THE FRENCH DRAFT ASSOCIATION.

In one of your issues of last month was a note about the registration of Percheron horses but the name of the French Draft Horses Association does not appear. What is that society, and what are the certificates delivered by them worth (in regard of Percheron horses)?

Maple Creek, Sask.

D. I. M.

Ans.—This association sprung into existence owing to the fact that some of the draft horses of France were not eligible for registration in the Percheron stud books. The certificates issued by this association are recognized by the U. S. government. Registration in this association is more or less of an admission of a blending of families rather than an indication of a line of breeding within certain tribes.

CLOVER, TIMOTHY AND BLUEGRASS.

Do you think timothy and clover do well here, also Kentucky blue grass? My land is somewhat light and I would like the timothy for hay and blue grass for pasture.

Sask.

I. K.

Ans.—We think it is only a matter of acclimatizing clover in order to get it to produce a crop. Naturally the first year it is sown in a climate so different from that in which the seed grew a large proportion of it kills out but there is always some that survive on the most unfavorable localities. It has been grown at the experimental farm at Indian Head for years and we think could be induced to grow on the Soo line with a little coaxing especially if the seed were brought from Dakota or Minnesota. There should be little difficulty in getting a catch of timothy if the rainfall is up to average seasons. A light coat of manure in winter would help along a catch of either clover or timothy. There is a sort of native blue grass found in the west but as yet we are not aware of its seed being placed on the market. The variety grown in the central states has not been introduced to any extent up here.

ADVICE.

An old farmer said to his sons: "Boys, don't you ever spekerlate or wait for somethin' to turn up. You might jest as well go sit down on a stone in the middle of a medder with a pail 'twixt your legs and wait for a cow to back up to you to be milked."

SOME 'IRISH' LORE.

The latest novelty in vegetables is a black potato, which has been sent to Messrs. Sutton, the famous seed merchants of Reading. This eccentric tuber came from the Congo, and is said to have an excellent flavor. It is especially recommended for ornamental cookery and in salads.

The word "potato" is a corruption of "batata," the original and correct name,

A newspaper man once essayed to write an agricultural item and said, having in mind the Darwinian theory, that, if the farmers persisted in removing the horns from their cattle, in the course of time all cattle would be born without horns. He was embarrassed when we asked him if he had ever seen a calf born with horns.
