Smooth Out the Ruts

How soon will your roads, that now take the heart and soul out of every man and horse that uses them, be made into a continuous stretch of road that you and everyone in your county will be proud of?

How soon will you stop filling the ruts and mud holes with your road taxes, and build roads that will permit you to put your road taxes into more good roads?

Concrete Roads

cost no more to build than any other good road, and their upkeep expense is practically nothing, which makes them the cheapest kind of good roads.

Concrete roads benefit the farmer, consumer, merchant, newspaper, board of trade and railroad. They make for greater prosperity generally, by increasing land values and production; bringing more trade; more industries; more employment; greater traffic. They decrease the cost of marketing. All of these factors combine to decrease the cost of living.

Every citizen owes it to himself to investigate the advantages of concrete roads and learn how they will directly benefit him. This information is free for the asking. Write for to-day to

Potato Planter

Profitable for the large or small grower. Plants potatoes at lowest possible cost. One man operates it. Opens the furrow—drops the seed any distance or depth required—puts on fertilizer (if wanted)—covers up—marks the next row. Accurate, automatic and dependable. Sold with or without Fertilizer Attachment.
Here's why you should select the Eureka Potato Planter—Furrow Opening Plow is directly under the axle—that means uniform depth at all times. The seed drops in sight of driver. Steel and malleable construction makes long life and few repairs. Made in three sizes—for one or two rows. We also make the Eureka Mulcher and Seeder.
