

PRACTICALLY GIVEN UP TO DIE

"Fruit-a-lives" Cured Kidneys and Bladder

WILLIAMSTOWN, ONT., July 27th, 1910
"I have much pleasure in testifying to the almost marvelous results I have derived from taking 'Fruit-a-lives'. I was a lifelong sufferer from Chronic Constipation, and the only medicine I ever secured to do me any real good was 'Fruit-a-lives'. This medicine cured me when everything else failed. Also, when everything else failed. Also, these complaints for me, when the physicians attending me had practically given me up.
I am now over eighty years of age and I can strongly recommend 'Fruit-a-lives' for Chronic Constipation and Bladder and Kidney Troubles."
JAMES DINGWALL
'Fruit-a-lives' is the only medicine in the world made of fruit juices—and is the greatest kidney, bladder and liver medicine ever put on the market. 100 a box, 6 for \$2.50 trial size, 25c. At dealers or sent postpaid on receipt of price by Fruit-a-lives Limited, Ottawa.

White Ribbon News.

Woman's Christian Temperance Union first organized in 1874.
Aim.—The protection of the home, the abolition of the liquor traffic and the triumph of Christ's Golden Rule in custom and in law.
Motto.—For God and Home and Native Land.
Back—A knot of White Ribbon.
Watchword—Agitate, educate, or organize.
OFFICERS OF WOLFVILLE UNION.
President—Mrs. L. W. Sleep.
1st Vice President—Mrs. J. Kaye.
2nd Vice President—Mrs. F. Woodworth.
Recording Secy.—Mrs. W. Mitchell.
Cor. Secretary—Mrs. G. Bishop.
Treasurer—Mrs. H. P. P. P.
Auditor—Mrs. T. E. Hutchinson.
SUPERINTENDENTS.
Evangelists—Mrs. J. W. Brown.
Mothers Meetings—Mrs. Stackhouse.
Luncheon—Mrs. J. Kempson.
Peace and Arbitration—Mrs. J. Reid.
Temperance in Sabbath-schools—Miss A. S. Fitch.
Juvenile Work—Mrs. B. O. Davidson.
Parlor Meetings—Mrs. (Rev.) M. G. G.
Press Work—Miss Margaret Barrs.
Flowers, Fruit, and Delicacies—Mrs. J. Kaye.
Labs of Relief Work—Mrs. Woodworth.
Narcotics—Mrs. Blackney.
Regular Business Meeting last Friday in each month at 3.30 p. m., in Temperance Hall, Labrador, meeting at the homes of the members 1st and 2nd Tuesday evenings in the month.
The Women's Christian Temperance Union of this town feel they completed a most successful winter's work. In their department of Labrador and Home Relief Work besides the large amount of help given to needy cases in the town three large boxes were packed and sent to Labrador.
The membership take this opportunity of thanking all who so kindly assisted in any way. To Mrs. Marshall and staff of Chipman Hall who pieced and quilted one large quilt; to Mrs. Murphy (charter member) who pieced together one quilt; to Mrs. Geo. Fitch (charter member) who knit one large wool shawl; to Mrs. J. Kempson, one large package for hospital; to Miss Fraser whose interest in the work led her to solicit friends in New Minas to contribute a large amount of clothing, etc.; to the purchasers of the town for contributions. The boxes contained in all nine quilts, twenty men's suits, boys' heavy underwear, twenty-four overcoats, nine caps, hand knitted socks, mittens, one dozen knitted work clothes, infants' and children's clothing, men's suits, night dresses, mufflers, boots and shoes, a large amount of reading matter, etc.
C. MITCHELL, Secy.

WOMAN SICK FOR YEARS

Wants Other Women to Know How She was Finally Restored to Health.
Hammond, Ont. — "I am passing through the Change of Life and for two years had hot flashes very bad, headaches, nervousness in the back of head, was constipated, and had weak, nervous feelings. The doctor who attended me for a number of years did not help me, but I have been entirely relieved of the above symptoms by Lydia E. Pinkham's Vegetable Compound, Blood Purifier and Liver Pills, and give you permission to publish my testimonial."—Mrs. LOUIS BRADGATE, Jr., Hammond, Ont., Canada.
Canada. — "I can highly recommend Lydia E. Pinkham's Vegetable Compound to any suffering woman. I have taken it for female weakness and painful menstruation, and it cured me."—Mrs. DEVERE BARBOUR, Harvey Park, New Brunswick, Canada.
Lydia E. Pinkham's Vegetable Compound, made from native roots and herbs, is a natural and harmless remedy, and today holds the record of being the most successful remedy for female ailments we know of, and thousands of voluntary testimonials on file in the Pinkham Laboratory at Lynn, Mass., seem to prove this fact. Every suffering woman owes it to herself to give Lydia E. Pinkham's Vegetable Compound a trial.
If you want special advice write to Lydia E. Pinkham, Lynn, Mass. Your letter will be answered, read and answered by a woman who has had the same troubles as you. Every letter is answered in the most sympathetic and helpful manner. Write to her in confidence. Her name is Lydia E. Pinkham, Lynn, Mass. Her address is 233 State Street, Lynn, Mass. Her telephone is 1234.
Teacher—You see, but the lamb been obedient and stayed in the fold it would not have been taken by its wolf would it?
Boy—No, ma'am, it would have been taken by a dog.

It Is Whispered.

That the difference between honor and discretion is, that honor tells you not to hit a man when he's down, and discretion warns you to be careful about hitting him when he isn't down.
A typical friend of mine insists that the fewer relations or friends we have the happier we are. In their poverty they never help you—in your prosperity they always help themselves.
That the youth who left off his overcoat to enjoy a balmy spring is helping pay off the mortgage on his doctor's house.
That it is best not to judge of the quality of a cigar by the picture on the box cover.
That a western editor thus kindly alludes to a contemporary, "He is young yet; and he can sit at his desk and brush cobwebs from the ceiling with his heels."
That a family is like unto an equipage. First, the father, the draught horse; next, the boys, the wheels for they are always running around; then the girls, they are surrounded by fellows. The baby occupies the lap-board, and the mother, well, what's a wagon without a tongue, anyhow?

Skin Soft as a Child's.

It was a great sufferer from eczema and skin disease for years, writes Mr. John W. Nass, Leavenworth, N. S. "Five years ago three boxes of your Chamberlain's Ointment cured me, and the skin never returned to its former condition. I am now a child's skin, and I shall always give a good word for your Ointment."

Ploughing by Electricity.

In Germany, where considerable attention is given electrical devices on the farm, the evolution of an electric plow is reported to be meeting with some success. Louis J. Magee, an American who has long followed this line of development in Germany, gives a full account of experimental work there. The German plough is constructed somewhat along the same general lines as the Italian, both being modeled after the English Fowler steam plow.
The German type calls for a 30 to 35 horse power motor. With the improved machine, (furrows 1500 feet long and 14 inches deep, have been made. Working a three share plow, about 9 acres of land can be gone over thoroughly in a day. The cost of electricity ranged from 60 to 90 cents per acre. The estimated output for equipment of the German plow is about \$5,000.

Bad Cold in the Chest.

"I am happy to tell you that I used Dr. Chamberlain's Syrup of Limes and Peppermint, and was promptly cured of a very bad cold in the chest."—Mrs. Josephine Gauthier, Dover, N. H. You can depend on Dr. Chamberlain's Syrup of Limes and Peppermint to relieve and cure all colds, coughs and irritations of the throat and bronchial tubes.
"What a lively baby," said Phyllis. "Have you had his picture took yet?"
"Not yet," said Pogarty, the proud father. "We tried to, but either an hour's lost labor the photographer referred us to the movin' picture studio."

Boy—No, ma'am, it would have been taken by a dog.

Girls and School.

A bulletin entitled 'Why Girls Leave School,' issued from the United States Bureau of Education as the result of careful investigation, denies that the majority are taken from their classes to earn money for their parents. From one-half to three-fourths of the girls at work in the factories of a Massachusetts town could have had further schooling if they had desired or if their parents had insisted upon it. When interviewed they gave various reasons for refusing to study longer. Some said they did not like school; others could not get along with the teacher and were not promoted, while many simply "wanted to go to work."
The bulletin concludes: "Conditions such as were found emphasize the imperative need for special training of a practical sort for girls between the ages of thirteen and fifteen. Not getting the kind of training they might have liked and would have profited by, they blindly joined the army of shifting, inefficient, discontented factory girls to another, and because of their lack of training, rarely rise above the class of 'low-paid, unskilled workers.' Similar conditions exist in Canada. Technical and industrial education will do something to improve them, but many of us wish that the world could revert to a state of society under which fathers and husbands could support their woman kind without any assistance from female and child labor."

Take Plenty of Time to Eat.

There is a saying that "rapid eating is slow suicide." If you have formed the habit of eating too rapidly you are most likely suffering from indigestion or constipation, which will result eventually in serious illness unless corrected. Digestion begins in the mouth. Food should be thoroughly masticated and swallowed. Then when you have a fullness of the stomach or feel dull and stupid or eat, take one of Chamberlain's Tablets. Many severe cases of stomach trouble and constipation have been cured by the use of these tablets. They are easy to take and most agreeable in effect. Sold by all dealers.

An Ideal Editor.

Wanted, an editor who can read, write and argue politics, and at the same time be religious, funny, scientific and historical at will, write to please everybody, know everything without asking or being told, always have something good to say about everybody else, live on wind and make more money than enemies. For such a man a good opening will be made (in the grave yard).
A couple of Irishmen were watching the bricklayers working on a building that was being erected.
"Say, Tim," said Larry, "kin you tell me what it is that keeps them bricks together?"
"Shure," Tim replied, "it's the mortar, me boy."
"Go on," said Larry, "nothin' you kin; that keeps them apart."

KAISER'S WAR CHEST CAREFULLY GUARDED

Many Millions of Dollars Locked up in Treasure—Carefully Counted Yearly
We hear much of the perfection of the German military organization especially of its preparedness for war, but little of what is perhaps its most extraordinary feature—namely, the Kaiser's War Chest. The Kaiser's war chest is kept in the Julius Tower at Spandau. This fund is reserved from the French indemnity payment, and has so been increased that it now amounts to something over a hundred and twenty millions of dollars.
The Kaiser's war fund is reported to be kept in iron chests, is carefully guarded by the names and addresses of commanders of army corps and divisions of the Reich. These packages would be immediately despatched to the commanders named in the event of war. Special sums have been set aside for contingencies on the frontier in the vicinity of the outbreak of hostilities. There are also set aside special sums to be used for special purposes, such as the secret service. It is said that for the most part this treasure consists of ten and twenty mark pieces, and that there are, however, quantities of coins of all the great powers, principally France, Great Britain and Russia.
At stated times during the year all this treasure is opened, weighed and counted by army officers specially detailed by the emperor from all parts of Germany. It is a feature of the count that prior thereto these officers must give their word of honor that they do not know one another. Furthermore, although the war funds are in charge of a special officer at the tower, he is not always advised of the proceedings beforehand. In such event, it is only when the Kaiser's special deputies have finished their task that this officer is called to check the accounts.
The defence of the tower is entrusted to the Fourth Grenadier Regiment and a battery of the Third Grenadiers. There is also stationed within the citadel the Third Train Battalion, which is ever ready to combat the war measures to the various destinations assigned it.
At irregular hours of the night the tower is searched for thieves. During this search the sentinels hold their arms ready to shoot any suspected person who enters the tower. At the bottom of the water level, there is a guard room the inmates of which are detailed to prevent the possibility of a robbery by means of tunnels. Then there is a second guard room behind the entrance door. The purpose of this is to defend the entrance and, still case leading to the vaults.
Then, too, before each of the vault openings by the wheel in front. To stretch a pair of gloves, draw them over the forms snugly. Then turn the lever and the movable section of each thumb, which is stationary in each case and its companion is movable. The thumbs are also made on the same principle. The movement of the forms is controlled by a lever which is operated by the wheel in front. To stretch a pair of gloves, draw them over the forms snugly. Then turn the lever and the movable section of each thumb, which is stationary in each case and its companion is movable. The thumbs are also made on the same principle.
