# Great Midsummer Sale Continues

**Ladies' White Duck Skirts - \$1.98**

Ladies' Separate Wash Skirts, made of fine white duck, in eleven-gore style, trimmed with insertion, come in lengths 38 to 42 inches. Midsummer sale price ..... **\$1.98**

**50c Colored Voile for - 25c**

All-Wool Voile, in nice crisp finish, 42 inches wide, colors of navy, champagne, Nile green and brown. Regular 50c value. Sale price, per yard ..... **25c**

**20c Corset Cover Embroidery, Yd 15c**

Five pieces of Fine Cambric Embroidery, nice open patterns. Regular 20c value. Sale price, per yard ..... **15c**

**\$1.50 Fancy Parasols for each - 98c**

Ten dozen Ladies' Fancy Parasols, nice Dresden covers, brass ribs, natural wood handles. Regular \$1.50 value. Midsummer sale price ..... **98c**

**Ladies' Cotton Hose, Pair - 10c**

Thirty dozen Ladies' Fast-Color Cotton Hose, in black only, sizes 8½ and 9, slight imperfections. On sale Tuesday only, per pair ..... **10c**

**Table Linen Remnants at Yard - 19c**

One lot of Table Linen Ends, lengths 1 to 3½ yards, worth up to 45c a yard. Midsummer sale price ..... **19c**

## R. J. YOUNG & CO.

### Two Drowned in Toronto Bay

Toronto, July 3.—Victor Kirkpatrick, manager of the Deer Park branch of the Dominion Bank, went out canoeing Saturday afternoon. Today the canoe and his coat were washed up on the Ontario shore at Mimico.

Another victim was Sylvester Johnston, aged 18, of West Toronto.

With three companions he was out in a gasoline launch last night. Some-thing went wrong with the engine and Johnston hit a match. The gasoline in the bilge water exploded, and the four men jumped into the water.

The other three caught the launch later, but Johnston was drowned.

### DE LESSEPS CIRCLES HIGH OVER MONTREAL

French Aviator Makes Remarkable Flight From Lakeside to City and Back.

Montreal, July 4.—The feature of the aviation meet on Saturday was the flight of Count de Lesseps in his Blériot monoplane. Scarab, the machine in which he crossed the English Channel, from the Aviation Park at Lakeside to Montreal and return, a distance of about 35 miles. The count left the park at 6:16 p.m., and 20 minutes later was flying high in the air over Montreal. He went over the city as far as the city hall, high up in the air, the sound of his engine just being audible to people on the street. Here he cut a wide circle, and started on his return journey, which he made in fine style, alighting from his machine in front of the grand stand just 49 minutes 2-3 seconds from the time of his departure. Both on the outward and homeward flights the count followed the St. Lawrence River, though, as he passed over the Lacine Rapids, it could hardly be considered as being greatly preferable to the land as a landing place in cases of necessity. Outside of this, an altitude flight of Walter Brookings, in a biplane, in which he made 4,000 feet, was next in interest. The meet was continued yesterday, but there were no performances of interest, six short exhibition flights being the day's programme.

Mr. R. L. Borden, leader of the Conservative party, was the guest of the directors of the international aviation meet on Saturday, and was an interested spectator of the various flights. One of the features of the meet on Saturday was a race between a Wright biplane, worked by Brookings, the daring Wright aviator, and an automobile. Mr. Borden occupied a seat in the latter. The biplane swept along the course at a speed of

### TEN TO SIX ON JEFF ODDS AT NEW YORK

Reno, July 4, 7:30 a.m.—The weather is cloudless with a cool west wind. Maximum temperature is not expected to exceed 85 degrees.

New York, July 4.—"There has been no betting in the real sense of the word," said Norman Selby, whose ring name is "Kid McCoy." Only a few small wagers here and there of small amounts, that's all.

The heaviest wager reported in the east was made at Atlantic City, where a party of New York men placed \$40,000 on Jeffries against \$25,000 on Johnson. Betting here today 10 to 6 on Jeffries.

During the hot weather wouldn't it be more comfortable and really cheaper to take your lunch down town at

Continued from Page One.

ship. Later he worked in St. Thomas with the Southwestern Traction Company. He had no relatives in this country. So far as can be learned he was the brother of a brother-in-law, a brother-in-law in the Westminster Bridge Road Orphanage.

The third drowning of the day occurred shortly after when Richard Ernest Neil, aged 24, son of Mr. and Mrs. Richard Neil, 767 Elias street, lost his life just opposite the old Ward Hotel, about 300 yards above the Springbank dam.

Neil, together with Roy Garratt, of 123 Wilson avenue, West London; Percy Robinson, of 12 Leslie street; Ed. Geoghegan, of St. James street; and Thomas Maitland, of 141 Forward avenue, went down the river in the morning in a launch owned by Garratt.

They were on their way home to dinner when someone proposed a swim, and the young men moored their boat and went in. Neil was a strong swimmer, and stayed much farther out than the others. He finally started to swim across the river, and was quite a distance out when two other young men heard him calling, and saw that he was in trouble.

Went to Rescue. Munroe, who is a strong swimmer also, went out to get him. Munroe was nearly to Neil when the latter went down. Munroe dived and caught him and brought him to the surface. With all the help he could get, he was unable to get him up again. A drowning man exerts, Neil grabbed Munroe and held him tight.

Both went down, Munroe fighting desperately to free himself from the grip of Neil. He finally got him up, but he could bring him up again. Munroe was utterly exhausted with his long struggle when he finally freed himself, and reached the surface, and was hailed as a hero by Garratt and the other young men. Neil's launch did not arrive when it did, Munroe would probably have been drowned also, as he was very weak. Neil came up a moment, but before anyone could get him he went down again and drowned.

Looking for the Body. The police were notified at once by telephone from the pump-house, and Sergeant Birrell went down at once with the grappling iron. A number of people who were down the river in boats joined in the search for the body also.

It could not be located last night, nor this morning. A special party of men were ordered to Springbank shortly before noon by Mayor Beattie.

Recovering the Body. Mr. Neil's body was recovered this morning at eleven o'clock. With another man, Neno was in a scow and was using a pump to pump the remains, which floated to the top of the water, but immediately sank. Several other men with grappling irons came on the scene and they secured the body and towed it to the pump house, where it was allowed to remain until an undertaker arrived from the city.

The body was lying in about twelve feet of water, almost in front of Ward's old hotel, and about two-thirds across the river from the north side, where Neil entered and attempted to swim across.

Young Neil was 24 years old, and for the past three years had been second head barber at the Tecumseh Hotel. He was married, and his wife lived by two brothers and two sisters. Francis, of this city; Wesley, of Detroit; Mrs. Ed. Davis and Miss Laura, of Detroit.

He was planning to go on his holiday in the course of the next few days.

The Victoria Disaster. The spot where Ernie Neil was drowned was almost in front of the old hotel formerly kept by Mike Ward on the north side of Springbank, and just this side of the dam. The water is deep at that point, but further up the river the little launches, which go drifting in and out, find it difficult to pass the stones of the rapids if they are heavily loaded.

Last night Sgt. Birrell and a policeman worked with a will in an effort to find the body, but their efforts were futile.

Many people who watched the policeman harked back to the Victoria disaster of May 24, 1881, when about 20 people lost their lives on a little flat-bottomed pleasure boat which collapsed a mile further east, just around the bend. A brass tablet marks the spot now.

### Personal Mention

Miss Fannie Patterson, of Toronto, is visiting Miss Long, 988 Richmond street.

Mr. and Mrs. Sam Southcott and baby are at their summer cottage, Grand Bend.

Miss Alice Pope and Miss Chapman, of Stratford, are visiting the former's mother, Mrs. W. J. Shilburn, Colborne street.

Masters Willie Gregory, Harold Christopher and Willie Hand are camping at Port Stanley with Mr. G. N. West.

Miss Sadie and Miss Emma Johnston, of Hellmuth avenue, are visiting Mr. and Mrs. Southcott at their summer cottage, Grand Bend.

Miss Ida Russell, of Colborne street, has been spending the past few days with his family on York street, returned this morning.

Mr. A. Vincent and family, Mr. E. Vincent and family, and Mr. W. Smith and family, have been spending the last few days at a quiet nook on the River Thames near Kilworth. Mr. Vincent reports fishing to be good this year, especially for pickerel and bass.

### "ONLY A GOOSE" THAT INTERFERES

Peculiar Row in the East End Was Aired in the Police Court.

#### A LESSON TO YOUNG MEN

If You Hear a Man and His Wife Quarrelling, "Mind Your Own Business and Let It Alone."

At this morning's session of the police court, Robert Way, a blacksmith living at 607 Bathurst street, charged John James, a neighbor, with assaulting him. Mrs. Way, wife of the plaintiff, charged Melvin Smith, a boarder at James', with assaulting her by slapping her face.

The trouble, it seems, originated a couple of weeks ago, when someone sent a couple of cats belonging to the Ways. The latter have not been on good terms with their neighbors ever since.

On Saturday evening Smith and a friend, named Fred Gadd, were sitting on the veranda. Way and his wife were engaged in putting up a screen door. Smith said he heard Way swear at his wife, and order her in, and a few minutes after he, together with James and Gadd, went over to the place, as from sounds they heard they were afraid that Way was beating his wife so terribly that they thought he might kill her.

Said There Was No Row. "The woman had tears in her eyes when we got there," said Smith, "and her face was all red from crying. She said she had spilled some hot water on her foot and that made her cry."

Words followed at the Way house, and James accused Way of being drunk and acting in an unbecoming manner. James finally slapped Way's face.

In court this morning Way denied that he had been drinking, and said that James and Smith came into his house and slapped both he and his wife.

James denied absolutely that he was in the house at all. In this he was supported by both Gadd and Smith. Smith also testified that Mrs. Way had kicked him in the knee.

Believed James. "I believe the story of Mr. James and the boarders," said the magistrate. "I believe it is one of those cases where people intervene in order to save a wife from a beating by a brutal husband, and then the woman is ungrateful enough to turn against her protectors. Had a charge been laid against Mrs. Way I could have found her guilty of assaulting Mr. Smith. Mr. James, on his own testimony, slapped Way, but the assault was not a serious one, and I fine him \$1, the smallest sum I can. If Way comes on one day any charges of abusing his wife or of using language annoying to people in the neighborhood, I will deal with him severely."

### MYSTERY OF LIFE

Discovery of French Chemists May Help to Solve It.

Paris, July 4.—A discovery which opens up a vast field to modern chemical research and may lead to the solution of the mystery of life, has just been announced to the Paris Academy of Science. Prof. Bertrand and his colleagues, who have been working on the synthesis of organic compounds, have succeeded in reproducing the synthetic process by which plants produce their food. The process consists of the assimilation of carbon into higher carbohydrates.

Starting with carbonic acid and steam, they obtained tetracyclic combinations with methylaldehyde, ending in sugar and starch. Then followed quaternary combinations with formaldehyde, resulting in the production of artificial albumen, which owing to its tremendous complexity has hitherto resisted the synthetic efforts of scientists.

Prof. Emil Fischer, the leader of the first chemical college of Berlin University, estimates that between 100 and 130 components are needed to make up albumen as produced, for instance, in the human stomach; but he has only succeeded so far in building up a combination of six or seven of these, producing what is known as a polypeptide. The rest baffled him. It may be that the French method may supply a solution of the problem.

### MRS. BROWNING.

A high authority in literary criticism speaks of Mrs. Browning as a rhythmic author at 16; an omnivorous reader, a loving student of philosophy and the classics. In style original from the beginning, replete with defects and beauties; often rugged and unfinished from subordination of taste to excess of feeling; always intense, rarely splendid; always sympathetic, tremendously sensitive to the sorrows of existence; the most fragile of beings, yet essaying to reach the infinite; all these things say all human, the French method may supply a solution of the problem.

Elizabeth Barrett Browning is considered by many to be quite on a level with her husband, so far as her achievements in the line of poetry are concerned. Her lyrical capabilities were of the highest order, and in some ways she ranked up with the greatest of the poets. In but few of the mighty singers of the past do we find a profounder insight into the human heart or a rarer expression of the deeper longings of the soul.

Competent critics declare that her genius was perhaps as great as that of any poet of our generation; that while in certain intellectual qualities she was inferior to Tennyson and Browning, in others she was their superior.

Teeth of sharks and tusks of walrus have been discovered by men at work on the tube station under the Place de l'Opera in Paris. It was a water cure-all in the eighteenth century. It was prepared by pouring a gallon of water on a quart of tar, and the dose was half a pint in the morning, and a second glass in the afternoon. Its use became so fashionable that a contemporary noted: "It's as common to call for a glass of tar water in a coffee house as a dish of tea or coffee."

### OXFORD ST. CANINE BIT THE FISHMAN

Magistrate Orders the Dog To Be Destroyed at Once.

Mrs. Jane Hughes, of 570 Oxford street, was found guilty by Magistrate Love this morning of keeping a vicious dog, and was ordered to have it destroyed at once, and pay all the doctor's costs incurred by John Latham, a fish peddler, who was bitten by the animal when he was delivering a fish at Mrs. Hughes' home on Saturday.

Mr. Latham was at the house when the dog, which had no muzzle on, came up and sank its teeth into the fleshy part of his leg. The wound was a severe one, and Dr. Teasdale was called to dress it.

Not a Good Fish. Mrs. Hughes caused considerable amusement in court when she told the court that she did not think she should pay Latham's doctor bill, because the fish he sold her was not a good one.

"I cannot help that," said the court, laughing. "That has nothing to do with this charge. You must destroy the dog and pay the doctor's bill. You might also be fined for allowing your dog to be at large without a muzzle."

### ALL SIGNS POINT TO COUNCIL BATTLE

Row Over Road Roller Appointment Is Again Stated.

There is going to be a lively time at the council meeting tonight, if reports are to be relied on. Although the mercury is lower than for some time past, the blood of some of the aldermen is said to be at fever heat just the same, and there should be some rather interesting debates.

One will be concerning the engineer of the steam roller. It will be remembered that an appointment was made to the position that did not suit some parties.

A report was obtained on the efficiency of the man by the alderman opposed to the nomination, and it was not favorable. It is charged that the alderman is not playing the game fairly, and as a result some of the friends of the engineer have their decks cleared for action.

The same matter almost stamped a rumour at the board of works meeting on Thursday evening, and now it will culminate in a right good sort of battle.

The Bell Telephone matter will also cause some conversation. Some of the aldermen have decided opinions on the subject and they will be expressed.

There are other matters of delicate quality to be considered. Even if Old Sol has repented of his misbehavior in keeping the temperature up, the aldermen will relegate that authority to themselves, so it is certainly likely to sizzle some this evening.

### WHERE THE CAMELS DO THE CARRYING

They Are the Freight Trains in Mesopotamia—Caravans at Bagdad.

From the United States Weekly Consular and Trade Report. Nearly 90,000 camels are used in the vilayet of Bagdad as beasts of burden, and with donkeys they form the only means of carrying goods to the inland points. Camel caravans go in strings, seven camels to the string, with two men in charge. For a camel 450 pounds is a good load, the pack being divided into two halves. But donkey caravans travel two miles an hour; on long trips across the desert twelve miles a day is an average march, though swift messengers like the mounted troops of Mesopotamia, make forty, fifty or even more miles at a stretch.

Freight between Bagdad and inland points in Mesopotamia is commonly packed in pairs of bales, each bale weighing about 225 pounds, for the convenience of camel drivers in loading. The rates charged for the carrying of goods are very low, but the conditions, being lowest when camels are cheap, labor and pasture plentiful and freight offerings none too numerous. For a common burden camel \$10 is a fair price, and the trotters or swift messenger camels are worth more. A young camel can sometimes be had about Bagdad for as little as \$3 or \$4.

Besides its use for riding and carrying purposes the Mesopotamian Arabs depend on the camel for milk. Shoes are made from its tough, calloused hide, and in times of famine, its milk, strong tasting flesh is eaten. Condensed milk made by boiling fresh only a hard, chalky substance, is prized among the desert nomads. By rubbing this substance between the thumb and forefinger, it makes a refreshing drink highly esteemed among the desert folk, "creaky," as it is called, will keep in good condition for two years. When made from butter-milk it tastes sour and is prized among Arabs who have eaten much of sweet dates. Fresh, warm camel milk is also the food of many valuable horses owned by desert sheiks.

Camel calves are weaned in their eleventh or twelfth month. When a camel caravan is on the march the young camels are often tied upon the backs of the mother animals, since they cannot endure the fatigue of a long march. Valuable dogs and Arab desert hounds, called "sluggies," also ride in the same way.

Unless camels have been especially trained to the abstinence they cannot go as long as is commonly supposed without water. When marching near rivers they drink twice a day. They feed largely on the tough, scrubby verdure known locally as camel thorn, which grows throughout Mesopotamia, except on the extreme desert wastes. Their habits are peculiar; unlike horses, they seem to feel no fondness for their human associates, though they will seldom wander far from the caravan tent, even if left untied over night. It is no uncommon sight to see 2,000 to 3,000 camels on the desert waste outside Bagdad's walls. They represent the combined herds of caravans which have met at Bagdad, bringing in wool, etc., and taking out other cargo to different parts of Mesopotamia.

### DELAWARE.

[Special To The Advertiser.]

Delaware, July 4.—The Methodist Church garden party held on the church lawn on Friday night was a success from every standpoint. One hundred and forty dollars was the receipts at the gate, and about one hundred dollars was cleared. Will J. White, the concert comedian, of Toronto, was the funny man of the evening. Miss Carmichael, elocutionist, of London, and Miss Francis Wright, soprano soloist, of Toronto, were greatly appreciated. Tony Cortese's "Original London Harpers," furnished the musical programme of the evening to the satisfaction of all.

Mr. Bruce Howe, of London, spent the holiday with his parents here. The A. Y. P. A. of Christ Church held their annual picnic on Thursday on Auburn's flats.

Mr. David Williams spent the holiday with his parents, and has left for his new charge at the High Street Methodist Church, London.

Mr. Arthur Throver, assistant storekeeper at the Hospital for the Insane, London, spent the holiday with Mr. and Mrs. H. W. Acres.

The 30th of July is the date of the Delaware Civic Holiday and union picnic.

Miss B. McLaughlin, of London, is visiting Miss Vesta Vail.

Miss Pearl Mann, of Lambeth, is the guest of the Misses Quilley.

The strawberry crops in this vicinity are badly in need of rain.

Miss E. Leigh, of the rectory, is away on vacation.

The remains of the late Mr. Copely, of Gloucester, were interred in the Delaware Cemetery on Thursday.

**G. T. P. TELEGRAPHERS WIN ARBITRATION**

Reward of Board Said To Be Favorable to the Men.

[Special To The Advertiser.]

Toronto, Ont., July 4.—The Grand Trunk Pacific telegraphers win in their fight for better pay, better hours, and better conditions.

The demands of the telegraphers went to an arbitration board, and were very fully investigated. The representatives on the board were: W. T. Lee, of Toronto, for the men; Donald Ross, of Barrie, for the company, and Judge McMillan, of Brampton, as the third member. The report of the board has been completed and is now in the hands of the Minister of Labor at Ottawa. It is said to be generally favorable to the men.
