Drug Reports.

Canada.

The general report of business during the holiday season has been very satisfactory, and it is to be hoped the improvement during the latter part of the year will still continue, and there is every prospect that it will.

The principal change in values during the month has been on cocaine, which has much advanced, with a prospect of high prices continuing. Quinine is slightly easier, but higher prices may come into effect at any time. Ergot, cubeb berries, creosote, coumarin, guaiacol, Lithia salts, codeia, spices, and red ipecac are higher. Caffeine and camphor are easier.

The prices of glassware flint and green are in a somewhat demoralized condition at present. The Canadian manufacturers are fighting among themselves, and together are being opposed by the American manufacturers. In case lots green glass is being offered at 50 and 5 per cent., and flint at 45 and 5 per cent. discount, usual terms.

Welch grape juice has been reduced in price. The new Canadian price is: Quarts, case of one dozen, \$5.75 case, cash; pints, case of two dozen, \$6.25 case, cash; $\frac{1}{2}$ pints, case of three dozen, \$5.75 case, cash; 3 oz., case of eight dozen, \$8 case, cash. In less quantities than a case they sell at \$6.25, \$3.40, \$2.10, \$1.10 per dozen, usual terms.

Paris green will likely be two or three cents a pound higher this season than last; it is claimed (and we think truly) last summer it was sold at a loss to manufacturers.

England.

London, Eng., Dec. 23, 1897.

There has been some improvement in the drug and chemical market during the month. Besides the advance in quinine, which is fairly well maintained, cocaine has advanced considerably. Iodophyllin is rising steadily owing to scarcity of root. Hydrastis has advanced for a similar reason. Opium is reported dearer at Smyrna, although unaffected here, but morphia makers have put up prices. Castor oil easier; cod liver unchanged; aniseed a trifle firmer; cassia tending lower; verbena and citronella advanced. Caffeine and its salts have been reduced.

Geranium, oz.	\$1 75	\$1 08
