### ROCKEFELLER'S GIFT EVOKES KING'S PRAISE

£1,200,000 Donated to University College Through Foundation

### A Picturesque Ceremony—King and Queen Laid Corner Stones of Maternity Hospital and Nurses Home.

(Special Cable to the New York Times and Montreal Gazette). London, May 31.—The great additions to University College and University College Hospital, made possible through the munificence of John D. Rockefeller, were inaugurated today with picturesque ceremony by the King and Queen.

The maternity hospital and the nurses' home will face each other across the street, and when the stands were taken to erect a marquee over that thoroughfare and to turn it into a local court. The stones to be laid stood on either side and when the stands were filled, largely by physicians in scarlet gowns and nurses in gray uniforms and spot caps and aprons, the choir of St. Francis Church filled in, followed by the band of the Grenadiers in all their glory of gold and scarlet. The scene was singularly picturesque.

The King and Queen had chairs in the midst of the assemblage, and the ceremony began with presentations. Post Wheeler, American Charge d'Affaires, wearing his Princeton academic robes, led up a number of Americans, including Consul-General R. P. Skinner, Captain Hussey, naval attaché, and Dr. George C. MacLean, of the American University.

Royal Appreciation. Addresses to the King were read, and he replied: "In behalf of the Queen and myself, I thank you for your loyal and dutiful address. It gives us much pleasure to come here today for the double purpose of laying the foundation stones of the new obstetric hospital and nurses' home of the University College Hospital, and of the opening of the new anatomy building of the University College.

"We are conscious of the significance of the occasion. This is no ordinary extension of a hospital or of a college. The vast scale of the new development which we are inaugurating would be enough in itself to render it remarkable. There can be but few instances on record in which any foundation has received, like this college and medical school, £1,200,000 from a single benefactor in a single gift. The magnificent generosity of the Rockefeller trustees is more impressive since it is bestowed by a citizen of the United States upon a college and hospital in London, and thus upon the people of Great Britain and the Empire.

improvement of medical education and the advancement of science is a service to the whole world. Carefully chosen. "It is not, however, the great magnitude of the endowment which lends importance to this occasion. These buildings are designed for a new, far-reaching development in the traditional organizations of British medical education. I understand that this college and medical school were selected by the Rockefeller trustees for their beneficence from among many equally distinguished institutions, partly because the situation is central, and yet affords room for expansion, and partly because the close connection of the hospital and medical school provides favorable opportunities for that intercourse between medicine and the other branches of learning which is the surest defense against the evils of narrow specialism.

"I understand that the trustees were chiefly influenced by the establishment at this college of what has come to be known as the 'unit system' of medical training. The essence of the 'unit system' lies in effecting the closest possible correlation between the science and art of medicine, between research and education, and between theory and practice, and as a means to this end in placing the chief branches of medical education under the direction of a head who is free to devote his whole time to teaching, research and hospital practice.

"This is a substantial development of the traditional British system, which entrusts clinical teaching of medicine to men of distinction who are actively engaged as private practitioners. No appreciation can be too great for the devotion with which eminent physicians and surgeons have given and are giving, their services to the treatment of hospital patients, and the training of students, but the advance of knowledge and the ever rising standard of medical education has necessitated a reorganization which will give an impetus to more effective training and equipment of the British practitioner, with corresponding benefits to the health, well-being and happiness of the people.

"The underlying principle is as old as Ecclesiasticism, 'The wisdom of the learned man cometh by opportunity of leisure, and he that hath little business shall become wise.' Its specific application to medical education has not been made until now. At all events there are two features in the scheme of which the King has learned with particular satisfaction.

Queen's Special Interest. "The first is the maternity hospital and the nurses' home, of which it forms a part. It is unfortunately true that the present position is not wholly satisfactory, and that every year many lives are lost in childbirth and many women suffer injuries to health which might be prevented if better facilities for treatment were available. Two of the chief requisites for bringing about a better state of things are, to insure that medical men are well and efficiently trained for their work, and to provide maternity hospitals in which patients may be received.

"The Queen is also gratified that in allocating the endowment the claims of the nursing service have not been overlooked, provision having been made for the establishment of a new nurses' home. "We are glad to find that the medical school realizes absolutely the necessity of giving their nurses not only a thorough and scientific training in their craft, but also appropriate facilities for rest and recreation, without which continuous efficiency in their exacting duties is impossible.

"The privilege of accepting this magnificent gift of the Rockefeller trustees imposes an obligation upon the staff to fulfill the ideals which it represents, and upon the public to furnish the necessary support entailed. It is inconceivable that Englishmen should decline to welcome this generous challenge from our kinsmen across the Atlantic to friendly rivalry in medical skill and devotion. The beneficiaries cordially wish 'God-speed' to this great enterprise.

### HOME LIFE MENAGED

Never in the history of the world has the life of the family as a social unit been menaced as it is today. Social unrest, the independence afforded women by opening up almost every profession and every line of industry to them, equal rights with men, all of which are perfectly justified if not abused and women have the health and strength to carry out their inclinations in these matters. But alas, when a woman is almost at the point of breaking from her household cares and social life, to take on outside duties often means the breaking point, and homes are often neglected for lack of strength or some ailment develops because of overwork. Weak and ailing women will do well to remember that Lydia E. Pinkham's Vegetable Compound made from roots and herbs benefits 98 out of every 100 women who try it, and let it help them.

### STEEP STREET IN LONDON PROVED A TRAFFIC TRAP

Ancient Thoroughfare Is Closed to Prevent Additions to Accident List. London, May 18.—(By Mail).—Durham House Street, one of London's worst danger spots, has been altered by the Westminster City Council and is now closed to vehicular traffic at the Strand end, where a flight of steps are being built, says "The Westminster Gazette."

The quaint street, sloping down to the Strand, has long been a favorite haunt of the footloose and fancy-free. The Old Tivoli stage door once opened into it, and the side of the new cinema now looks on to it. A large part of the street runs under the Royal Society of Arts building in John Street and is closed in by brick huck arches. "I think the Westminster City Council is to be congratulated on having made the improvement," G. K. Menzies, the secretary of the Royal Society of Arts, said.

"With more or less regularity, at least once a week, we would hear a horse-drawn cart enter the street and the horse begin slipping. Once that happened, we knew what the rest would be. The horse would go plunging down, only to be brought up against the arches at the bottom, from where an ambulance would presently remove it."

Apart from these grim happenings Durham House Street has a considerable history. Its name comes from the residence of the Bishops of Durham, which originally stood on the spot. Queen Elizabeth may have lived here, and it was certainly from Durham House that the ill-fated Lady Jane Grey was taken to the Tower for execution.

Sir Walter Raleigh occupied the house for about twenty years, and was there when he was executed. It passed, with the whole of the Adelphi site, into the hands of Nell Gwynne, to whom it was given by Charles II.

CRASH IN FOG KILLS AUTOIST. London, May 19 (By Mail).—Norman Hastings of Horse and Foot Road, Brixton Hill, ran into a bank of fog at midnight while motoring on the main Epping Road near Thorowood, says a "London Daily Express" item. "He came in collision with a hay cart. The wheel came off the hay cart, and as the cart collapsed, a ladder on the rack fell on Mr. Hastings, breaking his neck. He was found dead beneath it.

### No Corns

The simplest way to end a corn is Blue-jay. Stops the pain instantly. Then the corn loosens and comes out. Made in a liquid and in thin plasters. The action is the same. At your drugist

### Country Folk Seek Culture More Than Those of the City

English Writer Finds Opportunity for Literature and Art and Does Not Always Imply High Intellect. London, May 20.—(By Mail).—The countryman is not so stupid as he is frequently represented, said Lord Selborne, addressing a meeting at St. Albans.

"During the years that I lived by choice in some of the wildest districts of England and Wales my town-loving friends often said to me: 'Don't you find country people very dull?' My reply was an emphatic 'no,' declares Walter Gullahan, in "The London Daily Mail."

"We are too apt to assume that opportunity for culture implies a high average of intellect. Upon returning to town life I was impressed by the general apathy in regard to new thought, social problems, art, and literature. 'I wandered in museums and art galleries and met very few city people bent upon culture! I was told that these institutions are visited chiefly by simple-minded countryfolk and intelligent foreigners. The people of the town were mainly occupied in a perpetual hustle to make a living, or to get rich, relieved by feverish efforts to discover new kinds of excitement as a means of recreation."

"The gregarious instinct which impels millions of people to herd together in a congested centre is often mistaken for the social instinct. A man with the true social spirit can be as social in a community of 500,000, as in a community of 50. My experience proves that there is more profitable and pleasant social intercourse in an average village than in a populous city. A crowd does not necessarily make a society. Country folk are notoriously more friendly and hospitable to strangers than townsmen."

"I will go so far as to say that there are as many amiable and interesting persons among a rural population of 1,000 as among the same number of folk in any given large city. In the country one has time for friendly intercourse."

"The cost of living is less than in town, and there is less need for incessant 'hustle.' Leisure is essential for thought, for relaxation, and for the gratification of non-material desires in a country life. This is why one finds so many original minds in the remote places of Arcadia."

In a Peak District village where I lived the butcher read Ruskin and could instruct me in the art of Michael Angelo. I had a grave-digger friend in a Welsh hamlet who read "The Aethnaeum" every week, studied the local botany and taught me many things. I have known two rustic shoemakers who were poets and a gardener who wrote upon natural history.

"Comparatively speaking, there is a much keener interest among country folk in serious debates, lectures, art and industrial exhibitions, regional history, music, amateur play-acting and good literature than among the urban population."

General Lord Cavan, chief of staff, competing in the army golf championship at Littlestone, Kent.

### TELLS DYSPEPTICS WHAT TO EAT

Avoid Indigestion, Sour Acid Stomach, Heartburn, Gas on Stomach, Etc. Indigestion and practically all forms of stomach trouble, say medical authorities, are due nine times out of ten to an excess of hydrochloric acid in the stomach. Chronic "acid stomach" is exceedingly dangerous and sufferers should do either one of two things.

Either they can go on a limited and often disagreeable diet, avoiding foods that disagree with them, that irritate the stomach and lead to excess acid secretion of the stomach. Or they can take a little Bisurated Magnesia at their meals. This removes the harmful acid and prevents the formation of gas, sourness or premature fermentation by the use of a little Bisurated Magnesia at their meals.

There is probably no better, safer or more reliable stomach antacid than Bisurated Magnesia and it is widely used for this purpose. It has no direct action on the stomach and is not a laxative. But a teaspoonful of the powder or a couple of five grain tablets taken in a little water with the food will neutralize the excess acidity which may be present and prevent its further formation. This removes the whole cause of the trouble and the meal digests naturally and healthfully without need of peppin pills or artificial digestants.

Get a few ounces of Bisurated Magnesia from any reliable druggist. Ask for either powder or tablets. It never comes as a liquid, milk or citrate and in the bisurated form is not a laxative. Try this plan and eat what you want at your next meal and see if this isn't the best advice you ever had on "what to eat."

A thirteen-year-old boy in Oklahoma was sentenced to be electrocuted recently.

### The Liver Is the Road to Health

If the liver is right the whole system is right. Carter's Little Liver Pills will gently awaken your sluggish, clogged liver and restore it to normal. Have constipation, stomach trouble, inactive bowels, loss of appetite, sick head. You need them. Purely vegetable. Small Pill—Small Dose—Small Price

### Woman Visits Asir, Where Liquor And Gold Are Forbidden

First European Traveler For Years in Territory Fends Smoking, Dancing, Use of Light After Dark Banned. London, May 10.—(By Mail).—Mrs. Rosita Forbes at Wignore Hall the other day described her recent journey through Asir. No European traveler has visited this quarter of Arabia, which lies along the Red Sea coast south of Hejaz and north of Yemen, for eighty years, says "The London Morning Post."

Mrs. Rosita Forbes' first difficulty was to get there. This she only accomplished after an eighteen months' correspondence with the Idirisi, the ruler of the country, and a journey from Port Sudan lasting a fortnight in an open boat, which included a narrow escape from shipwreck and an equally narrow escape from capture by a slave party. She was accompanied by a companion who was more dead than alive, and they were all thoroughly exhausted.

Mrs. Rosita Forbes had many interesting things to say about the life of the inhabitants. The most rigid asceticism is practiced. There are no cafes, neither smoking nor dancing is allowed and prohibition is, of course, rigidly enforced. Artificial illuminants are practically unknown, and thus every one literally goes to bed with the sun. The curfew is sounded three hours after dark by the beating of a drum, and after that no one is allowed in the streets. The women of the harem never leave their homes, where they all live together, usually in one room, and the use of gold is forbidden.

When Mrs. Rosita Forbes met the Emir, with whom she had what he described as a "short talk" that lasted from 6 p.m. till 2 the next morning with no refreshment except green tea, she presented him with a gold watch in ignorance of the ban on this precious metal, and the Sultan responded by throwing it out of the window. Mrs. Forbes did not say what happened to the unfortunate finder, but the Sultan showed that he wasn't really very angry by giving her a box of pearls.

If the Asiris do not enjoy many of the amenities of life, they have good appetites. A little dinner of two or three courses provided for Mrs. Rosita Forbes, who was traveling as an Egyptian woman, consisted of a couple of sheep roasted whole and stuffed with spices, little birds, rice and other dainties. In addition, there were eggs, and for drink many cups of tea, each flavored with a different herb. Living is cheap in Asir. Sheep cost six shillings, wheat is a halfpenny a pound, and for three halfpence you can have as many eggs as you want.

As there are no amusements there is nothing to do except work, pray and sleep. Society is protected by the Koranic law—an eye for an eye, a tooth for a tooth. The thief has his hand cut off, a penalty that was inflicted while Mrs. Forbes was there on a man who had been guilty of smoking. The murderer is beheaded, the local butcher acting as executioner. Couples guilty of marital infidelity are buried in the sand up to their armpits and then stoned to death, the cairns thus formed remaining as an example to others.

### KIDNAP RIVAL COLLEGIANS AND PAINT THEIR NOSES

English Students Also Doubt School Colors on Walls of Victims' University. London, May 20.—(By Mail).—Students from the six London university colleges raided the other day the Union Building at the Imperial Institute and painted its walls purple—the university color, says "The London Daily News."

The "rag" was in reply to the Imperial students' interference with the London University mock presentation at the Albert Hall last week, when certain waste paper baskets on which degrees were to be conferred were found smothered in paint.

About 9 o'clock yesterday morning six companies of about fifty students each met near the Albert Hall and captured the enemy building. A special section were armed with ladders, fire buckets, canvas buckets, paintpots and an assortment of brushes, which had been brought on a lorry. The ladders were put up and a score of students feverishly began to daub the walls with purple washable paint. The Imperial position was desperate until a party of between fifty and sixty outflanked the companies guarding the approaches to the building by charging out of the School of Mines towards the painters.

London's "G. H. Q." ordered a bugle to sound "cease operations" and the raiding students escaped into Kensington Road. Fifteen Imperial prisoners were taken to King's College, where their noses were painted purple. After making obeisance to the college mascot they were given a drink each and allowed to go.

The W. M. S. of St. Matthew's church held its final meeting of the season last night in the church rooms with the president, Mrs. W. H. Spencer, in the chair. The meeting was helpful and very interesting. Mrs. Charles Stevens was elected as the delegate to the Presbyterial.

In 1921 U. S. railways paid \$1,250,000 for accidents in which trains and auto collided.

### Rheumatism

A Remarkable Home Treatment Given by One Who Had It. In the year of 1898 I was attacked by Muscular Rheumatism. I suffered as only those who are thus afflicted know for over three years. I tried remedy after remedy, but such relief as I got was only temporary. Finally, I found a treatment that cured me completely and such a pitiful condition has never returned. I give it to a number who were terribly afflicted, even bedridden, some of them seventy to eighty years old, and the results were the same as in my own case.

### MUTT AND JEFF—AIN'T MUTT THE SARCASTIC THING?
