$\mathrm{W}^{\mathrm{E}}$
E DESTRE TO CALL ATTENTION TO OUR

No. One and Two Buckeye Combined
Reaper and Mower, with John-
son's Self-Rake Improved for 1871.

We believe this machine, as we now build it, to be the most prefect Reaper and Mower ever yet offerded to the public of Canada.

Among its many advantages, we call attention to the following:
It has no gears on the Driving Wheels, Enalining it to pass over masshy or sandy ground without clogging up the gearing, therrby rendering it less liable to ureakage. It is furnished with four lnives two for mowing and two for reaping, one of which has a sickle edge for cutting ripe, clean grain, the other a smooth edge for cutting grain in which there is grass or seed clover.

It has malleable guards both' on the Mower har and Meaper Table, with best cast steel Ledger Plates. It is also furnished with our new Patent Tilting Table for picking up lodged grain. This is the only really valuable Tilting table offered on any countined leaper and Mower. The Table 'an br very easily raised or lowered by the Driver in his seat without stopping his team. This is one of the most important inprovements effected in any Machine diring the past two years.
Any one or all of the arms of the Reel can be made to act as Rakes at the aption of the Drivet, ly a Lever realily op-
farted by his foot. The rutling apparatus is in front of the Marhine, and therefore whether Reaping or Mowing the entin work of the Machine is under the eve of the Diver white guiding hi, tern. The 'Woble it so constructed as to gather the grain into a Bundle before it leaves the Table, and deposits it in a more com. jact form than any other Reel Rake.

The Table is :ttached to the Machine both in frout ahl text of the Masmes Whed, which enables it to pats over rough gromm with much grater case and less injury to the Table. The Grain Whed late is on a line with the axke of the drive whel, whith enables it to turn the corners readily.
The Rakes are driven by Gearing instead of Chains, and therefore, have a steady uniform motion, making them much hess liable to breakage on uneren ground, and more regular in remoring the Grain. The Gearing is very simple, strong anl durable. The Boxes are all lined with

## BABBTT METAL.

The parts are all numbered, so that the repairs can be ordered by telegraph or otherwise, ly smply giving the number of the part wamted. There is no side Draught in either reaping or mowing, and the Machine is so perfectly balaned that there is no pressure on the Horses' neeks either when reaping or mowing. All our malleable castings, where they are subject to much strain, have been twice annealed, thereby rendering them both tough and strong. Our Johnson Rake is so constructed as to raise the Cam so far above the Grain Table that the Grain does not interfere with the machinery of the Rakes or Reels. We make the above Machines in two sizes-No. One, large size for Farmers who have a large amount to reap-No. Two, medium size for Farmers having more use for a Mower than a Reaper. With the exception of diffirence in size, these Machines are similar in every respect. Our No. 2 Machine supplies a wint heretofore unfilled, viz. A medium letween the Jun. Mower and layge combined machine, both in size and price. We shall distribute our sample machines in Marchi among our Agents, that intending Purehisers may have an early opportunity of mamining their merits, aud we guarantee that all Machines shipped this season shall be equal in quality and finish to the samples exhibited by our Agents. We invite the priblir to withhold giving their orders until they have had an opportumity of inspecting our Marhines, as we believe that they are unsurpassed by any other machines crer yet offered on this continent. We also offer among other Mlachines,

Johnson's Self-Raking Reaper, impro-

ved for 1871, with two knives, sumuth anal siekle edge, and malleable guards.
Wood's Patent Self-Raking Reaper.
Buckeye Reaper No. 1, with Johnson's Self-Rake.
Buckeye Reaper No. 2, with Johnson's Self-Rake.
Ohio combined Hand Raking Reaper and Mower.

Cayuga Chief Jr., Mower.
Buckeye Mower No. 1.
Buckeye Mower No. 2.
Ball's Ohio Mower No. 1.
Ohio, Jr., Mower.
Taylor's Sulky Horse Rake.
Farmers' Favourite Grain Drill.
Champion Hay Tedder.
and our celebrated

## HALL

## Threstier and Separator,

Greatly inproved for 1871, with either Pitt's, Pelton, Planet, Woodbury, or Hall's

3 or 10 horse-power.
We shall also offer for the Fall trade a new Clover Thresher and Huller, very much superior to any other heretofore introduced.

## A.NEW AND COMPLETE

## ILLUSTRATRED CAPALOCUE

## of all our machines

Is being Published, and will be ready for early distribution, free to all applicants.
All our Machines are warranted to give satisfaction, and purchasers will have an opportunity of testing thom both in Mowing and Reaping before they will bo required to finally conclude the purchase.
