Plenty of Reserve Power

The guaranteed power rating of the White-Allwork is away under what the tractor will actually deliver. The big motor—5x6 inches—larger, we believe, than used on any other 3-plow tractor—actually develops 32 H.P. at the belt. It delivers 19 H.P. at the drawbar. We guarantee 14 H.P.

It is the sort of tractor you would expect in "The First Quality Line."

The White-Allwork will run a 16-inch ensilage cutter and

blower, or a 28-inch separator. The pulley is on a direct line with the crank shaft.

Put it on wet, heavy land or on rough land, and it has the power to go right along. Yet it weighs only 4800 lbs., won't pack the soil, turns in a 12-foot radius.

You know best what you are paying.

Let us tell you what a White-Allwork will do, and what it costs to use it. Then decide for yourself whether it will save you money or not. Write to-day for full information.

Kelsey Ball-Thrust Bearings for Ford Cars

will save your differential gears and make your car run smoothly. The Kelsey Ball-Thrust saves four times their cost. Ask your supply man about them—Tell him to put them in your Ford.

Further, equip your Ford car with

Kelsey Demountable Rims

You can then carry a spare tire on the extra rim, and in case of tire trouble the change can be made in a jiffy. The complete outfit supplied by Ford Service Garages everywhere. Kelsey Wheel Company Limited, Windsor, Ontario

MITERED BEVELED SPOKES eliminate trouble

Save Your Threshing Bill! The Grain-Saving Stacker Puts Your Grain in The Sack—Not In The Stack

REPORTS of leading grain farmers and experiment stations show the actual saving of 10 to 25 bushels per thousand threshed last season by the use of the Grain-Saving Wind Stacker. This was with dry grain and separators never overloaded. Under ordinary conditions of straw and moisture the Grain-Saving Stacker makes a much greater saving.

"We threshed 36 days. The Grain-Saving Stacker got a good bit of threshing from us and saved enough to pay the threshing bill."
McCall Brothers, Seaman, O.

The Grain-Saving Stacker

has a device in the hopper which returns to the separator the grain that otherwise goes to the straw stack and is lost. You need never again have a green straw stack—sprouting from wasted grain. Booklet fully illustrating and describing the Grain-Saving Stacker will be sent you by any of the manufacturers named below—the makers of North America's standard threshing machines, agricultural tractors and implements.

View looking into hopper showing grain trap near separator fan; also auger running from beneath trap for returning the saved grain to separator.

Write to Any of These for Booklet:

The Grain-Saving Device Originated with The Indiana Manufacturing Company, Indianapolis, Ind., Who Also Originated the Wind Stacker

Your Home Needs Hot Water Heating

Old fashioned heating methods are expensive, unsanitary, and unsatisfactory. Stoves and hot air furnaces are being abandoned. Real Estate men find it hard to sell houses that have not hot water heating because people will no longer put up with the inconvenience and inefficiency of old methods. If your house does not have Hot Water Heating, it will pay you in Health, Comfort and in Money to take out the old and put in the newer and better kind.

KING HOT WATER BOILERS AND IMPERIAL RADIATORS

The most improved ideas in generation and radiation of heat are combined in King Boilers and Imperial Radiators. If you are interested, let us send you our descriptive literature. We will be pleased to supply you with information as to size and cost, without obligation. Write us NOW.
