# TOO MUCH MISERY.

8

Dr. Talmage's Sermon on the Dangers of Wealth.

Uselessness of the Giant-Service of the Commonplace.

They Who Do the World's Work-The Divinity of Service.

WASHINGTON, Sept. 25.-From passage of scripture that probably no other clergyman ever preached from Rev. Dr. Talmage in this discouse sets forth a truth very appropriate for those who have unhealthy ambition for great wealth or fame. The text is 1 Chronicles xx. 6, 7:

"A man of great stature, whose fingers and toes were four and twenty, six on each hand and six on each foot. and he also was the son of a giant. But, when he defied Israel, Jonathan, the son of Shimea, David's brother slew him."

Malformation photographed, and for what reason? Did not this passage slip by mistake into the sacred scriptures, as sometime a paragraph utter-ly obnoxious to the editor gets into ent. his newspaper during his absence? Is not this scriptural errata? No, no; there is nothing haphazard about the Bible. This passage of scripture was as certainly intended to be put in the Bible as the verse, "In the beginning God created the heavens and the earth," or "God so loved the world that He gave His only begotten Son." And I select it for my text today because it is charged with practical and tremendous meaning. By the peo-ple of God the Philistines had been conquered, with the exception of a few giants. The race of giants is mostly extinct, I am glad to say. There is no use for giants now except to en-large the income of museums. But there were many of them in olden times. Goliath was, according to the Bible, 11 feet 41-2 inches high, or, if you doubt this, the famous Pliny de-clares that at Crete by an earthquake a monument was broken open, discovering the remains of a giant 46 cubits long, or 69 feet high. So, whe ther you take sacred or profane history, you must come to the conclusion that there were in those times cases of human altitude monstrous and appalling.

IMPOTENT GIANTISM. David had smashed the skull of one of these giants, but there were other giants that the Davidean wars had not yet subdued, and one of them stands in my text. He was not only of Alpine stature, but had a surplus of digits. To the ordinary fingers was annexed an additional finger, and the foot had also a superfluors addendum. He had 24 terminations to hands and feet, where others have 20. It was not the only instance of the kind. Tav-ernier, the learned writer, says that

shownaker at the end of the lane, rocking babies that are to be the Martin Luthers and the Faradays and the Edisons and the Bismarcks and the Gladstones and the Washingtons and the George Whitefields of the fu-ture. The longer I live the more I like the common folks. They do the world's work, bearing the world's bur-tin the state and made no effects for fibring the world's bur-tin the presence of appailing suffering and met the common folks. They do the world's work, bearing the world's burthe Gladstones and the Washingtons and the George Whitefields of the fu-ture. The longer I live the more I like the common folks. They do the the Gladstones and the Washingtons and the George Whitefields of the fu-ture. The langer I live the more I like the common folks. They do the world's work, bearing the world's bur-dens, weeping the world's consolation. Among lawyers we see rise up a Ru-fus Choate or a William Wirt or a Samuel L. Southard, but society would ability is that if such a one in his last the there were of the world and the money to celestial gene, and a pose that Trajan's arch or Constantine's arch or any other arch could not lequal. Those arches stand where they were planted, but this arch of the foot is an adjustable and want and made ho efforts for their relief. The charities of such people and want and mode ho efforts for their stand where they were planted, but this arch of the foot is an adjustable arch, and ready for movements in-numerable. The human foot, so fash-toned as to enable a man to stand up-right, as no other creature, and leave the hand that would otherwise have go to pieces tomorrow, if there were not thousands of common lawyers to see that men and women get their rights. A Valentine Mott or a Willard Parker rises up eminent in the medical profession, but what an un-limited sweep would pneumonia and diphtheria and scarlet fever have in the world if it were not for 10,000 common doctors! The old physician in his gig, driving up the lane of the farmhouse or riding on horseback, his medicines in the saddlebags, arriving on the ninth day of the fever, and prostrated with anxieties about keeping or investing these tremendous foroming in to take hold of the pulse of the patient, while the family, pale with anxiety, and looking on and waiting for his decision in regard to the patient, and hearing him say, "Thank God, I have mastered the case; he is getting well!" excites in me an admiration quite equal to the ention of the names of the great colltan doctors of the past or the illustrious living men of the pres-

USELESS ADDENDA. Yet what do we see in all depart-

ments? People not satisfied with or-dinary spheres of work and ordinary duties. Instead of trying to see what they can do with a hand of five fingers, they want six. Instead of usual endowment of 20 manual and peday addenda, they want 24. A certain amount of money for livelihood and for the supply of those whom we leave behind us after we have departed this life, is important, for we have the best authority for saying, "He that provideth not for his own, and especially those of his own household, is worse than an infidel," but the large and fabulous sums for which many struggle, if obtained, would be a hindrance rather than an advantage.

The anxieties and annoyances of those whose estates have become pleit. I think you all have, figuratively, as well as literally, fingers enough. Do thoric can only be told by those who not long for hindering superfluities. Standing in the presence of this fallen possess them. It will be a good thing when, through your own industry and prosperity, you can own the house in which you live. But suppose you own 50 houses and you have all those rents to collect and all those tenants giant of my text and in this post morto please. Suppose you have branched out in business successes until in al-most every direction you have investments. The fire bell rings at night; you rush upstairs to look out of the window to see if it is any of your mills. Epidemic of crime comes, and there are embezzlements and absconding in all directions, and you wonder whether any of your bookkeepers will prove recreant. A panic strikes the

76 years. OREW.—At Charlottetown, P. E. I., Sept. 27th, Charles W. Drew, in the 82nd year

the emperor of Java had a son endowed with the same number of extremities. Volcatius, the poet, had six fingers on each hand. Maupertuis, in his celebrated letters, speaks of two families near Berlin similarly equipped of hand and foot. All of which I can believe, for I have seen two cases of the same physical superabundance. But this giant of the text is in battle, and as David, the stripling warrior, had dispatched one giant the nephew of David slays this monster of my text, and there he lies after the battle in Gath, a dead giant. His stature did not save him: and his superfluous appendices of hand and foot did not save him. The probability was that in the battle his sixth finger on his hand made him clumsy in the use of his weapon, and his sixth toe crippled his galt. Behold the prostrate and malformed giant of the text: "A man of great stature, whose fingers and toes were four and twenty, six on each hand and six on each foot, and he also was the son of a giant. But when he defied Israel, Jonathan, the son of Shimea, David's brother, slew him"

THE USE OF EVERYDAY.

Behold how superfluities are a hindcourt. "Well," says somebody, "such overrance rather than a help! In all the loaded persons ought to be pitied, for their worryments are real, and their battle at Gath that day there was not a man with ordinary hand and ordin-ary foot and ordinary stature that was insomnia and their nervous prostration are genuine." I reply that they could get rid of the bothersome surplus not better off than this physical curiosity of my text. A dwarf on the by giving it away. If a man has more right side is stronger than a giant on the wrong side, and all the body and houses than he can carry without mind and estate and opportunity that you cannot use for God and the betvexation, let him drop a few of them. If his estate is so great he cannot man-age it without getting nervous dyspepterment of the world are a sixth finage it without getting nervous dyspep-sia from having too much, let him di-vide with those who have nervous dy-spepsia because they cannot get enough. No, they guard their sixth ger and a sixth toe and a terrible lance. The most of the good done in the world and the most of those who win the battles for the right are ordinary people. Count the fingers of their right hand, and they have just inger with more care than they did the original five. They go limping with what they call gout and know not that, five-no more and no less. One Dr. Duff among missionaries, but 3,000 like the giant of my text, they lamed by a superfluous toe. A few of them by charities bleed themselves of missionaries that would tell you they have only common endowment. One Florence Nightingale to nurse the sick this financial obesity and monetary in conspicuous places, but 10,000 wo-men who are just as good nurses, though never heard of. The "Swamp plethora, but many of them hang on to the hindering superfluity till death, and then, as they are compelled to giv the money up anyhow, in their last will Angel" was a big gun that during the civil war made a big noise, but mus-kets of ordinary caliber and shells of and testament they generously give some of it to the Lord, expecting, no doubt, that He will feel very much ordinary heft did the execution. President Tyler and his cabinet go down obliged to them. Thank God that one the Potomac one day to experiment in awhile we have a Peter Cooper, who owning an interest in the iron works at Trenton, said to Mr. Lester: "I do not feel quite easy about the amount we are making. Working under one of with the "Peacemaker," a great iron gun that was to affright with its thunder foreign navies. The gunner touches it off, and it explodes and we are making. Working under one of our patents, we have a monopoly which seems to me something wrong. Everybody has to come to us for lt, and we are making money too fast." So they reduced the price, and this this while our philanthropist was building Cooper Institute, which mo-thers a hundred institutes of kindness and userer all cover the land But the leaves cabinet ministers dead on the deck, while at that time, all up and down our coasts were cannon of or-dinary bore, able to be the defense of the nation and ready at the first touch to waken to duty. The curse of the world is big guns. After the politicians, who have made all the noise, go home hoarse with angry discussion on the evening of the first Monday in November, the next day the people, and ingrey all over the land. But the world had to wait 5,800 years for Peter Cooper! with the silent ballots, will settle ev-

erything and settle it right, a million THE MISER AND MISERY of the white slips of paper they drop, making about as much noise as the fall of an apple blossom. I am glad for the benevolent institu-

during their life where as stirgy as death, but who in their last will and Clear back in the country today there are mothers in plain apron and shoes fashioned on a rough last by a

een reached you human hand that when the Earl of many important things to others Bridgewater gave \$40,000 for essays on that you are apt to become the prey of others, and you are swindled eight books were written, Sir Charles defrauded, and the anxiety you had Bell wrote his entire book on the wis on your brow when you were earning dom and goodness of God as displayed your first \$1,000 is not equal to the in the human hand. The 27 bones in anxiety on your brow now that you the hand and wrist with cartilages and have won your \$300,000. ligaments and phalanges of the fingers all made just ready to knit, to sew, to

## MONETARY PLETHORA.

build up, to pull down, to weave, to The trouble with such a one is, he is write, to plow, to pound, to wheel, to spread out like the unfortunate one battle. in my text. You have more fingers The tips of its fingers are sommany and toes than you know what to do telegraph offices by reason of their set sitiveness of touch. The bridges, with. Twenty were useful; 24 are a hindering superfluity.

Disraeli says that a king of Poland abdicted his throne and joined the people and became a porter to carry speak as distinctly as the lips ... With dens. And some one asked him why he did so, and he replied: "Upon my honor, gentlemen, the load which I cast our hands we invite, we repel, we invoke, we entreat, we wring them in grief or clap them in joy, or spread off was by far heavier than the one you see me carry. The weightlest is but a straw, when compared to that weight under which I labored. I have formation of the giant's hand in the text glorifies the usual hand. Fashloned of God more exquisitely and lept more in four nights than I have wondrously than any human mechanduring all my reign. I begin to live and to be a king myself. Elect whom you choose. As for me, I am so well it would be madness to return to

you to use it for God and the lifting of the world out of its moral predicament. Employ it in the sublime work of gospel handshaking. You can see the hand is just made for that. Four fingers just set right to touch your neighbor's hand on one side, and your thumb set so as to clinch it on the other side By all its bones and joints and muscles and cartilages and ligaments the voice, of nature joins with the voice of God commanding you to shake hands. The custom is as old as the Bible, anyhow. Jehu said to Jenons-dab: "Is thine heart right as my heart is with thire heart? If it be, give me thine hand." When hands join in Christian salutation, a gospol electric-ity thrills across the paim from heart to heart, and from the shoulder of one

oulder of the other. With the timid and for their encount nt shake hands. With the troubled in warm hearted sympathy, shake hands. With the young man just en tering business and discouraged at the sales and the large expense shake hands. With the child who is new from Gol and started on an unending journey, for which he needs to gather great supply of strength, and who can hardly reach up to you now ise you are so much taller, shake hands. Across cradles and dying beds and graves, shake hands. With your es who have done all to defame and hurt you, but whom you can afford to forgive, shake hands. At the door of the churches where people come un, and at the door of the come un, and at the door of the churches where people go out, shake hands. Let pulpit shake hands with pew and Sabbath day shake hands with weekday, and earth shake hands with heaven. Oh, the strange, the mighty, the undefined, the mysterious, the eter-nal power of an honest handshaking! The difference between these times and the millennial times is that now some shake hands, but then all will shake hands, throne and footstool. across hands, throne and footstool, across seas, nation with nation, God and man church militant and church drive THE ERRANT FOOT.

testament bestowed money on hospit. Yea, the malformation of this fallen als and missionary societies, but for giant's foot glorifies the ordinary foot,

rags and her decreptiude and her body lisappeared, and in place thereof stood the Christ, who long ago said, "Inasmuch as ye did it to one of the least of these ye did it unto me," and who to purchase the service of our hand and foot here on earth had His own hand and foot lacerated.

FLOUR MILLS FOR DARTMOUTH

vona, McDougall, from Philadeipna for ogo. "assed Dungeness, Sept 26, bark Diana, k, from Hallfax for Hull." "Assed Sydney Light, Sept 27, ss, Arran-or, Bass, from Pensacola for West Har-pool; Regulus, Oross, from St. John's for dney; barks Lilly, Oben, Olucy, Ulster, m Sydney for Guif of St. Lawrence. "assed Reches Point, Sept 24, bark Rollo, pobson, from Chatham, NB, for Liverpool. n port at Harbor Bredon, Nfid., Sept. 14, Wellman Hall, Knowiton, from New ik for Sydney, C B. "assed Tarifa, Sept 25, bark Nostra Sig-ra del Monte, Razeto, from Bathurst, NB, Marseilles. (Atlantic Weekly.) an enterprise is on foot which pron och for Dartmouth. It has already ass important proportions. The question financial success has seemingly been red in the affirmative. The proposit ed important proportions. The question of its financial success has seemingly been an-swered in the affirmative. The proposition has been hearting endorsed by a number of practical men of ample means, it only re-mains to be put into operation. The despen-ing of the canals has been going on for years, but few here ever imagined it would ever be of any great importance to this port. Such, however, is the case. The cost of water car-riage is no much less than by rail that prac-tical men say the milling of western wheat can be carried on here at a great save over present prices. This is now being carried into effect. Plans and specifications for a four mill of 700 barrels daily capacity have been prepared, which will cost, when fully equipped, somewhere in the neighborhood of ti50,000. This will be supplemented by a steamer of a capacity of about 100,000 bushels which will convey grain from the great lake pot is direct to this port. The trade of Nova Socia, Newfoundhand and the West indies will be transported, giving the millers en-raged in grinding the ceresi a great advan-tage over present conditions. R. J. Matherson has been husting things when others have been asleep, and has near-py completed a high grade flouring mill with all the latest and best machinery. He will makes any kind of flour required, from pure familiations to the lower grades. The mill, pow in course of fitting is covered outside with teen sheathing over asbestos paper so that it will be practically firepriod and will also be of equable temperature inside. This sly been an-The proposition

be of equable temperature and best pattern, machinery is of the intest and best pattern, and the bins and everything has been put in of the best. All the bins are sheathed with fron, and use as smooth as possible. Every-thing will be perfectly clean and shielded from all possibility from contamination.
