

future. Consistent with the relevant UN resolutions, we will provide every assistance to the United Nations Special Commission and the International Atomic Energy Agency (IAEA) so that they can fully carry out their tasks.

9. In the nuclear field, we:

- Re-affirm our will to work to establish the widest possible consensus in favour of an equitable and stable non-proliferation regime based on a balance between nuclear non-proliferation and the development of peaceful uses of nuclear energy.
- Reaffirm the importance of the nuclear Non-Proliferation Treaty (NPT) and call on all other non-signatory states to subscribe to this agreement;
- Call on all non-nuclear weapon states to submit all their nuclear activities to IAEA safeguards, which are the cornerstone of the international non-proliferation regime;
- Urge all supplier states to adopt and implement the Nuclear Suppliers Group guidelines.

We welcome the decision of Brazil and Argentina to conclude a full-scope safeguard agreement with the IAEA and to take steps to bring the Treaty of Tlatelolco into force, as well as the accession of South Africa to the NPT.

10. Each of us will also work to achieve:

- Our common purpose of maintaining and reinforcing the NPT regime beyond 1995;
- A strengthened and improved IAEA safeguards system;
- New measures in the Nuclear Suppliers Group to ensure adequate export controls on dual-use items.

11. We anticipate that the Biological Weapons Review Conference in September will succeed in strengthening implementation of the convention's existing provisions by reinforcing and extending its confidence-building measures and exploring

the scope for effective verification measures. Each of us will encourage accession to the convention by other states and urge all parties strictly to fulfil their obligations under the convention. We each believe that a successful Review Conference leading to strengthened implementation of the BWC, would make an important contribution to preventing the proliferation of biological weapons.

12. The successful negotiation of a strong, comprehensive, and effectively verifiable convention banning chemical weapons, to which all states subscribe, is the best way to prevent the spread of chemical weapons. We welcome recent announcements by the United States which we believe will contribute to the swift conclusion of such a convention. We hope that the negotiation will be successfully concluded as soon as possible. We reaffirm our intention to become original parties to the convention. We urge others to become parties at the earliest opportunity so that it can enter into force as soon as possible.

13. We must also strengthen controls on exports which could contribute to the proliferation of biological and chemical weapons. We welcome the measures taken by members of the Australia Group and by other states on the control of exports of chemical weapons precursors and related equipment. We seek to achieve increasingly close convergence of practice between all exporting states. We urge all states to support these efforts.

14. Our aim is a total and effective ban on chemical and biological weapons. Use of such weapons is an outrage against humanity. In the event that a state uses such weapons each of us agrees to give immediate consideration to imposing severe measures against it both in the UN Security Council and elsewhere.

15. The spread of missile delivery systems has added a new dimension of instability to international security in many regions of the world. As the founders of the Missile Technology Control Regime (MTCR), we welcome its extension to many other states in the last two years. We endorse the joint appeal issued at the Tokyo MTCR meeting in March 1991 for all countries to adopt these guidelines. These are not intended to inhibit cooperation in the use of space for peaceful and scientific purposes.
