TORONTO.

**SEASONED SECURITIES**

This Corporation was established in 1855, and for sixty years has been steadily growing in strength and in the confidence of the depositing and investing public. In that long period there have been "hard times" as well as seasons of prosperity, but the moneys entrusted to our keeping have always been ready when called for.

The Corporation's bonds are, therefore, a "seasoned security." They are issued in accordance with the restrictive provisions of the Corporation's Charter, and also those with which the Legislature circumscribes the investment of Trust Funds. More than Ten and one-half Million Dollars of Shareholders' Money are a further pledge of their security.

These bonds may be had in sums of One Hundred Dollars and upwards.

At the recent Annual Meeting of The Great-West Life, Mr. G. W. Allan, K. C., remarked:

"The highly congratulatory statement by Mr. King (the eminent Consulting Actuary) together with our Actuary's report on the surplus, indicate that all is well with the Company. That we have now for several years maintained a scale of profits to Policyholders unequalled in liberality, and that we can confidently expect an indefinite continuance of past results, is extremely gratifying to the Directors, as it must be to all connected with the Company."

Scores of these unequalled profits are recorded in the booklet "Deferred Dividend Policies 1915."

**Can Life Be Lengthened?**

This is a problem that for centuries has engaged the attention of the world's greatest thinkers. Research and experience have conclusively proved that

**Total Abstainers Live Longer**

than non-abstainers. The reason for this, and the consequent reduction in rates of insurance extended to applicants of this class by that old-established company

**The Manufacturers Life**

is well explained in an attractive little booklet issued and entitled, "Total Abstainers vs. Moderate Drinkers." This may be had on application. Write for it to-day. The information it contains may surprise you. A Postcard will do.
