

PERCY'S PUZZLED! WANTS Your Help!!

\$510.00 in Cash Prizes to be Awarded

MARY'S letter is surely a puzzler. She has so mixed up the letters in the names of things she would like Percy to give her for her birthday gift that they spell something different entirely. Sometimes she has even made two or three words out of one name, as in number nine, which is undoubtedly "Diamond Ring."

Each of the names in Mary's letter represents a present that any girl would like to receive for her birthday. You know one of them; now try to solve the remaining names, and when you do, re-write Mary's letter, substituting what you consider the correct names and send your solution to us. In this interesting contest we will award

Fifty Cash Prizes of \$1.00 each

PERCY'S PLAN WILL HELP YOU. THE first thing Percy did was to walk through the stores and make a list of all the things that would make nice presents for a girl, so that he could compare his list with Mary's and see how many names would fit the puzzling words. He was surprised to find the number of nice things one could get for a girl, for very soon his list contained the following: Sewing set, umbrella, wrist watch, silk waist, manure set, jewel case, kid gloves, lace handkerchiefs, napkin ring, earrings, silver thimble, diamond ring, candy, photo frame, necklace, books, bracelet, slippers, card case, travelling bag, purse, brooch, shawl, toilet set, perfume, flowers, set of fans, hair collar, etc., etc. These suggested presents may help you. Get a pencil and paper and try!

How to Send Your Answers

USE one side of the paper only in writing out Mary's letter and keep it the same in form as given above, merely substituting your solution of the proper names in place of the jumbled ones. In the lower left hand corner instead of the postscript put your full name (noting Mr., Miss or Mrs.) and your full address. Anything else must be written on a separate sheet of paper. Do not send letters, drawings or typewritten answers. A contestant may send as many as three sets of answers. The puzzle will only be sent once with a prize and not more than one prize will be awarded in any family. Entry to the contest is barred to all employees of this Company and their relatives.

science of prevention of disease were understood and applied.

2. Economy.—Every home should have installed a modern scheme of cost-finding, cost keeping and cost-reducing. Personal expenses on a scientific budget basis. Mother doubtless wastes a little, but father is apt to waste more, and the children are sure to waste most. Why reform mother exclusively?

3. Beauty.—Home discord is largely the result of discordant surroundings. The sensory nerves should be soothed in the home. They are more often irritated.

4. Productivity.—The home is fundamentally a social unit. The business of it, therefore, is to enable each member of the family to do more and better work in the community. For this purpose, physiological, psychological and industrial principles should be taught and embodied in the household. Are you improving the quantity and quality of your vocational output by at least ten per cent. every year? If not, something is wrong with your home.

5. Hospitality.—By this word I do not mean card parties, pink teas or pay-your-debts functions of any sort. I mean just a handshake with some heart in it, an open home door. A test for your hospitality is that the fellow you invite never thinks what or how much you are going to give him to eat.

6. Education.—The despair of conscientious teachers is the lack of and indifference to sound educational methods in the home. Careless thought and speech, unbridled emotions, superficial judgments, artificial standards—these home defects can never be redeemed by any curriculum of high school or college.

7. Devotion.—This should be mutual, and reciprocal. Too often one member of the family—most often the mother, least often the son—expresses devotion for the entire group. The fires of destiny are kindled in the crucible of devotion. Back of the great man has always been some one's home prayer, faith, sacrifice.

8. Ambition.—The purpose in our habitation is our evolution. Accordingly, every home must be outgrown, every blood tie broken, every association of mere kinship finally put off and away, as the locust drops his skin. Can you forget that your brother is your brother, your son is your son, your wife is your wife, and want for each only the highest good of each, whether you reap joy or sorrow from it? Do you know what the great ambition of each member of your family really is, and are you helping him or her to achieve it?

9. Co-operation.—Every home should provide for a systematic study of co-operative method, as shown in the modern factory, mill or department store. The scientific grouping and control of individual tasks and relations in the family is almost unknown. Therefore, a burden of unnatural and unnecessary weight falls on some one member of the family—the most unselfish, and usually the least endowed with physical strength.

10. Character.—The great need of the home to-day is for a Spartan courage. With few exceptions, the backbones of our children are mush. We deny them the supreme strength which grows only from doing the hardest thing. The very multiplicity of conveniences and luxuries robs this generation of self-reliance and self-reliance. Clearly and strongly as I urge the use of labor-saving devices in the home, I would beg of you to forget them all unless at the same time you teach the boys and girls how to work—hard and long and well, and painfully if need be. Nothing can ever take the place of old-fashioned hardship in the home production of character. From an article by Edward Earle Purinton in Everywoman's World.

HOW MUCH SWEET CLOVER TO SOW

Six to eight pounds of scarified sweet clover seed per acre gives a good stand. If the seed is not scarified, it is hard to tell just how much to sow unless a germination test is made to find out what proportion of the seed will grow. The hard seed may vary from 5 to 75 per cent. It will also be necessary to sow more of the unshelled than of the shelled seed.—N.D. Agr. College.
