## WHOLESALE FRUITS AND VEGETABLES

Receipts were light and trade rather  
draggish on the wholesales yesterday,  
the quality of the bulk of the domestic fruits  
being rather poor.

Egg plant is still coming in fairly  
freely, and varies greatly in quality and  
price, selling at 40c to 75c per 11-quart  
basket. H. Armstrong of Port Dalhousie  
is certainly to be congratulated  
on the quality of his egg plant, which has  
commanded the highest price paid in the  
market, continuing for the past month the  
bulk of it bringing \$1 per 11-quart  
basket. H. J. Ash handling it.

White & Co. Limited had a car of  
cranberries selling at \$2.50 per bbl., and  
\$2.35 per case; a car of grapes, Red  
Rogers, at 45c to 50c per six-quart flat,  
and blues and greens at 40c to 45c per  
six-quart flat. A car of apples, McIntosh,  
selling at \$5.50 to \$6 per bbl., and Blenheim

## GOLD ORE BODY OF WASAPIKA ONE OF LARGEST IN CANADA

Detailed Report by Engineer Rogers on Development Work at  
One Hundred Foot Level Makes it Clear That Discovery  
is One of First Importance.

The opinion that one of the largest  
bodies of commercial gold ore in Canada  
has been found at the 100-foot level of  
the Wasapika gold mines is expressed by  
Mine Manager George R. Rogers, E.M.,  
in a report to the directors. The report  
follows:  
At noon, on May 15, the mining  
machinery erected on your property was put  
in operation, and I proceeded with the  
sinking of the No. 1 shaft, and continued it  
to a depth of 100 feet. At this point a  
station was cut and the shaft securely  
timbered within 30 feet of the bottom.  
From 100 feet below the surface a  
crosscut was started in an easterly direc-  
tion for the purpose of reaching the main  
vein, which lies 80 feet east of the shaft  
on the surface. A point 25 feet east of  
the shaft was reached. This vein has  
been carefully sampled, and the assay  
results show an average value of \$10.40  
per ton for a width of 13 feet 6 inches.  
The next eight feet of the crosscut  
passed through a highly-mineralized quartz  
vein material, consisting largely of schist  
and quartz. This eight feet of vein mat-  
ter has been carefully sampled, and the  
assay results show an average value of  
about \$2 per ton in gold.

The bulk of the sales going from 13 1/2c
