HAR"18 & CO. PROPRIETORS.
WATFORD, AUGUST 24, 1917

NOTE AND COMMENT

An exchange ventures the following regarding clothes: "A man wears his clothes out wearing them; a women wears hers out changing them.

The Australian government on the second reading of War-Time Profit Tax Bill, announced that the tax would be fifty precent for the year ending June 30th, 1916, and 75 per cent after that date. The tax would be levied on excess profits during the war, compared with profits before the war. Exemptions include all agriculture, fruit growing, dairying and allied businesses.

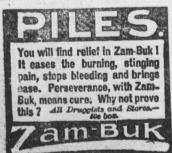

The Rexal Drug Co. has just purchased the Seamless Rubber Co., which occupies an entire block in New Haven, Connecticut, and will employ nearly 1,000 people in that firm alone. President Liggett of the Company purchased the cruiser Harold at a cost of \$250,000 and gives its use to the Government as a submarine-chaser.

We understand now why men refer to women, and women refer to men, as "the opposite sex." In winter man buttons himself up to the ears in a fur coat, and a woman jauntily defies zero weather with her neck and half her chest bare. When the thermometer starts flirting in the shade with the 90's, man throws away his collar and turns in the neck of his shirt, while "fashionable" (?) women put on a fur neck piece. Don't try to figure it out, dear reader, or you will need a padded room.

A new cow pest that threatens to diminish the milk supply seriously is reported by dairyman as appearing among the herds of London district. For lack of better technical know-ledge the bug is called the "Northwest fly," and is said to sting with the power of a charge of rocksalt. One dairyman stated that when this fly attacked one of his cows, the poor animals become almost demented and ran about the field, tail in the air, until it dropped from exhausttion. Wherever the pest has appeared, the herds have fallen off in their output, and the dairyman are consulting experts to ascertain the best means of exterminating the pest. So far they have been able to secure little satisfaction, as no one has been able to secure a sample of the fly.

Agricultural Knowledge

An entirely new catalague is ready for circulation of the publications issued in the last few years by the Dominion Department of Agriculture. There are 317 listed, of which 31 are devoted to the dairy, butter-making, cheese making, cold storage, cow testing, etc.; 64 to the cultivation of field crops, grains, grasses, vegetables,

plant diseases: 51 to live stock and everything pertaining thereto; 19 to apples and fruit generally; 24 to gardening, fruit, flowers and vegetables, home and school; 33 to poultry raising, keeping, housing, feeding and marketing, candling, preservation, production and shipping eggs and 42 to miscellaneous seasonable hints, cold storage, bees, honey production, soil fertility, maple sugar production, manures and fertilizers, farm machinerv, forestry, and the War Book of 1915 and 1916, The Agricultural Gazette, the Agricultural Instruction Act and so on. The catalogue will be sent without charge on application being made to the Publications Branch, Department of Agriculture, Ottawa.

War Fakers

A warning has been issued to the public to be on the lookout for fake vendors passing as war veterans. It is too bad that men either in uniform or civilian garb will play any such role but all the greater necessity to nip such enterprise in the bud by asking the men to furnish data as to genuineness of their mission. People have a warm sfde for a soldier who has done his duty and suffered in so doing, but to lend aid to some faker who thinks he may make an easy living by his imposition is only another way of bolstering up a lazy scamp, whose fraudulent methods should be exposed before he has a chance to carry on the deceit to any extent. Know who you are giving your money to and don't be thinskinned in a lively quiz if Mr. Faker attempts to impose on your generos-

Catarrh Cannot be Cured

with LOCAL APPLICATIONS, as they cannot reach the seat of the disease Catarrh is a local disease, greatly influenced by constitutional conditions, and in order to cure it you must take an internal remedy. Hall's Catarrh Cure is taken internally and acts through the blood on the mucous surfaces of the system. Hall's Catarrh Cure was prescribed by one of the best physicians in the country for years. It is composed of some of the best tonics known, combined with some of the best blood purifiers. The perfect combination of the ingredients in Hall's Catarrh Cure is what produces such wonderful results in catarrhal conditions. Sead for testimonials, free. F. J. CHENNY & CO., Props., Toledo, O.

Is the Church Dying ?

(St. Marys Argus)

The First Presbyterian Church and Knox Church have between them about one thousand members on the roll. They have been holding union services since the first of July. Last Sunday night, only five weeks after the close of the Hanley-Fisher meetings, the attendance at the union service was about forty. What conclusions is one driven to? tention is not drawn to this fact in captious criticism, but in serious and solemn earnestness. What is wrong? Are the people losing their grip of the great fundamental truths of the existence of a God and of human responsibility? Are churches really necessary and is church attendance really important? Have the churches failed beyond recall? What are we going to do about it?

The Evaporated Apple Industry

With the apple picking season close at hand and the large quantities of apples grown in Canada, a more timely bulletin than one on the Evaporated Apple Industry, written by Mr. C. S. McGillivrary, Chief Travelling Inspector of Fruit and Vegetable Canneries, and issued by the Department of Agriculture, Ottawa, could hardly be devised. It speaks of the old time methods when apples were cut into sections and hung up to dry, and then, with many illustrations and drawings, describes in full the progress that has been made in the process, the wholesomeness and nutritive value of the evaporated apple, the implements that can be used, and the structures that are advisable for manufacturing on a scale of different dimensions. The bulletin remarks that the industry is only in its infancy in Canada, but is of great value and importance and open to extensive development It gives the results of many experiments and, in short, in pain and explicit language, explains very fully the operations that are necessary to bring the evaporated apple up

flax and tobacco; 37 to insect and plant diseases: 51 to live stock and everything pertaining thereto; 19 to apples and fruit generally; 24 to gardening, fruit, flowers and vegerally and plant of Agriculture, Ottawa.

Preserve Eggs Now

(Experimental Farms Note)

The indications are that eggs will be dear next winter, dearer than they were last winter so those who want eggs had better put some down now while they are comparatively cheap. Do not use oats, bran, salt or such mediums; moreover, the patent preservatives usually advertised as being so simple and effective had better be adopted with caution. Better use something that has been tried and found satisfactory.

According to Dr. Frank T. Shutt, Dominion Chemist, lime water is one of the best preservatives and we quote the following from his Exhibition Circular No. 42.

The method of preparation is simply to slake one pound good quick lime with a small quantity of water and then stir the milk of lime so formed into 5 gallons of water. After the mixture has been kept well stirred for a few hours it is allowed to settle. The supernatant liquid, which is now "saturated" limewater, is drawn off and poured over the eggs, previously placed in a crock or water tight barrel.

As exposure to the air tends to precipitate the lime (as carbonate), and thus to weaken the solution, the vessel containing the eggs should be kept covered. The air may be excluded by a covering of sweet oil, or by sacking upon which a paste of lime is spread. If, after a time there is any noticeable precipitation of the lime, the lime-water should be drawn or siphoned off and replaced with a further quantity newly prepared.

GENERAL PRECAUTIONS NECESSARY
TO TAKE

It is essential that attention be paid to the following points:—

1. That perfectly fresh eggs only be used.

2. That the eggs should through out the whole period of preservation be completely immersed.

Although not necessary to the preservation of the eggs in a sound condition a temperature of 40°F. to 45°F. will no doubt materially assist towards retaining good flavour or rather in arresting that "stale flavour" so often characteristic of packed eggs.

Respecting the addition of salt, it must be stated that our experiments—conducted now throughout fifteen seasons—do not show any benefit to be derived therefrom; indeed, salt frequently imparts a limey flavour to the egg, probably by inducing an interchange of the fluids within and without the egg. Our advice is, do not add any salt to the limewater.

WHY not give your lad the same training?

"When I was a growing lad, and came upon many words in my reading that I did not understand, my mother, instead of giving me the definition when I applied to her, uniformly sent me to the dictionary to learn it, and in this way I gradually learned many things besides the meaning of the individual word in question—among other things, how to use a dictionary, and the great pleasure and advantage there might be in the use of the dictionary. Afterwards, when I went to the village school, my chief diversion, after lessons were learned and before they were recited, was in turning over the pages of the "Unabridged" of those days. Now the most modern Unabridged—thenew intermediate in the pages of the "Unabridged" of those days. Now the most modern Unabridged—thenew intermediate it is at present the best of the one-volume dictionaries; and quite sufficient for all ordinary uses. Even those who possess the splendid dictionaries in geveral volumes will yet find it a great convenience to have this, which is so compact, so full, and so trustworthy as to leave, in most cases, little to be desired."—Albert S. Cook, Ph.D., LL.D., Professor of the English Language and Literature, Yale Univ. April 23, 1911.
