"The Only one in America. The International Throat and Lung institute, Toronto and Montreal, is positively the only one in America where diseases of the air passages alone are treated. Cold inhalations are used through the Spirometer, an instrument or inhaler invented by Dr. M Souvielle of Paris, ex-aide surgeon of the French army, with proper dietetic, hygienic and constitutional treatment suitable to each case. Thousands of cases of Catarrh, Laryngitis, Bronchitis, Asthma, Catarrhal Deafness and Consumption have been cured at this institute during the last few years. PRESBYTERY OF TORONTO.

fterpoon Session of the First Meeting for 1883-The Committe for this Year. At the afternoon session of the Toronto resbytery on Tuesday afternoon the matters of the union between the congregations at ambarton and Highland creek was brought up. Dumbarton is under the direction of the Whitby presbytery and Highland creek under the jurisdiction of the Toronto presbytery. The conditions of the union were that the former should raise \$550 and the latter \$350 per annum towards the pastor's salary. On motion of Rev J M King, seconded by Mr. Montcreeff the following was carried: 1 'That the presbytery expresses its cordial approval of the union of Dumbarton and Highland creek to form one pastoral charge. 2 That the presbytery refers the nestion of presbyterial connection of this astoral charge of the synod of Toronto and

THE PRINCESS IN THE STATES.

(To the Editor of The World.) SIR : I would like to say a word or two in answer to the remarks of a correspondent who signed himself G. E. W. in Tuesday's World. He said : "The people of the United States are equals of her royal highness the Princess Louise. The people of Canada are her servants. Why should she not associate with her equals ?" To this I would ask G. E. W. were we not servants of our previous governor-general and Lady Dufferin? And yet they found us good enough to associate with without having to go to the states to find their equals. Should her majesty the queen go elsewhere to find her equals? And then, little further on, your correspondent makes an attempt to answer his own questions by Kingston."

Dr Barelay's claim against St Andrew's congregation for arrears of stipend to the amount of \$1250 was referred to the following committee: Revs. Prof. McLaren, Dr. King, Dr. Grigg, J Reid and H M Parsons. Rev. P F McLeod, seconded by the Rev Mr Tanner, made the following resolution, which was carried unanimously:

Catarrh—A New Treatment.

From the Weckly (Toronto) Mail, Aug. 24.

Perhaps the most extraordinary success that has een achieved in modern medicine has been attained housand patients treated during the past six onths fully ninety per cent have been cured of

months fully ninety per cent have been cured of this stubborn malady. This is none the less startling when it is remembered that not five per cent of patients presenting themselves to the regular practitioner are benefited, while the patent medicines and other advertised cures never record a cure at all. Starting with the claim now generally believed by the most scientific men that the disease is due to the presence of living parasites in the tissue, Mr. Dixon at once adapted his cure to their extermination—this accomplished, he claims the catarrh is practically cured and the permanency is unquestioned, as cures effected by him two years ago are cures still. No one else has ever attempted to cure catarrh in this manner, and no other treatment has ever cured catarrh. The application of the remedy is simple and can be done at home, and the present season of the year is the most favorable for a speedy and permanent cure, the majority of cases being cured at one treatment. Sufferers should correspond with Mr. A. H. Dixon, 305 and 307 King street west, Toronto, Canada, and enclose stamp for hi reatise on ~tarrh

tem of inhalation is acknowledged by all to be the most reasonable of any ever adopted, and most satisfactory in its results.

Invalids who have failed to derive benefit from medical treatment, and who have made fruitless trials of nostrums of the day, will find in this practice abundant reason for hope, as numerons instances have been reported even of the entire restoration to health of parties in this city and vicinity who have made thorough trial of the remedies, although they had previously been pronounced in an advanced stage of consumption.

Its particular efficiency is especially noticeable in throat diseases, which, if neglected, end in consumption, nasal catarrh, bronchitis, asthma, and diseases of the heart. To this class of cases Dr. Williams gives his individual attention.

Those who desire to consult me in regard to their cases had better call at the office for an examination, but if impossible to visit the office personally, may write for "List of Questions" and a copy of my." Medical Treatise," both of which will be sent free of charge. Address

All diseases of the respiratory organs treated by "Medicated Inhalations" combined with proper constitutional remedies for the blood, etc. Nearly 40,000 cases successfully treated during the pat sixteen years.

The citizens of Toronto, as well as neighboring lake and inland cities, have observed the alarming prevalence and increase of that dangerous class of maladies known as throat and lung diseases. Year by year is adding to the army of victims, and new types and phases of these affections are also multiplying. The reports of the city undertakers will disclose to the inquirer a fearful bill of mortality from this cause alone; nor is the gloomy record relieved by a comparison of results in the oft-repeated trial of the various prescriptions in common practice. The time-worn customs of bye-gone years, calomel, burning, leeching, morphine, iodine and digitalis, have in each new patient awakened fresh hopes of recovery, hopes, alas, to be blighted as were three in the hearts of patients who hoped an ed while using the remedies.

More effectual remedies than those which generally prevail are called for, and it is to this end and the belief that scientific investigation in one class of complaints will be more certain to attain success in this direction, than by occasional research and observation, while the mind is divided by general practice, that led to the establishment of the Ontario P innonary Institute in this city during the year 1881, an institution which does afford the best possible treatment of this class of diseases. By the permanent establishment of such an institute, invalids can at all times consult the doctor personally—being an advantage that will readily be seen and appreciated by all.
