Mirth and Sadness at a Rowing Regatta. Chicago, July 29.—The second annual rowing regatta of the Lincoln Park Navy was witnessed at the Lincoln Park lagoon by a very fair assemblage, which crowded the two bridges across the lagoon and lined the shores, while the driveway was occupied by carriages and bicycles. The crowd was a regular holiday affair, jolly and good natured, and showed great patience during the tedious waits between events. The first race was not rowed until an hour after the scheduled time, and the work of the starters in getting the several crews in the water was very poor, causing long delays. Considerable excitement was caused by the drowning of a spectator during the races in the lagoon. The man fell in and immediately sank. He sis thought to be John Tris of 281 West Madison-street. The reason is, that in unusual exercise, such as rapid walking horseback riding, gymnastics or bicy cling, the blood is more rapidly oxygen ated and the result is the destruction or burning out of the fat; and you may have noticed that great walkers are never fat, and that people who live in high altitudes and mountainous countries, where they walk a great deal and consume quantities of oxygen, are always slim.

The change in the English Ministry recalls an old mot about the Marquis of Salisbury and Mr. Henry Manners. now the Marquis of Granby. Salisbury, who is distinguished by his rudeness and brusquerie, had Mr. Manners as private secretary at one time. and as the latter is particularly suave and gracious, he was nicknamed "Salisbury's Manners." The English people are famous for fastening nick-names on their public men, but no matter how hard they strike home the men themselves never wince; but on the contrary, rather like the wit. Even the g.o.m. is said to have a collection of his caricatures that would make a sensitive, thin-skined American subject have a fit, and yet no one will say that Mr. Gladstone is lacking in feeling, or that he belongs to the pachyderms of society. During the last 20 years the improvenents in railroads have been remark. able, but they must be more remarkable in the next 20. When we see crashing past us that enormous mass of iron and wood called the vestibule train, we are prone to wonder at the wide difference between the construction of this train and that of a bicycle. A 21 1-2-pound "safety" will carry a 150-21 1-2-pound "safety" will carry a 150-pound man at nearly the same rate of speed as the train, but for every 150-pound man the vestibule train must carry a dead-weight of between 3000 and 4000 pounds. Now, as the bicycle is a practical machine, the train must be unnecessarily heavy; and if there is such a discrepancy in one important during that time, but have received littly or no benefit. J. & J. Lugsdin 101 YONGE-STREET,

4 doors south of Adelaide-st. 136 Brown Bread. Take two cups cornmeal, two cups flour, two cups milk, one egg, one ta-blespoonful melted lard, one-half cup of molasses, one-half cup of sugar, two even teaspoonfuls of soda, one teaspoon ful of salt. Bake thin. A Toilet Hint. The woman who has wept until her

eyelids and her nose are purple, her eves bloodshot and her face swoller always feels a trifle embarrassed when she has to receive callers or go down to dinner immediately. She frequently makes a bad matter worse by washing her face in cold water. If she will in stead, bathe it gently with rose water for a few minutes and then lie down for a few more, with a soft rag sat urated in rose water over her eyes, she will be prepared to face any company

Among the various ways of serving fruits in season, a compote is one of the nost delicious, yet few cooks understand the art of making it properly their attempts to do so resulting in a dish of stewed fruit. Firm, perfect fruit only should be selected when a compote is to be made. It should be peeled quickly, dropped in alum water or ice water and lemon juice; then into the boiling syrup and cooked slowly until clear.

Save the Tender Fingers. Little holders for lifting the 5 o'clock tea kettle, the chafing dish or the heated handle of a coffee pot at the table are of sateen on one side, interlined with leather, and of colored satin or silk on the other side. They are made gay by crossing the silken side through the centre and diagonally with a metal ribbon of gold or silver. Sometimes the ribbon has a row of heavy white lace insertion on each side.—Evening World.

ONTARIO LADIES' COLLEGE.

WHITBY, ONT. About \$35,000 are being spent this summer in new buildings, new steam-heating, electric lighting, etc., placing the college property far in advance of that of any similar institution in this country. The work done by students in University and departmental examinations is unequalled. The musical department is on a thorough conservatory basis, and is being strengthened by the addition of a new pipe organ, to be driven by electricity.

The fine art, elecution and commercial departments are equally efficient. College will re-open SEPTEMBER 9. Send for calendar or apply for room to
