

COPP WARRIOR HEATER

A short explanation of this magnificent and powerful heater may be useful to many who do not wish to go to the expense of a Furnace, and yet obtain a like result.

The fire box, as shown in cut, is large and roomy, and will take 32-inch wood. The heat and smoke pass from it to the upper section and are conducted through eight horizontal steel pipes, each five inches in diameter, with a total length of 15 feet. The passage of combustion through these entirely exhausts all heat before reaching the smoke pipe.

Cold air is conducted under the centre ring, and comes directly in contact with the several heated steel pipes, and then passes to the central exit at the top intensely heated. The hot air then can either pass through pipes to different rooms, or be thrown directly into the room in which the heater stands.

The powerful heating capacity, the great economy, the ease to control, and the surpassing beauty of this remarkable heater, together with its durability, makes the Copp Warrior Heater the very acme of economic and scientific household, hall and store heating, as hundreds testify.

Your letter of enquiry will have our immediate attention.

## THE DAISY HOT WATER HEATER

FOR HEATING

Dwellings, Offices, Banks,  
Churches, Convents, Schools,  
Hospitals and Public Buildings

Is the Recognized Standard of Durability, Economy of Fuel and Efficiency

Its leading features are perfect circulation without friction, thus insuring the largest amount of heat with the least consumption of fuel. There are only five joints in the Heater, all of which are machine milled and interchangeable and away from the action of the fire, thus making a perfectly water-tight joint.

Made in Twelve different sizes and connected together so as to run separately or together.

There are now over 15,000 of these heaters in use throughout the Dominion and United States. Enquire into its record before using any other.
