APPENDIX.

DESCRIPTION OF THE BUILDINGS.

In 1885, the building in the University grounds, crected by the Governors for the use of the Faculty, was found inadequate. A new Building was then added, which, at the time, afforded ample facilities for carrying out the great aim of the Faculty,—that of making the teaching of the primary branches thoroughly practical.

The Laboratories and Lecture Rooms, then added, have now become filled, and so great have been the advances in Medicine and in the methods of laboratory teaching, that it has been necessary again to increase the number and size of the Laboratories. Owing to the timely generosity of Mr. John H. R. Molson, who has already done so much for the University, the facilities for teaching in the Faculty of Medicine have been more than doubled.

As will be seen on reference to the architect's plans, the new buildings have been erected as an extension of the old ones, towards the north-west, partially facing Carlton Road, and convenient to the Royal Victoria Hospital. They connect the Pathological building acquired in 1893, with the older buildings, and comprise a large modern Lecture Room, capable of accommodating 450 students, with adjoining preparation-rooms and new suites of Laboratories for Physiology, Histology, Pharmacology and Sanitary Science. The Laboratories, etc., in the older buildings, have been greatly enlarged and improved ; the whole of the second floor has been devoted to the Anatomi-

<u>ine Floor</u>
