slightly fuller one of the present. Capes are actually promis-

Every sign, then, is present of a relaxation of the severity ef the fashions of last year. A preference for rounded effects hicle is actually destined to lead an important advance in is seen; indeed, it is more than probable that heroic efforts of railroading, an affirmative answer may be given. The adfemininity to keep down their avoirdupois may be allowed to lapse, though it is scarcely necessary to emphasize once stated and are beyond doubt. It is much safer, easier and

are issued that the pitfalls that await the unskilful when the mixing of materials is in hand are as many as those that threaten the reputation of the cook, with an even sadder result of dire failure. If patchiness and puerile effects of that description are to be avoided, much time and intelligence must be spent on the task of amalgamation.

The spring will bring in gowns developed in silk and cloth, and satin and velvet are to be used together. Of one material will the underskirt be made, while the polonaise will be represented by a second fabric.

As for the sleeves of frocks, never was there greater license permitted with regard to their pattern and their length. Short, long, or mittened ones, according to the fancy of their wearers, may be ordered, with a due recognition of the requirements of the occasion, it need hardly be added.

It has been decided that the sombre colors of the winter have had their day, and to say truth they have not met with very enthusiastic approval. Women like black dresses and tailor-made suits and dark furs, but for the sad and dowdy dyes to which they have been introduced recently they have little sustained appreciation.

The present generation longs for brightness and light. It is good news, then, that I have to tell of a new reign of favor for pale shades. Tailor-made suits that are being made are developed in satin cloth of such shades as almond pink, pale powder blue, and a lovely violet with a white bloom A considerable amount of crepon is being used in conjunc-

tion with cloth, and wonderfully attractive are the soft silk and satin suits that the tailors are making for warm climates. Figured materials will be permitted to take their place as aspirants for fame in the list of new materials. Then, again, there is another concession to be made to the

healthy predilection for brightness and gaiety now evinced by the majority of women. To the subdued effect of the dark mets and laces dyed to match cloth has been due much of the sobriety of the winter toilette. Many complexions and figures are not beautified by rai-

ment deprived of the relief of white, wherefore the white chemisette-nay, even the corsage-is to be reinstated with draperies of colored chiffon to match the dress. There is a germ of good in the idea which when deftly developed will

Already a fashionable couturier is making the most fascoinating soft white silk and satin corsages draped, as I have said, with colored chiffon, and the pleasure with which his designs are being received speaks well for the future of the

A great deal depends, of course, upon the exact shade of white used with various materials, and that there are many the student of dress will realize. Oyster, ivory and pearl are the public introduction of the car, at the exhibition hall of out of the average man, and any game that helps to do this is right in line for among the possibilities, and there are various gradations of the Berlin Zoological Garden, a common railway rail is used that helps to do this is right in line for

To counteract the effect of the sober winter suit a resource | tion: is offered in the fur scarves that are so very fashionable.

The matronly looking tippet, the shoulder cape with tails experimental stage yet, but that is not saying that I do not in proportion as he is less of a hog and in proportion as he is less of a hog and
