LONDON MARKET CROWDED TODAY

Produce of All Sorts Was Plentiful on the Local Square.

LARGE SUPPLY OF APPLES

Peaches Down in Price—Last of the Berries Are Now Being Offered— The Quotations.

The local market this morning was the largest for the past month. In-stead of the tented carnival occupying the space, the market square was a mass of people rigs and vegetable produce. All the available space in the square was taken up, and many of the market gardeners were forced to locate their stands on the adjoining streets.

Enough vegetables were on hand to supply an army for a month, or keep a city three times the size of London from starvation. Many found it impossible to find a sale for all their produce owing to the quantity offered. There was a large supply of apples, which were being sold from 35 to 50 cents a bushel. The last of the berries and cherries are being offered this morning at prices ranging from 12 to 14 cents a box for cherries, and 75 cents to \$1 a basket for cherries.

Very little hay and oats are being sold although the demand is keen. Hay is priced at \$11 to \$13 per ton, and oats, \$1 55 to \$1 69 per cwt. New wheat finds a sale at 90 cents a bushel, and old wheat for an additional tencent piece. Buyers are predicting a cent piece. Buyers are predicting a drop in the price of hay for next week,
