

Legislation is required at once in this important matter. The "Municipal Act" and "Ditches and Watercourses Act" should be carefully criticised.

This Committee should, besides making an Annual Report, prepare one or more papers on this subject for publication in the Proceedings of the Association.

COMMITTEE ON MUNICIPAL ENGINEERING.

The work of this Committee will be, probably, more interesting to a large part of our Association than that of any other Committee.

It will have for its consideration, Sewerage, Water Supply, Street Paving, Roads, Bridges, etc.—subjects enough for a separate Association.

This Committee should prepare one or more papers for publication, and make an Annual Report.

COMMITTEE ON INSTRUMENTS.

This Committee should strive to bring before the notice of the Members of the Association all information obtainable regarding improvements in field instruments and office appliances, the recording of field notes, perpetuating boundaries, etc.

This Committee should also make arrangements with manufacturers of instruments, etc., to exhibit their manufactures at our Annual Meetings, and also arrange for exhibition of instruments belonging to Members of the Association.

COMMITTEE ON LEGISLATION.

This is probably the most important of Committees suggested, as upon the work done by this Committee depends much of the usefulness of the Association.

Its duties should be to draft and present to our legislators any bills that this Association may wish to become law, and endeavour to secure the passing of the same with as little mutilation as possible. They should also guard the interest of the profession by discouraging legislation thought to be unwise, unjust, or impracticable.

This Committee should act upon the recommendations of the second, third, and fourth Standing Committees, after the matter has been discussed at a General Meeting of the Association.

COMMITTEE ON PUBLICATION.

The duty of this Committee shall be to arrange for the publication of our Proceedings, including printing, lithographing, engraving, etc.

They shall also solicit advertisements from instrument manufacturers, bridge companies, drain tile manufacturers, stationers, etc., and see that the advertisements appear properly and correctly in the Proceedings.

This Committee should report to the Executive Committee immediately upon completion of its work.
