organizations throughout the Dominion of Canada and United States have been enlisted. Several of the Provincial Governments will be represented at the Convention and are taking an active interest in the matter. The committee will depart to some extent from the usual style of lecture, which has been delivered at most of the conventions held in the United States and Canada during the past, reiterating the necessity for better roads. Taking it for granted that the public is unanimous for road improvement, the committee will therefore undertake the meeting in a clear and concise manner all available cost data and facts on the practical side of road considerations, location, standard of financing, traffic conditions, location, standard types of foundations and their cost, wearing surfaces and their cost, maintenance, machinery, bridges, culverts.

Invitations are being forwarded to all parts of the Dominion and with the co-operation of Government representatives, engineers, county and township councils, Board of Trade, agricultural societies, engineering societies, automobile clubs, manufacturers' associations, an important and representative gathering of delegates interested in the good roads movement is assured from all parts of the Dominion.

GOVERNMENT OF CANADA CONTINUE IN

Cloths, Rugs and Blank Manufacturers Busy—Contracts are Exp

MILLS ARE CONF

Dutch Have Asked For Exchange Munge For Dutch Rags—Rag Advanced to Record Prices—facturers Refuse Orde

(Special to The Journal of Commerce) Duesbury, January 22.—(By mail) orders continue to absorb most of the market, but generally speaking, coming forward at all well and, to this class of business is being disengaged. As to further contracts but no all seem to be confident of more business.

In its issue just to hand, the York Daily News report says:—The situation with respect to rug sales is gradually becoming acute, reached that stage already if it were that natural wool is used in such for military fabrics, thus reducing the extracted varieties. Difficulties are so great that practically no rugs from France, and all other Continental supply are cut off by the prohibition the countries concerned. American goods are dear, and when the high are added the prices demanded are One of the leading local firms of have approached the Board of Trade of the prohibition of the export of rug. They have furnished the Board with from two important Dutch exporters appears that the export of Dutch rug is that the exportation of similar rug is that "scarcely any rug is admitted to be used for English goods; hence the withdrawal of the p not make an iota of difference to the departments," and suggest that a spectator should make inquiries at the as to the accuracy of this contention. The present state of affairs has c to go up to a record height, and unless are relaxed it is probable that, with all Continental rug will disappear tioners' catalogues. Since last August military old cloth has risen fr per cent. Dutch rose stockings from more, and indigo blue military cloth Dutch stockings from 42s. to nearly 8 results is that shoddy and mungo ma having to refuse orders and the bran which they are engaged are becoming
