Ground which is FERTILIZED will produce more vegetables than sterile ground.

Good Fertilizer properly used will convert poor ground into good ground.

Good Seed put into good ground will yield goodly crop of potatoes. A couple of extra barrels of potatoes will repay the cost of fertilizing.

Farmers, Read this Carefully!

This year, acting on the advice of Agricultural Experts, we have imported Fertilizers of higher grade and greater strength than were imported during the past decade of years.

The Fertilizers we now offer, are of more value than last year's importations and are guaranteed to give even better results.

Although our prices this year figure higher per pound, the cost per unit of fertilizing value is considerably less.

Putting Fertilizer into your ground is like putting money into savings bank. You can rely on getting more out, than you put in .-- it pays to fertilize. NOTICE!--Our fertilizers are not adulterated with spentslag or rock dust.

Homes Made Miserable by Envious Women.

Dr. Josiah Oldfield, speaking in London, on "The Dominant Sex," claimed that half the miseries of the Western world were caused by women fighting against men. Despite countless ages of experience, he said, women had failed to excel even in cooking, yet they set up as competitors of men in all walks of life. Ear more homes were made miserable by envious women than by dominant or

brutal men. Women, declared Dr. Oldfield, have been tinklers on the mandoline and plane through the ages, but it is mong men that the creative musicians are found. In the sphere of art also, Dr. Oldfield declared, although women had been busy painting their nails, eye lashes, lips, and faces for countless ages, if one sought paintings which would create emotion of the highest and best character for all time, one had to go to paintings done by men. Women were initiative and not creative. If search were made in Westminster Abbeby for records of the great women of England one would find a few actresses and courtesans, but none who was worthy of being commemorated as poets, painters, scuptors, inventors, world ioneers, or world benefactors.

Having charged women with negecting the most sacred duties of otherhood and with having selected he doubtful pleasures of politics and public life in pace of it, Dr. Oldfield oncluded by saying that men were uperior and should be reverenced, and until women were taught to behe co-partnership of the sexes there would be no peace in life.
