

Why are all Fords equipped with

Champion

Dependable Spark Plugs

Every Ford owner will find the answer in the Ford instruction book, which says:—

"The make of plugs with which Ford engines are equipped when they leave the factory are best adapted to the requirements of our motors."

Since 1911 Fords have been, and are now, "Champion" equipped.

For motor owners who have

other makes of cars we have developed a type of spark plug to give that same unfailing dependability for which Ford motors are known.

You can place absolute confidence in Champion Spark Plugs to carry you through any emergency condition that your engine will stand up under.

The right plug has "Champion" on the insulator as well as on the box.

Shinn-Flat Protects Property

A Circle of SAFETY

Shinn-Flat throws a safety belt around every building on which it has been installed. With thousands of buildings throughout Canada and the United States protected for years, it is a fact that no building has ever been damaged by lightning that was properly rodded with Shinn-Flat.

Lightning Rods

Make yourself, your family, your cattle, your crops, and your buildings safe against Lightning, by having them protected by Shinn-Flat Lightning Rods.

The cost of Shinn-Flat is very small compared to the value of the protection. It is money well spent if only for the comfort of mind it gives. Write for full information and a copy of Prof. Day's interesting book on "Lightning, Its Cause and Control." It is free.

SHINN MFG. CO. OF CANADA, LIMITED
Prof. W. H. DAY, Secretary and General Manager.

How the Heat Travels from Room to Room When You Have a **Pilot Superior Pipeless Furnace** Installed in Your Home

The circulation of the air in Pilot Superior-heated buildings may in a measure be compared to the movement of water. Let us imagine that instead of warm air water is being circulated through the register. This water will flow from room to room in which the register is located, through the open doors and passage-ways into every part of the building, the level remaining the same in all rooms. As the volume of water increased, the depth becomes greater, until the entire contents of the building is filled.

In much the same manner the warm air is distributed from the room in which the register is placed, to every part of the building, the difference being that warm air, according to natural laws, rises to the highest level, and as the volume is increased it lowers in the building, while with water the level raises as the volume is increased.

Manufactured by **The Hall Zryd Foundry Company, Limited Hespeler, Ontario**
