

C.M. B. A.

London, February 19th, 1884.

To the members of the C. M. B. A. in Canada:

Brothers—As your Grand Recorder, and one who has become thoroughly conversant with the requirements of our Canadian C. M. B. A. Branches, and taken a deep interest in their progress and welfare, I would advise that there be no further discussion, through the press, on the question of "separation" of Canadian Branches from the United States. I am convinced no good would be derived from a public discussion of such questions; but there can be no objection whatever to Branches at their meetings discussing any C. M. B. A. matter under the lead of "new business," or "good of the Association," and passing resolutions thereon, in order to instruct their representatives and delegates to our Grand Council Convention that they may faithfully represent the interests and wishes of their Branches.

Two important questions were referred by the Supreme Council to Branches for discussion before our next convention, viz., the \$10000 Beneficiary, and a C. M. B. A. Sinking Fund. These matters should receive very careful consideration; a great deal can be said both for and against them, and they should not be disposed of too hurriedly.

At the last Supreme Convention a great mistake was made in changing the time of holding our Grand Council Conventions from August to May, New York, Pennsylvania and Canada Councils are very much opposed to said change, and the Grand Councils must be allowed their choice in this matter. I am certain it would be much better, and more satisfactory to all concerned, if our biennial Grand Council Conventions were held the second week in July, and the Supreme Conventions the last week in August; we would then have the two conventions during the holiday season, a time convenient for all classes (except perhaps farmers) to attend. During the past term the Association has been very successful, but nowhere is its progress more noticeable than in Canada. At our last convention we had in Canada 18 Branches, and 560 members; we now have 30 Branches with 1,120 members, and prospects of 2 or 3 more Branches before our convention in May. This is a greater percentage of increase in both Branches and membership than all the rest of the association combined.

Since the formation of our Canada Grand Council we have had in our jurisdiction 11 C. M. B. A. deaths, the beneficiaries of which were paid within the constitutional time by our Supreme Council. A source of great inconvenience, and no small amount of dissatisfaction, is that part of our constitution by which our Grand Council is compelled to procure to C. M. B. A. supplies in the United States. Apart from the great delay this occasions, we have to pay 20 per cent. duty on all blank forms, and 15 per cent. on books, and from 50 cts. to \$1.50 express charges on the packages. It would be a great saving, and do away with a vast amount of grumbling, caused by the delay, if your Grand Recorder were permitted to procure our supplies in Canada; and I hope our Supreme Council will give this a favorable consideration. I can get all our supplies in Canada for one half what we now pay.

Supreme President Riester very kindly writes me that "if special laws on those matters are required for Canada he cannot see why our Grand Council cannot have them enacted." If the other members of our Supreme Council would view those questions with a similar spirit of justice as our worthy Supreme President, there would certainly be no cause whatever for any dissatisfaction.

During the year 1883 we had 56 C. M. B. A. deaths. One hundred and twelve thousand dollars (\$12,000) paid to the widows and orphans of our deceased brothers! Is not this a grand and truly Christian association? Yes, gentlemen, let us all work, irrespective of nationality, for the continual spread of our noble C. M. B. A.

Assessment No. 1 has been issued for the first death that occurred in 1884. Some Branches have not yet paid No. 15 assessment; they are requested to remit amount of this assessment as soon as possible.

On the 15th inst. Mrs. O'Flaherty received the sum of \$8000, beneficiary due her from the Association on the death of her husband, late of Branch No. 4, London, Ont.

At a late meeting of Branch No. 23, Seaforth, resolutions were adopted opposing the introduction into the C. M. B. A. of the \$1,000 Beneficiary, or half rate scheme, and requesting the Grand Council to not favor such a system. The members of said Branch advanced some very good reasons in favor of their resolution. They are also anxious to have the C. M. B. A. under our Grand Council, incorporated in Canada.

pointed registrar for the County of Peterborough.

Here, as elsewhere, those forming this new Branch belong to the most prominent and energetic class of the Catholics of the parish; and being most fully instructed, and having a good understanding of the advantages of belonging to the C. M. B. A., are enthusiastic in its praise, and will at once work earnestly to increase its membership.

Peterborough is a flourishing inland town, the population in and around the town being largely Catholic; a large number of the leading professional and business men of the town are of that faith, and of these this Branch can claim several of the foremost.

It can well be said that among the membership of the C. M. B. A. in Canada, it can show a very large share of the leading men, both clergy and laity, of the localities where Branches exist. Our special deputy was so warmly received, so handsomely treated, and made to feel so much at home by his worthy Peterborough friends, the evening's proceedings so well appreciated, the officers of the new Branch performing for the first time their duties with so much tact, and the vote of thanks to our deputy so warmly tendered, that he feels it his duty to publicly return his thanks to the members of Branch No. 20 for the numerous courtesies so cordially extended during his short stay.

The following are the first Officers elected:—Spiritual Adviser, Rev. Father Conway; Representative to Grand Council, John O'Meara; Alternate to Grand Council, Joseph Griffin; Medical Examiner, J. F. O'Shea, M. D.; President, Joseph Griffin; 2nd Vice President, Wm. Sommerville; Rec. Sec., M. Sullivan; Asst. Rec. Sec., James H. O'Shea; Financial Sec., M. J. Giroux; Treasurer, M. Quinn; Marshall, M. Halpin; Guard, M. O'Donnell; Trustees for one year, M. McFallen, M. O'Donnell, J. Dunigan; Trustees for two years, J. F. O'Shea, M. D., M. O'Heron; Chancellor pro tem., M. McFallen.

On motion of the 1st Vice President, seconded by the Chancellor pro tem., the thanks of Branch No. 20 was tendered to Mr. W. Deane, Special Deputy, for the very satisfactory manner in which he conducted the organization of the Branch, and for the valuable instructions and advice given to him, and for his trouble in coming to Peterborough for that purpose. The President spoke very appropriately on putting the motion, which was carried most enthusiastically.

The regular meeting nights will be the first and third Tuesdays of each month. Two more charter members will be admitted at the next meeting.

Meggs vs. Bugos is the talk of the city—Go.

Artemus Ward and General Lee. "What was the question, Colonel, you wished to put to Friend Browne?" said the proprietor, whose ruddy countenance shone with pleasure.

"Well, simply this: partly for my own satisfaction and partly to answer those who have asked me the question, Pray, Mr. Browne, did you fight against us during the war?"

"This was uttered in all sober earnestness. We felt that it was out of place, and yet we couldn't help admiring the Colonel's genuine honesty and simplicity of purpose and feeling."

Artemus' eyes twinkled, though his face was composed and his manner serious, as he answered: "Since I came South, Colonel, I have been frequently asked that question. Permit me to answer after my own fashion." He drew himself up and folded his arms. We drew closer around him, anxious to hear the humorist for once express himself seriously.

NAPOLEON THE GREAT.

HIS INFIRMITY REPEATED IN THE EXPERIENCE OF A LEADING PUBLIC MAN—TRUTHS FOR THE AGE.

Syracuse, N. Y., Courier. "How long has he been in public service?"

"Before the memory of the oldest inhabitant."

"And he has kept his name untarnished during all that period?"

"Absolutely!"

"He is a man I should like to meet."

The above conversation occurred between two gentlemen at a party last night. The interrogator was from abroad, the other a resident of this city.

The conversation had drifted into politics and Hoa. Thomas G. Alford was the man whose record and qualities were being discussed.

To trace the history of public men who have grown old in the service is a task both interesting to the investigator and entertaining to those who read his investigations.

It was with this truth in mind that the writer set out to call upon the man, about whom those politicians were so earnestly talking, at his spacious residence on Turtle street.

Mr. Alford, who has been and is, familiarly known as "Old Salt," owing to his advocacy of the salt interest, is now well advanced in years, being over the shady side of seventy.

He has long, white hair and a snowy beard which give him an appearance both dignified and grand. His voice is full and clear and the momentary stranger comes into his presence he cannot but be impressed with the inherent power of the man.

Indeed he was endowed by nature with an unusually strong organization, both mentally and physically, which all the strain of public life, both as speaker of the Assembly and Lieutenant-Governor, failed, for many years, to in any way undermine.

It was during the year 1851, while Mr. Alford was a member of the Assembly at Albany, that he first began to feel most peculiar sensations. At that time he was in the midst of very important work, which was seriously interfered with by reason of the mysterious troubles which seemed to assail him.

He felt unaccountable nausea almost constantly accompanied by occasional violent retchings. History recounts that Napoleon the Great, while in the midst of his public career, was frequently attacked by an enemy greater than any he had ever faced, which came in the same insidious yet violent manner as the terrible troubles that overtook Mr. Alford, and are to-day menacing so many thousands of others.

In speaking on this subject to the writer, Mr. Alford said:

"This same bitter experience came to me again in 1852 while I was a member of the Assembly, with symptoms identical with those I had felt the year before. I believe it was largely caused by my advanced years, for I had a 'worn out' feeling that was terrible. This conclusion is evidently the correct one, for I was again attacked last summer while away from all cares and recreating at my Island in the St. Lawrence river. I experienced a painful sense of fulness in the lower portion of the body, accompanied by sensations of feverish heat or chilling shudders. All efforts to move my limbs or body were followed by intense weariness or exhaustion. Those who have reached my years can appreciate my sensations."

"And did neither yourself nor the physicians understand the cause or nature of these troubles?"

"It seems not entirely, for the physicians failed to relieve me and I kept growing worse. I suffered intensely and the only relief I could possibly obtain was by lying upon my back, and this was only temporary."

"But you are looking well and strong now Mr. Alford. How did you bring about the change?"

"By using a remedy which is very popular, and which I have found wonderfully efficient—Warner's Safe Cathartic has proven remarkable in its power over me. I believe in it and therefore recommend it to others, especially to those who are advanced in life; who feel a breaking down, or a feverish heat, or whose lost vitality and vigor remind them of their increasing years."

The interview then drifted to other topics, but as the reporter gazed at the man whose experience is so ripe and who has seen so much of the different phases of life he could not but wish that those who are suffering from the various forms of physical ailment, and especially those persons who are advanced in years, might see and converse with the veteran whose experience and knowledge has been so rich and who is so firm a believer in the efficacy of the remedy that cured him.

There is no excuse for shortening life as so many have done and are doing. There is no necessity for "breaking down" early in years. Premature decay and death are a disgrace to our modern civilization. They are wholly needless and men and women who permit them when they can be so easily avoided should blame no one but themselves.

Meggs vs. Bugos. Branch of Promise Case, Monday night.

Mr. James Purcell, of Seaforth, has accepted the agency for that valuable work, The Canadian Home, Farm and Business Cyclopedia.

The Connecticut farmer who recently assaulted his wife and broke her leg, because their children were all girls, was serendipitously freed by a Connecticut surprise party with a gun and feather accompaniments; but he spoiled the programme by filling one of the visitors with bird shot. Connecticut is a splendid missionary field.

The director of a matrimonial agency in Paris says the young girls ask only "Who is he?" the young widows, "What is his position?" the old widows, "where is he?"

Meggs vs. Bugos. Hundreds turned away at last hearing.
