

Frost & Wood No. 3 Binder Has a Strong "Back Bone"

Dropping into a furrow harder than intended, or accidentally striking a boulder, does not "wreck" our No. 3—because it is built to stand more "hard knocks" than a binder is commonly supposed to encounter. The No. 3 Main Power Frame—the binder's "back bone"—consists of heavy pieces of steel firmly rivetted together. The Platform is connected to the Main Power Frame by a Double Steel Brace (see illustration). Hard work and rough ground have no effect on this brace. Certainly, no possibility of it sagging. Indeed, every single part of the No. 3 is of the best material, securely bolted, rivetted or welded to some other part. It's the QUALITY, in material and workmanship, that we put into our binders that enables them to beat, by five times over, the two or three seasons' durability-record of other binders. Why, we know owners (names on request) of Frost & Wood binders who have run their machines for 12 to 15 years, with practically no expense except for sections and oil.

"Canadian" conditions are "different" from those prevalent in other countries. It is well for the "Canadian" farmer to remember this. He will find it will pay him to purchase from a Canadian Company who know the requirements of the different sections and who build their machines accordingly. The Frost & Wood Co. have been manufacturing Farm Implements for the last 70 years and have the very best and most prosperous farmers as customers.

Frost & Wood organization covers Canada from Atlantic to Pacific. Branch Warehouses in New Westminster, Calgary, Edmonton, Regina, Brandon, Winnipeg, Toronto, London, Ottawa, Sherbrooke, Montreal, Quebec, St. John, Truro and Charlottetown. Your "local" agent can thus on shortest notice obtain for you (if he hasn't it on hand himself) any Frost & Wood Machine or part thereof that you may desire.

The FROST & WOOD CO. Limited
SMITH'S FALLS, CANADA

The No. 3 cuts, binds and ties all kinds of grain—whether light, heavy, short, long, broken or lodged. It's no "quitter"—never goes to the fence. You always can count upon the No. 3 to do more than its share of the hard work connected with Canadian Harvesting.

Write for Binder Catalogue # 2 and become thoroughly familiar with construction of this strongest yet lightest draft binder

The Guardian of Your Buildings

The finest thing about REX Roofing is the sense of security it gives. You don't have to worry about REX. You know that a building roofed with it, is roofed as well as can be, and protected as thoroughly as can be. The hardest storm cannot get water through it, nor blow it off; the hottest sun cannot melt it nor open its seams; falling sparks cannot ignite it.

REX FLINTKOTE ROOFING

Is durable; it is good all through. Its body is high grade, long-fibre wool felt, heavy, dense and durable; the saturation or water-proofing is slowly worked in until the body is thoroughly impregnated with it—REX saturation will never dry out; the coating is of special rubbery, gummy compounds that unite with the body and the saturation.

WRITE for BOOK and SAMPLES, FREE

The book will tell you all about Rex Flintkote Roofing. The samples will enable you to test its properties.
